5. OPERATING INSTRUCTIONS

5.1 Steering the Tractor

The tractor can be steered using the steering wheel inside the cab or by using the additional steering rod inserted through the sliding roof. The all-terrain pendulum front axle allows for precise steering even on varied surfaces.

5.2 Operating the Front Loader

The front loader is fully functional. Use the levers on the side of the loader to raise, lower, and tilt the attached implement (loading box or forks). This allows for realistic loading and unloading actions.
