

Airpher MP-802T

Airpher MP-802T 400W Cold Press Juicer Instruction Manual

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your Airpher MP-802T Cold Press Juicer. Designed for nutrient preservation and high juice yield, this appliance features a 5.8-inch wide feed chute and a powerful 400W motor for effortless juicing.

1. SAFETY INSTRUCTIONS

Please read all instructions carefully before using the appliance. Retain this manual for future reference.

- Always ensure the juicer is properly assembled and the lid is tightly closed before operation.
- The juicer is equipped with a safety lock setting that will automatically pause if the cover is accidentally opened during the juicing process.
- Align the handle exactly with the ON/OFF start button for proper installation and operation.
- Keep hands and utensils out of the feed chute during operation to prevent injury. Use the provided push rod to guide ingredients.
- Unplug the appliance from the power outlet when not in use, before assembling or disassembling parts, and before cleaning.
- Do not immerse the motor base in water or other liquids.

- Do not operate the juicer if the power cord or plug is damaged, or if the appliance malfunctions or is dropped.

Automatic Safety Sensor

The machine will automatically stop if the lid is opened while the machine is running.

2. PRODUCT COMPONENTS

Your Airpher Cold Press Juicer comes with the following parts:

- Motor Base
- Juicing Bowl
- Auger (Masticating Screw)
- Feed Chute with Lid (5.8-inch wide)
- Juice Cup
- Pulp Container
- Push Rod
- Cleaning Brush

3. SETUP

Follow these simple steps to assemble your juicer:

1. Place the juicing bowl securely onto the motor base.
2. Insert the auger into the center of the juicing bowl.
3. Position the feed chute on top of the juicing bowl and rotate it clockwise until it locks into place. Ensure the handle aligns with the ON/OFF start button.
4. Place the juice cup under the juice spout and the pulp container under the pulp outlet.

3 Step Quick Assembly

4. OPERATING INSTRUCTIONS

The Airpher MP-802T utilizes low-speed cold press technology to minimize oxidation and maximize nutrient retention. Its 5.8-inch wide feed chute allows for juicing whole fruits and vegetables, reducing pre-cutting time.

- **Preparation:** Wash fruits and vegetables thoroughly. For very hard items or those with large pits, it is recommended to cut them into smaller pieces and remove pits before juicing.
- **Start Juicing:** Plug in the juicer. Turn the one-button control knob to the 'ON' position.
- **Feed Ingredients:** Place ingredients into the wide feed chute. Use the push rod gently to guide them down towards the auger.
- **High Juice Yield:** The 400W motor ensures efficient extraction, delivering up to 99% juice yield with minimal pulp.
- **Reverse Function:** If ingredients become jammed, turn the knob to the 'REV' (Reverse) position for a few seconds to clear the blockage, then return to 'ON'.
- **Quiet Operation:** The stable one-piece body and brushless motor ensure smooth and quiet operation.

5. CLEANING AND MAINTENANCE

Regular cleaning ensures the longevity and hygiene of your juicer. The juicer is designed for easy disassembly and cleaning.

1. **Disassembly:** Turn the juicer off and unplug it. Rotate the feed chute counter-clockwise to unlock and remove it. Pull out the auger. Remove the juicing bowl from the motor base.
2. **Washing:** Hand wash all removable parts (juicing bowl, auger, feed chute, juice cup, pulp container) with warm, soapy water and the provided cleaning brush. Rinse thoroughly.
3. **Base Cleaning:** Wipe the motor base with a damp cloth. Do not immerse the motor base in water.
4. **Drying and Storage:** Ensure all parts are completely dry before reassembling or storing the juicer.

6. TROUBLESHOOTING GUIDE

If you encounter any issues with your juicer, please refer to the following common troubleshooting steps:

- **Juicer not turning on:** Ensure the juicer is properly plugged into a working power outlet. Verify that the feed chute is correctly installed and locked into place, with the handle aligned with the ON/OFF start button. The safety lock prevents operation if not correctly assembled.
- **Juicer stops during operation:** Check if the lid or feed chute has been opened. The safety sensor will automatically stop the machine. Close the lid securely to resume operation.
- **Ingredients are jammed:** Use the 'REV' (Reverse) function to clear any blockages. If the issue persists, disassemble the juicer, clear the obstruction, and reassemble.
- **Low juice yield or wet pulp:** Ensure ingredients are fresh and suitable for juicing. For optimal results, avoid overfilling the feed chute.

- **Appliance is noisy or shaking excessively:** Ensure the juicer is placed on a stable, flat surface. Check that all parts are correctly assembled and tightened.

7. SPECIFICATIONS

Brand	Airpher
Model Name	MP-802T
Power	400 Watts
Voltage	120 Volts
Feed Chute Size	5.8 inches
Capacity	1.8 Liters
Product Dimensions	4.33"D x 12.99"W x 4.33"H
Item Weight	9 pounds
Material	Plastic, Stainless Steel, PMMA (Blade)
Number of Speeds	1
Special Features	400W Motor, 5.8" Wide Feed Chute, Easy to Clean, High Juice Yield, Slow Masticating
