### 4.2 Reversing Camera Installation

The reversing input must be plugged in even if the reversing camera is not used. Follow these steps for wiring:

1. Connect the red wire (1) to the positive pole of the car's reversing light power supply.
2. Connect the black wire (2) to the negative pole of the car's reversing light power supply.
3. The reversing trigger (3) is controlled by the stereo and does not require a separate connection.
4. Connect the yellow RCA video cable (4) from the camera to the 'Rear Camera Input' on the head unit.

## 6. MAINTENANCE

To ensure optimal performance and longevity of your CAMECHO car stereo, follow these general maintenance guidelines:

- **Cleaning the Screen:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **Software Updates:** Periodically check for available software updates to ensure you have the latest features and bug fixes. Updates can typically be found in the system settings or through the manufacturer's website.
- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold for extended periods, as this can affect its electronic components and display.
- **Cable Connections:** Ensure all cables are securely connected. Loose connections can lead to intermittent functionality.

## 7. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following troubleshooting tips:

- **No Power:** Check all power cable connections. Ensure the car's fuse for the stereo is not blown.
- **Steering Wheel Controls Not Working:** Confirm that the CANBUS box is correctly connected to the 8-pin connector on the head unit. Navigate to **Settings > Factory Setup (Password: 1234) > CAN Settings** and select the correct protocol for your car: **Raise - Ford - Mondeo - 2013-2018 - Low Configuration**
- **Backup Camera Image Not Clear/Working:** Ensure the rear camera input cable is securely connected. If the image is unclear, adjust the backup camera resolution through **Settings > Factory Settings > Password: 1234 > Video Source**.
- **No Bluetooth/Wi-Fi Signal:** Ensure the white plug for the antenna is connected to the main device.
- **GPS Signal Issues:** Ensure the GPS antenna is properly installed and has a clear view of the sky.
- **Sound Distortion:** Check speaker connections. Adjust DSP and EQ settings.
- **Unit Freezes/Unresponsive:** Perform a soft reset by pressing the reset button (if available) or by turning off the car ignition and restarting.
