3. Product Overview

The Hikity Android 15 Car Radio features a 9-inch IPS capacitive touchscreen with a resolution of 1280x720. It runs on the latest Android 15 operating system, powered by an 8-core CPU, 6GB RAM, and 128GB ROM for optimal performance. Key functionalities include:

- **High-Resolution Display:** 9-inch IPS touchscreen (1280x720) for clear visuals.
- **Advanced Performance:** Android 15 OS, 8-core CPU, 6GB RAM, 128GB ROM.
- **Seamless Smartphone Integration:** Wireless and Wired CarPlay & Android Auto.
- **Navigation:** Built-in GPS with support for online and offline maps.
- **Audio Enhancement:** DSP tuning software with 32 equalization settings.
- **Connectivity:** Bluetooth 5.0 for hands-free calls and music streaming, Wi-Fi for internet access.
- **Safety Features:** Includes an AHD rear camera for parking assistance.
- **Customization:** 59 user interface themes and customizable home screen apps.

4. Setup and Installation

This section outlines the general steps for installing your Hikity car radio. Professional installation is recommended.

1. **Preparation:** Disconnect the vehicle's battery before starting any electrical work.
2. **Remove Old Unit:** Carefully remove the existing car radio and dashboard trim.
3. **Connect Wiring Harness:** Connect the provided wiring harness to the car's existing wiring. Ensure all connections are secure. The Canbus decoder should be integrated as per your vehicle's specific requirements.
4. **GPS Antenna:** Mount the GPS antenna in a location with a clear view of the sky, typically on the dashboard or under the windshield.
5. **Rear Camera Installation:** Install the AHD rear camera at the back of your vehicle. Connect the video cable to the unit's camera input and the power cable to the reverse light circuit.
6. **External Microphone:** Connect the external microphone and route it to a suitable location for clear voice pickup.
7. **USB Cables:** Connect the USB cables for external devices or wired CarPlay/Android Auto.
8. **Mounting:** Secure the Hikity car radio into the dashboard using the provided mounting brackets and screws.
9. **Test:** Reconnect the vehicle's battery and power on the unit to test all functions before fully reassembling the dashboard.

5. Operating Instructions

5.1. Basic Operation

- **Power On/Off:** Press and hold the power button (usually on the front panel) to turn the unit on or off.
- **Volume Control:** Use the physical volume buttons or the touchscreen controls to adjust audio levels.
- **Home Screen:** Tap the home icon to return to the main interface.
- **Split Screen:** Activate the split-screen function to run two applications simultaneously (e.g., navigation and music).

5.2. Wireless CarPlay & Android Auto

Connect your smartphone wirelessly or via USB for seamless integration.

1. **Wireless Connection:**
    - Enable Bluetooth and Wi-Fi on your smartphone.
    - On the car radio, go to the CarPlay or Android Auto application.
    - Pair your phone via Bluetooth. Once paired, the system will prompt you to enable Wi-Fi for the CarPlay/Android Auto connection.
2. **Wired Connection:**
    - Connect your smartphone to the car radio using a USB data cable.
    - Follow the on-screen prompts to initiate CarPlay or Android Auto.

Voice control via Siri or Google Assistant is supported for hands-free operation.

Figure 5.2.1: Wireless/Wired CarPlay and Android Auto. This image demonstrates the flexible connectivity options for integrating your smartphone with the car stereo.

5.3. GPS Navigation & Wi-Fi

The unit supports both online and offline navigation.

- **Online Maps:** Connect to Wi-Fi (via hotspot or built-in Wi-Fi) to use online navigation apps and receive real-time traffic updates.
- **Offline Maps:** Download map data for offline use to navigate without an internet connection.
- **Wi-Fi Connectivity:** Use Wi-Fi to browse the internet, stream videos, and download applications from the app store.

Figure 5.3.1: GPS Navigation and Wi-Fi. This image illustrates the navigation interface and the unit's wireless capabilities for internet access and app downloads.

5.4. DSP 32EQ, FM/RDS Radio & Bluetooth 5.0

- **DSP 32EQ:** Access the Digital Sound Processor (DSP) settings to fine-tune audio frequencies with 32 equalization bands for a personalized sound experience.
- **FM/RDS Radio:** Tune into FM radio stations. The RDS (Radio Data System) feature displays station information, song titles, and traffic announcements where available. Save up to 30 preset stations.
- **Bluetooth 5.0:**
    - Pair your phone via Bluetooth for hands-free calling.

- Stream music wirelessly from your smartphone or other Bluetooth-enabled devices.
- Download your phonebook for easy access to contacts.

