User Manual

ROBOT VACUUM CLEANER ACCESSORY KIT

1. Introduction and Overview

This user manual provides comprehensive instructions for the BTJCRLEB Replacement Accessory Kit, designed for compatible robot vacuum cleaners, specifically Laresar P10 and Airzeen J10 models. This kit includes essential consumables such as HEPA filters, main brushes, side brushes, and mop pads, crucial for maintaining your robot vacuum's optimal cleaning performance and extending its lifespan.

Regular replacement of these parts ensures efficient dust collection, thorough floor cleaning, and consistent suction power, contributing to a cleaner home environment.

2. Product Components

The BTJCRLEB Replacement Accessory Kit typically includes the following components:

- **HEPA Filters:** Designed to capture fine dust particles and allergens, improving air quality.
- **Main Roller Brush:** The primary brush responsible for agitating and sweeping debris from floors.
- **Side Brushes:** Small rotating brushes that sweep debris from edges and corners into the main cleaning path.
- **Mop Pads:** Absorbent cloths used for wet mopping functions, designed to remove stains and fine dust.

Figure 2.1: Overview of the accessory kit components including side brushes, main brush, HEPA filter, and mop pads.

3. Setup and Installation

Before installing any new components, ensure your robot vacuum cleaner is turned off and disconnected from its charging base. Refer to your robot vacuum's original user manual for specific instructions on accessing component compartments.

3.1. Replacing the HEPA Filter

1. Locate the dust bin on your robot vacuum.
2. Remove the dust bin from the robot.
3. Open the dust bin cover and remove the old HEPA filter.
4. Insert the new HEPA filter into the designated slot, ensuring it is seated correctly.
5. Close the dust bin cover and reinsert the dust bin into the robot.

3.2. Replacing the Main Roller Brush

1. Flip the robot vacuum over to access the underside.
2. Locate the main brush cover, usually secured by latches or screws.
3. Open or remove the main brush cover.
4. Lift out the old main roller brush.
5. Insert the new main roller brush, ensuring its ends align with the corresponding slots.
6. Replace the main brush cover and secure it.

3.3. Replacing the Side Brushes

1. Flip the robot vacuum over.
2. Locate the side brushes, typically held by a single screw or a snap-on mechanism.
3. Remove the screw (if applicable) or gently pull off the old side brush.
4. Align the new side brush with the post and push it down firmly or secure it with the screw.
5. Ensure the brush rotates freely.

3.4. Attaching/Replacing Mop Pads

1. Locate the mop pad attachment area on the robot vacuum, usually on the underside or a dedicated water tank.
2. Remove the used mop pad (if any).
3. Attach the new mop pad, ensuring it is securely fastened via Velcro or designated slots.
4. If your robot has a water tank, ensure it is filled before mopping.

4. Operating with New Accessories

Once the new accessories are installed, your robot vacuum cleaner will exhibit enhanced cleaning capabilities:

- **Improved Suction Durability:** New filters maintain consistent airflow, ensuring strong suction for effective debris collection.
- **Enhanced Cleaning Power:** Fresh main and side brushes effectively agitate and sweep dirt, hair, and debris from various floor types.
- **Thorough Mopping:** Clean mop pads absorb and distribute water evenly, leading to more effective stain removal and a cleaner finish.
- **Reduced Tangles:** Optimally designed replacement brushes help minimize hair tangles, making maintenance easier.
- **Reduced Residue:** New mop pads help prevent streaks and residue, leaving floors cleaner.

5. Maintenance

Regular cleaning and timely replacement of these accessories are vital for your robot vacuum's performance and longevity.

5.1. Cleaning Guidelines

- **HEPA Filter:** Tap the filter gently over a trash can to remove loose dust. Do not wash HEPA filters with water unless explicitly stated by the robot vacuum manufacturer, as this can damage the filter material.
- **Main Roller Brush:** Use the cleaning tool (often provided with the robot) to remove tangled hair and debris from the brush bristles. The brush can often be rinsed with water, but ensure it is completely dry before reinstallation.
- **Side Brushes:** Remove any tangled hair or debris. If bent, you can sometimes restore their shape by soaking them in warm water for a few minutes.
- **Mop Pads:** After each use, remove the mop pad and wash it thoroughly with water and mild detergent. Allow it to air dry completely before reattaching.

5.2. Replacement Frequency

The lifespan of accessories varies depending on usage frequency and environment. General recommendations are:

- **HEPA Filters:** Every 1-3 months.
- **Main Roller Brush:** Every 6-12 months.

- **Side Brushes:** Every 3-6 months.
- **Mop Pads:** Every 1-3 months, or when they show signs of wear or reduced cleaning effectiveness.

Always refer to your specific robot vacuum cleaner's manual for precise maintenance schedules.

6. Troubleshooting

If you encounter issues after replacing accessories, consider the following:

- **Reduced Cleaning Performance:**
 - Ensure all new parts are installed correctly and securely.
 - Check for any obstructions or debris caught in the brushes or filter compartment.
 - Verify that the filter is not clogged.
- **Parts Not Fitting:**
 - Double-check the compatibility of the accessory kit with your specific robot vacuum model (Laresar P10, Airzeen J10).
 - Ensure you are attempting to install the correct part in the correct location.
- **Unusual Noises:**
 - Turn off the robot and inspect the main brush and side brushes for any foreign objects (e.g., string, hair, small toys) that might be caught.
 - Ensure brushes are properly seated and not rubbing against other components.

If problems persist, consult your robot vacuum's original manual or contact the robot vacuum manufacturer's support.

7. Specifications

Feature	Detail
Brand Name	BTJCRLEB
Compatible Models	Laresar P10, Airzeen J10
Item Model Number	ronglan
Item Weight	1.76 ounces
Package Dimensions	0.39 x 0.39 x 0.39 inches
Country of Origin	China
Vacuum Part Type	Brushes, HEPA Filters, Mop Wipes

8. Warranty and Support

This accessory kit is a consumable product. For specific warranty information regarding manufacturing defects or product issues, please refer to the seller's policy on the platform where the purchase was made. Typically, consumable parts have a limited or no direct warranty.

For any questions or concerns regarding the compatibility or quality of these replacement parts, please contact the seller directly through the purchase platform. Provide your order details for faster assistance.

Ask a question about this manual

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
