OPERATING INSTRUCTIONS

The DEKALA DC01 features an intuitive touch screen interface for easy navigation and setting adjustments.

1. Time and Date Display:

- The main screen displays the current time, date, and day of the week.
- Time is automatically synchronized via Wi-Fi once connected.
- You can customize the display format (e.g., 12-hour/24-hour, date format) in the settings menu.

2. Weather Information:

- The clock displays real-time weather conditions, temperature, and humidity for your configured location.
- Weather data is updated via Wi-Fi.
- Internal sensors monitor ambient temperature and humidity.

3. Alarm Settings:

The device supports over 30 alarm settings, including standard alarms and specialized reminders.

1. **Accessing Alarm Settings:** Tap the "Alarm" icon or navigate to the alarm section from the main menu.

2. **Adding a New Alarm:**

- Tap the "+" icon to add a new alarm.
- Set the desired time and repetition (e.g., daily, weekdays, specific days).
- Choose an alarm type: audible, vibration (bed shaker), or both.
- Select an alarm sound (if audible).
- Add a custom label for the alarm (e.g., "Wake Up," "Medication").

3. **Editing/Deleting Alarms:** Select an existing alarm to modify its settings or delete it.

MAINTENANCE

To ensure the longevity and optimal performance of your DEKALA Digital Alarm Clock, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents.
- **Power:** Ensure the device is connected to a stable power source.
- **Software Updates:** Periodically check for software updates through the device settings or companion application (if available) to ensure the latest features and bug fixes.
- **Environment:** Keep the device in a dry environment, away from direct sunlight, extreme temperatures, and high humidity.

TROUBLESHOOTING

If you encounter issues with your DEKALA Digital Alarm Clock, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Clock not powering on.	No power supply or faulty adapter.	Ensure the power adapter is securely connected to the clock and a working electrical outlet. Try a different outlet.
Incorrect time or date.	No Wi-Fi connection or incorrect time zone setting.	Verify Wi-Fi connectivity in settings. Check and correct the time zone. Ensure the device is connected to a 2.4 GHz network.

Problem	Possible Cause	Solution
Weather information not updating.	No Wi-Fi connection or location not set.	Confirm Wi-Fi connection. Ensure your location is correctly set in the device settings.
Alarms not sounding/vibrating.	Alarm volume too low, alarm disabled, or bed shaker not connected/functional.	Check alarm settings to ensure it is enabled and the volume is adequate. Verify the bed shaker is properly connected and selected as an alarm output.
Screen too bright/dim.	Automatic dimming settings or manual brightness adjustment.	Adjust the brightness settings in the menu. If automatic dimming is enabled, ensure it is functioning correctly or disable it for manual control.
Touch screen unresponsive.	Temporary software glitch or screen obstruction.	Restart the device by unplugging and replugging the power. Ensure the screen is clean and free from debris.
