SETUP

Before using your carrying case, ensure all packaging materials are removed. The case is designed for a custom fit, providing secure storage for your Nintendo Switch 2 console and its essential accessories.

- Console Placement:** Gently place your Nintendo Switch 2 console into the main compartment of the case. Ensure it sits snugly within the molded section to prevent movement during transport.
- Accessory Storage:** Utilize the mesh pocket for larger accessories such as the power adapter, charging cable, or extra Joy-Cons. The elastic straps can help secure items in place.
- Game Card Storage:** Insert your game cartridges into the dedicated elastic slots located on the flap. These slots are designed to hold multiple game cards securely.

MAINTENANCE

Proper care will extend the life and effectiveness of your ECHTPower Carrying Case.

- **Cleaning the Exterior:** Wipe the exterior surface with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used, followed by wiping with a clean, damp cloth. Allow to air dry completely. Do not use harsh chemicals or abrasive cleaners.
- **Cleaning the Interior:** Use a soft, dry cloth or a lint roller to remove dust or debris from the plush interior lining. Avoid excessive moisture.
- **Storage:** When not in use, store the case in a cool, dry place away from direct sunlight and extreme temperatures.
- **Protection Features:** The case is designed to be shockproof, splashproof, and scratch-resistant. While it offers significant protection, it is not fully waterproof. Avoid submerging the case in water.

TROUBLESHOOTING

If you encounter any issues with your carrying case, please refer to the following common solutions:

- **Zipper Sticking:** If the zipper becomes difficult to move, apply a small amount of zipper lubricant or a graphite pencil lead along the teeth. Avoid forcing the zipper.
- **Case Not Closing Properly:** Ensure all items inside the case are correctly positioned and not overfilling the compartments. The console and accessories should sit flush within their designated areas.
- **Odor:** A new product may have a slight manufacturing odor. This will typically dissipate after airing out the case in a well-ventilated area for a few days.
