## TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners; uneven assembly; exceeding weight capacity.	Ensure all bolts and screws are securely tightened. Verify that the frame is assembled correctly according to the manual. Do not exceed the 600-pound weight limit.
Squeaking noises.	Loose connections; slats shifting; mattress friction.	Re-tighten all fasteners. Ensure slats are properly seated and the Velcro strips are holding them. If the mattress is causing friction, try placing a thin pad between the mattress and slats.
Missing or misfitting parts.	Packaging error; manufacturing defect.	Immediately contact Novilla customer service with your purchase details and a description of the issue for assistance or replacement parts.
