Glonerle Inflatable Hot Tub

Glonerle Inflatable Hot Tub User Manual

Model: Inflatable Hot Tub (71" X 71" X 25")

PRODUCT OVERVIEW

The Glonerle Round Inflatable Hot Tub is designed for relaxation and hydrotherapy, accommodating 2-4 people. It features 120 bubble jets for a soothing massage, an efficient heating system, and a durable 3-ply leak-proof PVC construction. The integrated circulating filtration system helps maintain water cleanliness.

SAFETY INFORMATION

Always read and follow all instructions carefully before installing and using this product. Failure to do so may result in serious injury or property damage.

- Ensure the hot tub is placed on a flat, stable, and level surface capable of supporting the weight of the filled tub and occupants.
- Do not operate the hot tub if the water temperature exceeds 104°F (40°C).
- Supervise children at all times when they are in or near the hot tub.
- Keep all electrical components dry and away from water. Do not use extension cords.
- Consult a physician before use if you have any medical conditions.
- Maintain proper water chemistry to prevent health risks and damage to the hot tub.

- 1 x Inflatable Hot Tub
- 1 x Heater Pump
- 1 x SPA Cover
- 1 x Floor Mat
- 2 x Filter Covers
- 2 x Filter Cartridges
- 2 x Repair Kits

SETUP INSTRUCTIONS

Follow these steps to set up your Glonerle Inflatable Hot Tub:

1. **Prepare the Location:** Choose a flat, stable, and clean area for your hot tub. Ensure there are no sharp objects. Lay down

the included floor mat to protect the tub's base.

Image: The hot tub set up in a backyard, illustrating suitable placement on a flat surface.

2. **Connect the Heater Pump:** Place the heater pump unit near the hot tub. Connect the pump's hoses to the corresponding inlets and outlets on the hot tub. Ensure connections are secure to prevent leaks.

Your browser does not support the video tag.

Video: This video demonstrates the step-by-step installation process of the hot tub, including connecting the pump and inflation.

3. **Inflate the Hot Tub:** Use the inflation hose from the heater pump to inflate the hot tub. Inflate until it is firm to the touch but not over-inflated.
4. **Fill with Water:** Once inflated, fill the hot tub with water using a garden hose. Fill to the recommended water level indicated on the inside of the tub.
5. **Install Filter Cartridges:** Insert the filter cartridges into their designated compartments within the hot tub.

OPERATING INSTRUCTIONS

Learn how to operate your hot tub's features:

- **Control Panel:** The integrated control panel on the heater pump allows you to manage all functions.

Image: The control panel of the hot tub, showing buttons for bubble activation, child lock, temperature adjustment, heater, and filter.

- **Heating:** Press the "Heater" button to activate the 1350W heater. Use the "Temp Up" and "Temp Down" buttons to set your desired water temperature between 68°F (20°C) and 104°F (40°C). The thermal cover helps retain heat.

 The image features a woman in a striped bikini relaxing in a hot tub. Below her, there is a diagram of the hot tub's internal components. The diagram shows a cross-section of the tub with orange arrows indicating the flow of water and the location of the heating elements. To the left of the diagram, there is a text box that reads "Heat Quickly and Keep Temp with Pump". Below this, there is another text box that reads "Efficient heats the water to the perfect temp(68°F to 104°F) for a relaxing soak". To the right of the diagram, there is a third text box that reads "Insulated cover helps keep the temperature consistent and also keeps leaves and junk out of the water". Below this, there is a photograph of the hot tub's insulated cover, which is black and has a zipper closure.

Heat Quickly and Keep Temp with Pump

Efficient heats the water to the perfect temp(68°F to 104°F) for a relaxing soak

Insulated cover helps keep the temperature consistent and also keeps leaves and junk out of the water

Image: This image highlights the internal heating elements and the insulated cover, highlighting how they work together to maintain water temperature.

- **Bubble Jets:** Press the "Bubble" button to activate the 120 air jets for a soothing massage.

Provide Heavenly Massage Experience

Melting away any tension or stress from the day

120 Soothing Bubble Jets

- **Filtration:** The hot tub features a strong circulating filtration system. Press the "Filter" button to activate it.
- **Child Lock:** Use the "Lock" button to prevent unintended changes to settings.

MAINTENANCE

Regular maintenance ensures the longevity and hygiene of your hot tub:

- **Filter Cartridge Replacement:** Replace the filter cartridge every 168 hours (approximately 7 days) for optimal filtration performance.

Image: This image highlights the efficient circulating filtration system and the need to replace filter cartridges to remove debris, leaves, and sand.

- **Water Treatment:** The integrated hard water treatment system helps maintain water quality, preserves bathing suits, and prevents skin dryness. Regularly test and adjust water chemistry as needed.
- **Cleaning:** Periodically clean the interior and exterior of the hot tub with mild soap and water. Ensure the tub is completely dry before storage.
- **Draining:** When not in use for extended periods, drain the hot tub completely and clean it thoroughly.

TROUBLESHOOTING

Refer to this section for common issues and their solutions:

Problem	Possible Cause	Solution
Hot tub not heating.	Heater not activated, low water level, dirty filter, or ambient temperature too low.	Ensure heater is on. Check water level and add water if necessary. Clean or replace filter. Ensure ambient temperature is within operating range.

Problem	Possible Cause	Solution
Bubbles not working.	Bubble function not activated, or air jets are blocked.	Press the "Bubble" button. Check for any obstructions in the air jets.
Water is cloudy.	Dirty filter, improper water chemistry, or heavy use.	Clean or replace filter cartridge. Test water chemistry and adjust chlorine/pH levels. Shock the water if necessary.
Hot tub losing air.	Loose inflation valve cap, small puncture, or extreme temperature changes.	Ensure inflation valve cap is tightly secured. Check for small punctures using soapy water and repair with included kit. Avoid extreme temperature fluctuations.

SPECIFICATIONS

Feature	Detail
Brand	Glonerle

Answered questions about this manual

What does the flashing “FC” error alarm mean on the Glonerle Inflatable Hot Tub, and how do I clear it?

On most inflatable hot tubs, including the Glonerle Inflatable Hot Tub, the "FC" code stands for Filter Change or Filter Check. This is a built-in maintenance reminder rather than a mechanical failure. How to clear...
