3.2 App Installation and Pairing

To unlock the full potential of your smartwatch, download and install the **FitCloudPro** app on your smartphone (compatible with Android and iOS). You can find the app by searching in your device's app store or by scanning the QR code provided in the connection card.

1. Download the **FitCloudPro** app from your phone's app store.
2. Open the app and create an account or log in.
3. Ensure Bluetooth is enabled on your smartphone.
4. In the app, navigate to the 'Device' section and select 'Add Peripheral Now' or 'Bind Smartwatch'.
5. Open the watch settings, select the QR code option, and scan the code with the **FitCloudPro** app to

connect. Alternatively, the app may discover the watch automatically.

6. Confirm the pairing request on both your phone and the smartwatch.

4.2 Health and Sleep Tracking

Utilize the advanced sensors for 24/7 health monitoring, including heart rate, blood pressure, blood oxygen level, and sleep quality. The watch provides detailed sleep analysis and health insights. It also includes a women's period reminder function.

- **Heart Rate Monitor:** Tracks your heart rate throughout the day.
- **Blood Oxygen Monitor:** Measures your blood oxygen levels.
- **Sleep Monitor:** Analyzes deep sleep, light sleep, and awake times.
- **Women's Health:** Provides period reminders and tracks menstrual cycles.

4.4 Additional Features

The Lefitus Smart Watch offers a range of versatile functions:

- **Music Control:** Control music playback on your smartphone directly from your watch.
- **Camera Control:** Remotely control your phone's camera to take photos.
- **Weather Forecast:** Get current and future weather updates.
- **Timer & Stopwatch:** Essential tools for various activities.
- **Alarm Clock:** Set alarms for reminders.
- **Sedentary Reminder:** Prompts you to move after periods of inactivity.
- **Find My Phone:** Helps locate your misplaced smartphone.
- **Brightness Adjustment:** Customize screen brightness for different environments.

5. MAINTENANCE

5.1 Water Resistance

The Lefitus Smart Watch has an IP68 waterproof rating, meaning it is resistant to dust and can withstand immersion in water up to 1.5 meters for 30 minutes. It is suitable for daily use, such as hand washing and use in the rain. However, it is not recommended for swimming, showering with hot water, or diving.

5.2 Cleaning and Care

To maintain your smartwatch, regularly clean the screen and bands with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials. Ensure the charging contacts are clean and dry before charging.

6. TROUBLESHOOTING

If you encounter any issues with your Lefitus Smart Watch, please refer to the following common solutions:

- **Watch not turning on:** Ensure the watch is fully charged. Connect it to the charger for at least 15 minutes before attempting to power it on.
- **Cannot pair with phone:** Make sure Bluetooth is enabled on your phone and the watch is within range. Restart both the watch and your phone, then try pairing again through the FitCloudPro app.
- **Notifications not received:** Check that 'Push Notifications' are enabled in the FitCloudPro app for the desired applications. Also, ensure your phone's notification settings allow the app to send alerts.
- **Inaccurate health data:** Ensure the watch is worn snugly on your wrist, not too tight or too loose. Keep the sensor clean. Note that the watch is not a medical device and data is for reference only.
- **Short battery life:** Reduce screen brightness, disable unnecessary notifications, and limit continuous heart rate monitoring if not needed.

For further assistance, please contact customer support.
