5.2. Wiring Connections

Connect the power cables, speaker wires, and other accessory cables according to the wiring diagram provided with your unit. Pay close attention to the CANbus box connection if your vehicle requires it for steering wheel controls or other vehicle data integration.

- **Power Connection:** Connect the main power harness to the vehicle's wiring. Ensure correct polarity.
- **GPS Antenna:** Mount the GPS antenna in a location with a clear view of the sky, typically on the dashboard or under the windshield.
- **USB Cables:** Route the USB cables to an accessible location, such as the glove compartment, for connecting USB devices.
- **External Microphone:** Connect the external microphone and position it near the driver for optimal call quality.
- **Rear View Camera:** Connect the rear view camera cable to the designated input on the main unit. Ensure the camera is properly mounted and powered.

6. SETUP AND INITIAL CONFIGURATION

6.1. First Power-On

After installation, turn on your vehicle's ignition. The car radio should power on automatically. Follow any on-screen prompts for initial setup, such as language selection.

6.2. Wi-Fi Connection

To access online features, connect the unit to a Wi-Fi network (e.g., your phone's hotspot).

1. Go to **Settings > Network & Internet > Wi-Fi**.
2. Select your desired Wi-Fi network and enter the password.

6.3. Bluetooth Pairing

Pair your mobile phone via Bluetooth for hands-free calling and music streaming.

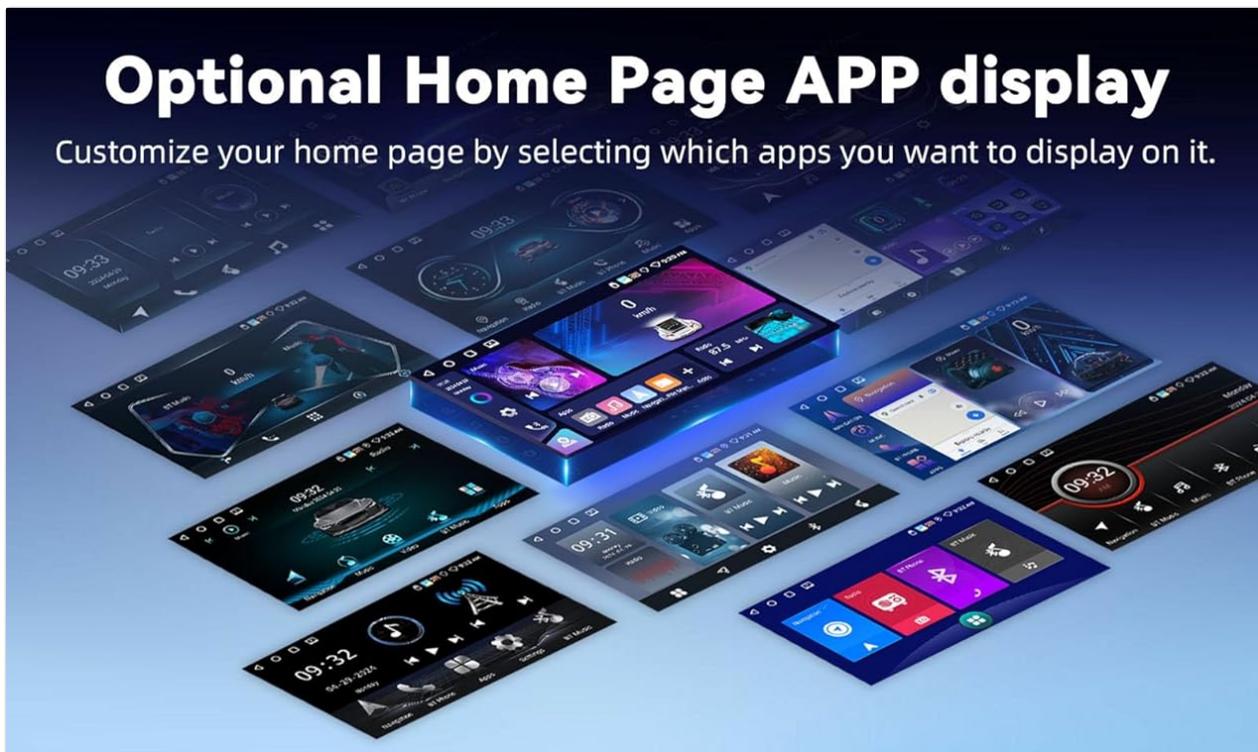

1. Go to **Settings > Connected devices > Bluetooth**.
2. Enable Bluetooth on the car radio and your phone.
3. Search for available devices on your phone and select the car radio's Bluetooth name (e.g., "SIXTOP CarBT").

4. Confirm the pairing code on both devices.

6.4. Steering Wheel Control (SWC) Learning

If your vehicle has steering wheel controls, you may need to configure them.

1. Go to **Settings > SWC Learning** (or similar).
2. Follow the on-screen instructions to assign functions to your steering wheel buttons. This typically involves pressing a button on the screen, then pressing the corresponding button on your steering wheel.

Optional Home Page APP display

Customize your home page by selecting which apps you want to display on it.

Split Screen Function

Use two apps at the same time on the device's screen

7.3. Bluetooth Functions

Utilize Bluetooth 5.0 for hands-free communication and audio streaming.

- **Hands-Free Calling:** Once paired, you can make and receive calls directly from the car radio screen. The external microphone ensures clear audio transmission.
- **Bluetooth Music:** Stream audio from your paired phone to the car radio's speakers.

Figure 7.3: Bluetooth 5.0 enables hands-free calling and music playback. The unit also features FM/RDS radio and a 32-band equalizer for audio customization.

7.4. GPS Navigation

The built-in GPS module supports both online and offline navigation. Download offline maps for areas with limited internet access.

- Launch the navigation app from the home screen.
- Enter your destination and follow the voice-guided directions.

7.5. FM/RDS Radio

Access local radio stations with clear reception.

- Open the Radio app.
- Use the scan function to find available stations or manually tune to a frequency.
- Save your favorite stations for quick access.

7.6. DSP and EQ Settings

Customize your audio experience with the advanced Digital Sound Processor (DSP) and 32-band Equalizer

(EQ).

- Access the EQ settings from the audio menu.
- Adjust individual frequency bands or select from preset sound modes.

7.7. Split Screen Function

Run two applications simultaneously on the screen for enhanced multitasking.

- Long-press the recent apps button or drag an app to one side of the screen to activate split-screen mode.
- Select a second app to fill the other half of the screen.

7.8. Rear View Camera

The unit automatically displays the rear view camera feed when the vehicle is in reverse gear, aiding in safer parking.

8. MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touchscreen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals.
- **Software Updates:** Periodically check for software updates via the system settings to ensure optimal performance and access to new features. Updates can typically be downloaded over Wi-Fi.
- **General Care:** Ensure all connections remain secure. Avoid placing heavy objects on the unit or exposing it to excessive vibrations.

9. TROUBLESHOOTING

If you encounter issues, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power	Incorrect wiring, blown fuse, vehicle power issue.	Check power connections and fuses. Consult an installer if necessary.
No Sound	Speaker wiring issue, volume too low, mute activated.	Check speaker connections. Increase volume. Ensure unit is not muted.
GPS Not Working	GPS antenna not connected or poorly positioned.	Ensure GPS antenna is securely connected and has a clear view of the sky.
Bluetooth Connection Issues	Bluetooth not enabled, incorrect pairing process.	Ensure Bluetooth is enabled on both devices. Re-attempt pairing.
Touchscreen Unresponsive	Temporary software glitch, screen damage.	Restart the unit. If issue persists, contact support.

For issues not covered here, please contact customer support for assistance.