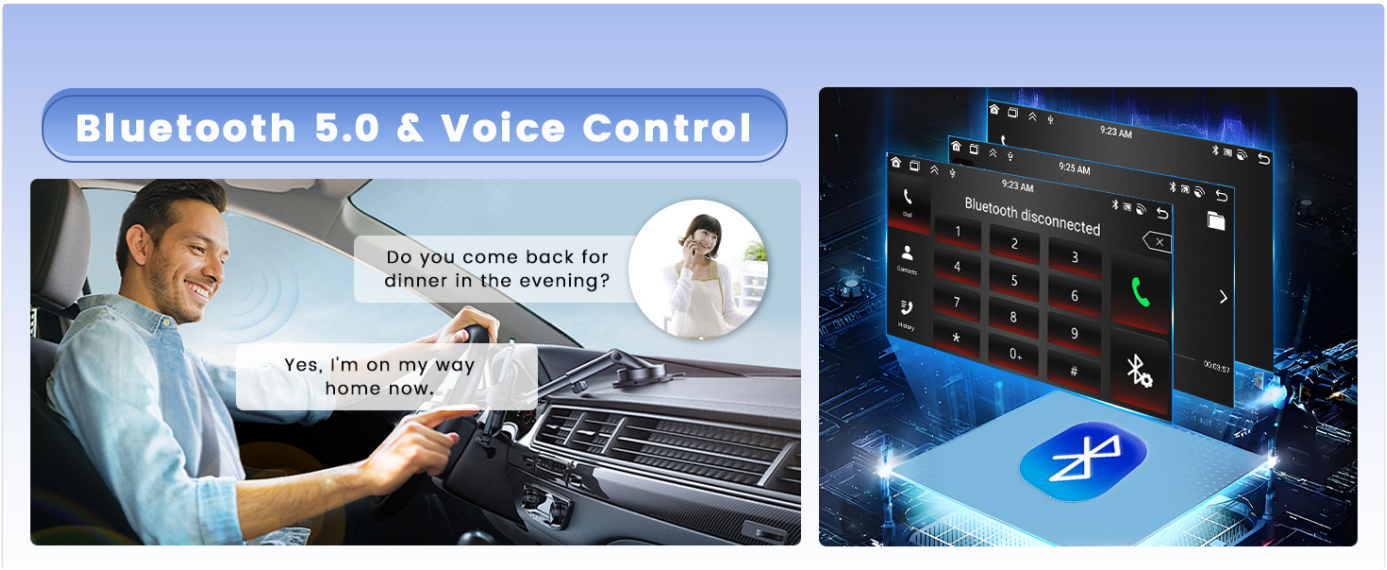

Figure 5.4.2: Bluetooth 5.0 and Voice Control. This image highlights the hands-free calling and voice command capabilities of the unit.

5.5. Steering Wheel Control (SWC)

The unit supports original steering wheel controls. To configure:

1. Go to **Settings** > **Factory Settings** (Password: 1234).
2. Select **Protocol settings**.
3. Choose the correct **Protocol Box Brand**. The brand name is usually printed on the surface of the Canbus protocol box.
4. Follow the on-screen instructions to map your steering wheel buttons to the desired functions.

Figure 5.5.1: Steering Wheel Control Configuration. This image illustrates the steps to set up and customize your vehicle's original steering wheel controls with the car stereo.

5.6. User Interface Customization

- **UI Themes:** Choose from 59 different user interface themes to personalize the look and feel of your car radio.
- **Home Screen Apps:** Long-press on any app icon on the home screen to rearrange or replace frequently used applications.

Figure 5.6.1: 59 UI Themes. This image showcases the wide range of customizable user interface themes available for the car stereo.

6. Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the screen and unit. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for software updates to ensure optimal performance and access to new features. Updates can usually be found on the manufacturer's website or through the unit's settings.
- **Temperature:** Avoid exposing the unit to extreme temperatures, which can affect its lifespan and performance.

7. Troubleshooting

If you encounter issues with your Hikity car radio, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on.	Loose power connection, blown fuse, vehicle battery disconnected.	Check power cables and fuse. Ensure vehicle battery is connected.
No sound.	Volume too low, speaker wires disconnected, incorrect audio source.	Increase volume. Check speaker connections. Select correct audio source.
CarPlay/Android Auto not connecting.	Bluetooth/Wi-Fi off on phone, incorrect pairing, faulty USB cable.	Ensure phone's Bluetooth/Wi-Fi is on. Re-pair device. Try a different USB cable. Restart both phone and car radio.
GPS signal weak or inaccurate.	GPS antenna obstructed or improperly installed.	Ensure GPS antenna has a clear view of the sky. Check antenna connection.
Steering wheel controls not working.	Incorrect Canbus protocol settings, Canbus not connected.	Verify Canbus connection. Reconfigure steering wheel controls in settings (Section 5.5).
Touchscreen unresponsive.	System freeze, temporary software glitch.	Restart the unit. If issue persists, perform a factory reset (consult support).

If the problem persists after trying these solutions, please contact Hikity customer support.

8. Specifications

Feature	Detail
Product Model Number	Hikity-A7878A3533H1MI2EU26
Brand	Hikity
Product Dimensions (D x W x H)	23.5 x 13.5 x 4.5 cm (9.25 x 5.31 x 1.77 inches)
Product Weight	1.43 kg (3.15 lbs)
Operating System	Android 15
CPU	8 Core
