# NAVIFORCE 5045S Women's Dual Display Watch Instruction Manual

Model: NF5045S

## 1. INTRODUCTION

---

Thank you for choosing the NAVIFORCE 5045S Women's Dual Display Watch. This timepiece combines classic analog aesthetics with modern digital functionality, offering a versatile and elegant accessory. This manual provides detailed instructions for setting up, operating, and maintaining your watch to ensure optimal performance and longevity.

## 2. PRODUCT FEATURES

- **Dual Display:** Combines traditional quartz analog movement with a digital LCD display for time, date, and other functions.
- **Durable Construction:** Features a robust zinc alloy case, hardened mineral glass, and a stainless steel strap for longevity.
- **Water Resistance:** 3ATM (30 meters) water resistance, suitable for daily splashes, rain, and hand washing. Not suitable for swimming or diving.
- **Luminous Display:** LED light for clear reading in low-light conditions.
- **Multifunctional:** Includes auto date, dual time, alarm, and stopwatch capabilities.
- **Elegant Design:** Unique heart-shaped dial elements and a secure double snap clasp.

### 3. SETUP AND INITIAL USE

### 3.1 Unboxing and Inspection

Upon receiving your NAVIFORCE 5045S watch, carefully remove it from its packaging. Inspect the watch for any visible damage. Ensure all protective films are removed from the watch face and strap.

### 3.2 Adjusting the Strap

The watch comes with a stainless steel strap. For a comfortable fit, the strap may need to be adjusted by removing or adding links. It is recommended to have this adjustment performed by a professional watchmaker or jeweler to prevent damage to the strap or clasp.

## 4. OPERATING INSTRUCTIONS

Your NAVIFORCE 5045S watch features both analog and digital time displays, each with its own setting mechanism. Refer to the diagram below for button identification.

# MULTI FUNCTIONAL HEART-SHAPED DIAL DUAL DISPLAY ELECTRONIC WOMEN'S WATCH

Image 4.1: Diagram illustrating the watch's features and button locations for adjustment.

## 4.1 Setting Analog Time

1. Pull out the crown (the knob on the right side of the watch case) to the outermost position.
2. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the desired time.
3. Once the time is set, push the crown back into its original position to start the analog movement.

## 4.2 Setting Digital Time and Date

The digital display is controlled by the push-buttons on the side of the watch. While specific button functions may vary slightly, the general procedure is as follows:

1. **Mode Button (Top Left/Right):** Press this button repeatedly to cycle through different digital modes: Time (Hour, Minute, Second), Date (Month, Day, Day of Week), Alarm, Stopwatch.
2. **Adjust Button (Bottom Left/Right):** Once in the desired setting mode (e.g., Time setting), press this button to adjust the flashing digit or value. Hold it down to quickly advance the numbers.
3. **Light Button (If present, typically Top Left):** Press this button to illuminate the digital display for a few seconds.
4. **Confirm/Exit:** After setting, press the Mode button again to move to the next setting item, or wait for a few

seconds for the watch to automatically exit the setting mode.

*Note: For precise instructions on setting specific digital functions like alarm or stopwatch, refer to the detailed instructions provided with your watch packaging or contact customer support.*

## 5. MAINTENANCE

---

### 5.1 Cleaning Your Watch

To maintain the appearance of your watch, wipe it regularly with a soft, dry cloth. For the stainless steel strap, a slightly damp cloth can be used, followed by immediate drying. Avoid using chemical cleaners, as they may damage the watch's finish.

### 5.2 Water Resistance

The NAVIFORCE 5045S watch is 3ATM (30 meters) water resistant. This means it is protected against accidental splashes, rain, and hand washing. It is **not** suitable for showering, bathing, swimming, diving, or any activities involving prolonged water immersion or high-pressure water exposure. Ensure the crown is fully pushed in before any contact with water.

### 5.3 Battery Replacement

The watch uses a standard watch battery. When the analog or digital display starts to dim or stop, it indicates that the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and maintain water resistance.

## 6. TROUBLESHOOTING

---

- **Analog hands not moving:** Check if the crown is fully pushed in. If it is, the battery may need replacement.
- **Digital display is blank or dim:** The digital battery may need replacement.
- **Incorrect time/date:** Follow the operating instructions to reset the analog and digital time/date.
- **Water inside the watch:** If water condensation appears inside the watch, stop using it immediately and take it to a professional for inspection. This may indicate a breach in water resistance.

If you encounter issues not listed here or if troubleshooting steps do not resolve the problem, please contact customer support.

## 7. SPECIFICATIONS

---

## HIGH-QUALITY STAINLESS STEEL WATCH STRAPS
