SAFETY INFORMATION

Important Safety Precautions:

- Always secure the hall tree to the wall using the anti-tipping device provided. This prevents accidental tipping and ensures stability.
- Do not exceed the specified weight capacities for the whole unit, bench, cabinet shelf, compartment, or hooks. Overloading can compromise stability and lead to damage or injury.
- Follow the assembly instructions carefully and completely. Incorrect assembly can result in an unstable product.
- Keep small parts away from children during assembly to prevent choking hazards.
- Regularly check all fasteners to ensure they remain tight. Retighten as necessary.

SETUP AND ASSEMBLY

Assembly of your HOMCOM 3-in-1 Hall Tree is required. For optimal safety and ease, it is recommended that **two people** perform the assembly process.

Before You Begin:

- Unpack all components and verify that all parts listed in the instruction manual are present and undamaged.
- Clear a spacious area for assembly to prevent damage to the product or your flooring.
- Have necessary tools ready (e.g., screwdriver, hammer if required).

Assembly Steps:

1. Follow the step-by-step diagrams and instructions provided in the included assembly guide.
2. Pay close attention to part labels. Some users have reported mislabeled parts in the instructions; if a part does not seem to fit, cross-reference with the visual diagrams.
3. When attaching the back panels, proceed carefully as this step can be intricate.
4. Once assembled, ensure all screws and fasteners are securely tightened.
5. **Crucially, install the anti-tipping device** by attaching the hall tree to a wall stud. This is a vital safety measure to prevent the unit from falling over.

TROUBLESHOOTING

This section addresses common issues that may arise during assembly or use of your hall tree.

Problem	Possible Cause	Solution
Hooks bend or break easily.	Overloading the hooks with heavy items (e.g., heavy backpacks).	Do not exceed the hook's weight capacity (4.4 lbs. per hook). Distribute weight evenly. Consider using alternative hanging solutions for very heavy items.
Scratched or damaged pieces upon arrival.	Shipping damage or manufacturing defect.	Inspect all parts immediately upon receipt. Contact customer support with photos of damaged parts for replacement.
Difficulty with assembly; instructions unclear or parts mislabeled.	Instruction manual discrepancies or complex steps.	Refer to visual diagrams in the manual if written instructions are unclear. If parts are mislabeled, identify them by their appearance. Assembly is easier with two people.
Unit feels unstable or wobbly after assembly.	Fasteners not fully tightened or anti-tipping device not installed.	Ensure all screws and connections are securely tightened. Always install the anti-tipping device and secure the unit to the wall.
