

PAWPRO PAWPRO Series: Ultimate

PAWPRO Series: Ultimate Dog Training Collar User Manual

Model: PAWPRO Series: Ultimate

1. INTRODUCTION

Thank you for choosing the PAWPRO Series: Ultimate Dog Training Collar. This device is designed to assist in effective dog training through various modes, promoting better behavior and communication between you and your pet. Please read this manual thoroughly before use to ensure proper operation and the safety of your dog. The PAWPRO Series: Ultimate Dog Training Collar features a 4-mile range, 124 adjustable training levels, and four distinct modes: Beep, Vibration, Static Shock, and LED Light. It is waterproof, rechargeable, and suitable for dogs of various sizes.

2. IMPORTANT SAFETY INFORMATION

The PAWPRO Series: Ultimate Dog Training Collar is a training tool, not a punishment device. Proper and humane use is essential. Misuse can lead to physical or psychological harm to your dog. Always prioritize your dog's well-being.

- **Age and Health:** Do not use this collar on puppies younger than 6 months old. Ensure your dog is healthy and free from skin conditions or heart problems before use. Consult a veterinarian if unsure.
- **Collar Fit:** The collar must fit snugly but not too tightly. It should be high on the dog's neck, just below the ears. Ensure the contact points touch the skin. Regularly check for pressure sores or irritation.
- **Duration of Wear:** Do not leave the collar on your dog for more than 12 consecutive hours. Prolonged wear can cause skin irritation.
- **Supervision:** Always supervise your dog when the collar is in use.
- **Static Shock Mode:** Use static shock mode only after exhausting beep and vibration modes. Start at the lowest level and gradually increase until your dog responds. This mode should be used as a deterrent, not for punishment.
- **Avoid Over-Correction:** Excessive use of any mode can cause stress or fear in your dog. Use corrections sparingly and consistently.
- **Children:** Keep the remote control out of reach of children.

3. PACKAGE CONTENTS

Upon unpacking your PAWPRO Series: Ultimate Dog Training Collar, please verify that all components are present:

- Remote Control
- Receiver Collar (with adjustable strap)
- 4 Contact Points (2 Short, 2 Long)
- 4 Conductive Silicone Caps
- Light-test Tool
- Wrist Strap for Remote
- 2-in-1 Charging Cable
- User Manual (this document)
- Dog Training Ebook (digital access)

4. PRODUCT COMPONENTS

4.1 Remote Control

The remote control features a full-color LCD display for easy mode and level adjustments. It includes buttons for Beep, Vibration, Static Shock, and LED Light modes, along with intensity adjustment buttons and an On/Off switch.

4.2 Receiver Collar

The receiver collar is designed to be lightweight and waterproof (IPX7 rated). It houses the contact points and an integrated LED light for visibility in low-light conditions. The collar strap is adjustable to fit various dog sizes.

5. SETUP

5.1 Charging the Devices

Before initial use, fully charge both the remote control and the receiver collar. Use the provided 2-in-1 charging cable. A full charge typically takes 2 hours.

- Connect the charging cable to a USB power adapter (not included).
- Plug the two micro-USB ends into the charging ports on the remote and receiver.
- The indicator lights will show charging status (refer to device for specific light behavior).

5.2 Attaching Contact Points and Silicone Caps

Select the appropriate contact points (short for short-haired dogs, long for long-haired dogs) to ensure proper skin contact. For added comfort and to prevent irritation, place the conductive silicone caps over the contact points.

5.3 Fitting the Receiver Collar

Proper fit is crucial for effectiveness and safety.

1. Place the receiver collar high on your dog's neck, just below the ears.
2. Adjust the strap so it is snug. You should be able to fit one finger comfortably between the strap and your dog's neck.
3. Ensure the contact points make direct contact with your dog's skin. If your dog has thick fur, you may need to trim a small area or use the longer contact points.

5.4 Pairing (If Necessary)

The remote and receiver are typically pre-paired from the factory. If re-pairing is needed:

1. Turn on the remote control.
2. With the receiver collar off, press and hold the power button on the receiver until the indicator light flashes rapidly.
3. Within 10 seconds, press any mode button (Beep, Vibration, or Static Shock) on the remote.
4. The receiver light will stop flashing and remain solid, indicating successful pairing.

