Dhyala KJ01

Dhyala KJ01 Replacement Filter Instruction Manual

Model: KJ01

Brand: Dhyala

INTRODUCTION

This manual provides essential instructions for the proper use and maintenance of your Dhyala KJ01 Replacement Filter. This 3-in-1 H13 Grade True HEPA Filter is designed to effectively capture dust, pollen, lint, pet dander, and smoke, ensuring cleaner indoor air quality.

PRODUCT FEATURES

The Dhyala KJ01 Replacement Filter incorporates a multi-stage filtration system to enhance air quality:

- **Pre-Filter:** Captures larger particles such as dust, lint, and pet fur, extending the life of subsequent filters.
- **H13 True HEPA Filter:** Traps 99.97% of airborne particles as small as 0.3 microns, including pollen, dust

mites, and pet dander.

- **Activated Carbon Filter:** Absorbs unwanted odors from pets, cooking, smoke, and volatile organic compounds (VOCs).

SETUP AND PREPARATION

Before installing the new filter, ensure your Dhyala KJ01 Air Purifier is turned off and unplugged from the power outlet. This prevents accidental operation and ensures safety during the replacement process.

1. **Unpack the New Filter:** Carefully remove the new Dhyala KJ01 Replacement Filter from its plastic packaging. Ensure all plastic wrapping is removed before installation.
2. **Identify Filter Orientation:** Note the direction of the filter. The side with the handle should face outwards when installed.

FILTER INSTALLATION

Follow these steps to replace the filter in your Dhyala KJ01 Air Purifier:

1. **Remove the Filter Cover:** Gently remove the filter cover from your air purifier.
2. **Remove the Old Filter:** Carefully pull out the used filter from the unit. Dispose of the old filter responsibly.
3. **Insert the New Filter:** Align the new filter with the corresponding filter groove on the upper part of the purifier. Ensure the side with the handle is facing outwards.
4. **Replace the Cover:** After installing the filter, securely place the filter cover back onto the air purifier.

OPERATING YOUR AIR PURIFIER AFTER FILTER REPLACEMENT

Once the new filter is installed and the cover is securely closed, plug in your Dhyala KJ01 Air Purifier and turn it on. The unit will resume normal operation, providing clean air.

Filter Reset

After replacing the filter, the filter reset indicator light on your air purifier may be on. To reset it:

- Press and hold the filter reset button (or indicated button) for approximately 3 seconds until the indicator light turns off.
- Refer to your air purifier's main instruction manual for specific button locations if needed.

MAINTENANCE AND FILTER LIFESPAN

To maintain optimal purification efficiency, it is recommended to replace the Dhyala KJ01 filter every 4 to 6 months. This timeframe may vary depending on local air quality conditions and the frequency of air purifier usage. Regular replacement ensures that the H13 True HEPA and activated carbon layers continue to effectively capture pollutants and odors.

Extended Lifespan

Up to 3000 hours of service life

Use the official replacement filter of Dhyala and replace the filter 4- 6 months to achieve better purification effect

TROUBLESHOOTING

If your air purifier is not functioning correctly after filter replacement, consider the following:

- **Filter Not Seated Properly:** Ensure the filter is fully inserted and aligned within its compartment, and the cover is securely closed.
- **Filter Plastic Removed:** Confirm that all plastic packaging has been removed from the new filter.
- **Power Connection:** Verify that the air purifier is properly plugged into a working power outlet.
- **Filter Reset:** Perform the filter reset procedure as described in the "Operating" section.
