---------	----------------	----------

Problem	Possible Cause	Solution
Bed feels wobbly or unstable	Loose bolts or screws.	Check and tighten all connections using the provided Allen wrench.
Difficulty aligning screw holes during assembly	Components are not correctly oriented or slightly misaligned.	Ensure all parts are facing the correct direction as per the assembly manual. Apply gentle pressure and wiggle components to align holes. If necessary, loosen adjacent screws slightly to allow for adjustment, then re-tighten.
Missing parts or damaged components	Packaging error or transit damage.	Do not proceed with assembly. Contact KEIKI customer support with your purchase details and a description of the issue.