6. OPERATING MODES

The PAWPRO Series: Ultimate Dog Training Collar offers four distinct training modes:

- **Beep Mode:** Provides an audible tone. Adjustable levels from 1 to 8.
- **Vibration Mode:** Delivers a tactile vibration. Adjustable levels from 1 to 16.
- **Static Shock Mode:** Emits a static pulse. Adjustable levels from 1 to 99. Use with caution and at the lowest effective level.
- **LED Light Mode:** Activates a bright LED light on the collar for visibility in the dark.

To switch between modes, press the corresponding button on the remote. Use the '+' and '-' buttons to adjust the intensity level for Beep, Vibration, and Static Shock modes.

7. TRAINING GUIDELINES

Effective training requires consistency, patience, and positive reinforcement. The included training guide provides detailed techniques. Here are general principles:

- **Start with Basic Obedience:** Ensure your dog understands basic commands before introducing the collar.
- **Introduce Gradually:** Allow your dog to wear the collar for short periods without activation to get accustomed to it.
- **Use Lowest Effective Level:** Always start with the lowest level for vibration or static shock and increase only if necessary, observing your dog's reaction.
- **Timing is Key:** Deliver corrections immediately as the unwanted behavior occurs.
- **Positive Reinforcement:** Reward desired behaviors with praise, treats, or toys.
- **Consistency:** Everyone involved in training should use the collar consistently and follow the same commands and correction methods.

8. CHARGING AND BATTERY LIFE

The PAWPRO Series: Ultimate Dog Training Collar is designed for extended use with efficient battery management.

- **Remote Battery Life:** Up to 50 days on a single charge.
- **Receiver Battery Life:** Up to 20 days on a single charge.
- **Standby Time:** Up to 100 days.
- **Charging Time:** Approximately 2 hours for a full charge using the provided 2-in-1 cable.

9. MAINTENANCE

Proper maintenance ensures the longevity and performance of your training collar.

- **Cleaning:** Wipe the remote and receiver with a damp cloth. Avoid harsh chemicals. Ensure contact points are clean and free of debris.
- **Waterproof Feature:** The receiver collar is IPX7 waterproof, meaning it can withstand submersion in up to 1 meter of water for 30 minutes. However, always ensure the charging port cover is securely closed before exposing it to water. The remote is not waterproof.
- **Storage:** Store the collar and remote in a cool, dry place when not in use.
- **Skin Checks:** Regularly inspect your dog's neck for any signs of irritation, redness, or sores from the contact points. If irritation occurs, discontinue use and consult a veterinarian.

FITS EVERY DOG

100% WATERPROOF

**Perfect for Small, Medium,
and Large Dogs**

**Fully Submersible, Perfect
for Water Activities**

**Adjustable for a Secure,
Comfortable Fit**

**Train Your Dog Rain or
Shine, Anytime**

10. TROUBLESHOOTING

If you encounter issues with your PAWPRO Series: Ultimate Dog Training Collar, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Collar not activating	Low battery; Not paired; Out of range; Contact points not touching skin.	Charge both devices; Re-pair remote and receiver; Move closer to your dog; Adjust collar fit and contact points.
Remote not responding	Low battery; Remote is off.	Charge the remote; Turn on the remote.

Problem	Possible Cause	Solution
Static shock feels weak or absent	Incorrect contact point length; Poor skin contact; Level too low.	Ensure proper contact points are used and making good skin contact; Increase static shock level gradually. Use the light-test tool to verify function.
Shortened range	Environmental interference; Low battery.	Avoid areas with strong electromagnetic interference; Ensure both devices are fully charged.

11. SPECIFICATIONS

- **Brand:** PAWPRO
- **Model Name:** PAWPRO Series: Ultimate
- **Item Model Number:** PAWPRO Series: Ultimate
- **ASIN:** B0FBL3DL1T
- **Item Weight:** 12 ounces (total package)
- **Receiver Weight:** Approximately 1.5 ounces
- **Material:** Nylon (collar strap)
- **Waterproof Rating:** IPX7 (Receiver Collar)
- **Range:** Up to 4 miles (6.4 km)
- **Training Modes:** Beep (1-8 levels), Vibration (1-16 levels), Static Shock (1-99 levels), LED Light
