MAINTENANCE

Cleaning Your Device

To clean the screen, use a soft, lint-free cloth. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner designed for electronics. Avoid using harsh chemicals or abrasive materials. For the aluminum body, a dry, soft cloth is sufficient.

Battery Care

The OnePlus Pad3 is equipped with a 12,140mAh battery. To prolong battery life:

- Avoid extreme temperatures.
- Do not let the battery completely drain frequently.
- Use only the official OnePlus 80W SUPERVOOC charger and cable.

Software Updates

Your OnePlus Pad3 runs on OxygenOS 14.1. Regularly check for and install software updates to ensure optimal performance, security, and access to new features. You can usually find updates in **Settings > About device > Software update**.

TROUBLESHOOTING

Common Issues and Solutions

- **Device not powering on:** Ensure the device is charged. Connect it to the charger for at least 10 minutes, then try powering on again. If it still doesn't power on, perform a forced restart by holding the Power button for 10-15 seconds.
- **Screen unresponsive:** If the screen is frozen, force restart the device. If the issue persists, try clearing the cache partition (refer to online resources for specific OxygenOS instructions) or consider a factory reset (backup data first).
- **Wi-Fi connectivity issues:** Try restarting your Wi-Fi router and the tablet. Forget the Wi-Fi network on your tablet and reconnect. Ensure your tablet's software is up to date.
- **Slow performance:** Close unused apps running in the background. Clear app caches regularly. Ensure you have sufficient storage space. Consider a factory reset as a last resort after backing up your data.

For more complex issues, please refer to the official OnePlus support website or contact customer service.
