## MAINTENANCE

1. Cleaning the Projector

- **Lens:** Gently wipe the projector lens with a soft, lint-free cloth. Avoid abrasive materials or harsh chemicals.
- **Exterior:** Clean the exterior casing with a dry or slightly damp soft cloth.
- **Ventilation:** Ensure the ventilation openings are clear of dust and obstructions to prevent overheating.

2. Storage

When not in use for extended periods, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures. It is recommended to use the original packaging for storage to protect it from dust and impact.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No image projected	Power not connected, input source incorrect, lens cap on.	Check power connection, select correct input source (HDMI/USB), remove lens cap.
Image blurry	Out of focus, projector moved.	The projector features auto-focus; allow it a few seconds to adjust. If needed, gently move the projector slightly to trigger auto-focus.
Image skewed	Projector not aligned with screen.	The projector has 6D auto keystone correction; it should adjust automatically. Ensure the projector is on a stable surface.
No sound	Volume too low, external speaker not connected, incorrect audio output selected.	Increase volume, check Bluetooth connection for external speakers, ensure correct audio output is selected in settings.
Remote control not working	Batteries dead, obstruction between remote and projector.	Replace batteries, ensure clear line of sight to the projector's IR receiver.
