

## LISEN 2E7130

# LISEN Long Retractable Car Charger 4-in-1

MODEL: 2E7130

## Introduction

The LISEN Long Retractable Car Charger is designed to provide convenient and efficient charging for multiple devices in your vehicle. Featuring an industry-leading 47.24-inch retractable cable, this charger addresses the common issue of short charging cords in larger vehicles, allowing rear passengers to charge comfortably without messy extension cables. Its 4-in-1 design supports simultaneous charging of up to four devices, making it ideal for various users and scenarios.

Equipped with a 30W USB-C Power Delivery (PD) port and additional USB-A outputs, this 69W car charger ensures fast charging for a wide range of devices, including iPhone 17/16/15 series, Samsung Galaxy, and tablets. The military-grade shockproof structure ensures stable charging even on rough roads, while the 180° rotatable design offers flexible positioning within your vehicle.

## Product Features

- **Extended Retractable Cable:** Features a 47.24-inch (approximately 120 cm) retractable cable, providing ample reach for all passengers and reducing cable clutter.
- **4-in-1 Charging Capability:** Includes two integrated retractable cables (USB-C and Lightning) and two additional ports (USB-A and USB-C) for charging up to four devices simultaneously.
- **High-Speed Charging:** Delivers up to 69W total output, with a dedicated 30W USB-C PD port for rapid charging of compatible devices.
- **Durable and Stable Design:** Built with a military-grade shockproof structure to ensure stable connection and charging performance even on uneven terrain.
- **180° Rotatable Body:** The charger's head can rotate 180 degrees, allowing for flexible positioning to fit various car interiors and optimize space.
- **Universal Compatibility:** Supports a wide range of devices including iPhone 17/16/15/14/13/12/11 series, Samsung Galaxy S26/S25, Pixel, and other USB-C/Lightning compatible devices.

# 180° Rotatable

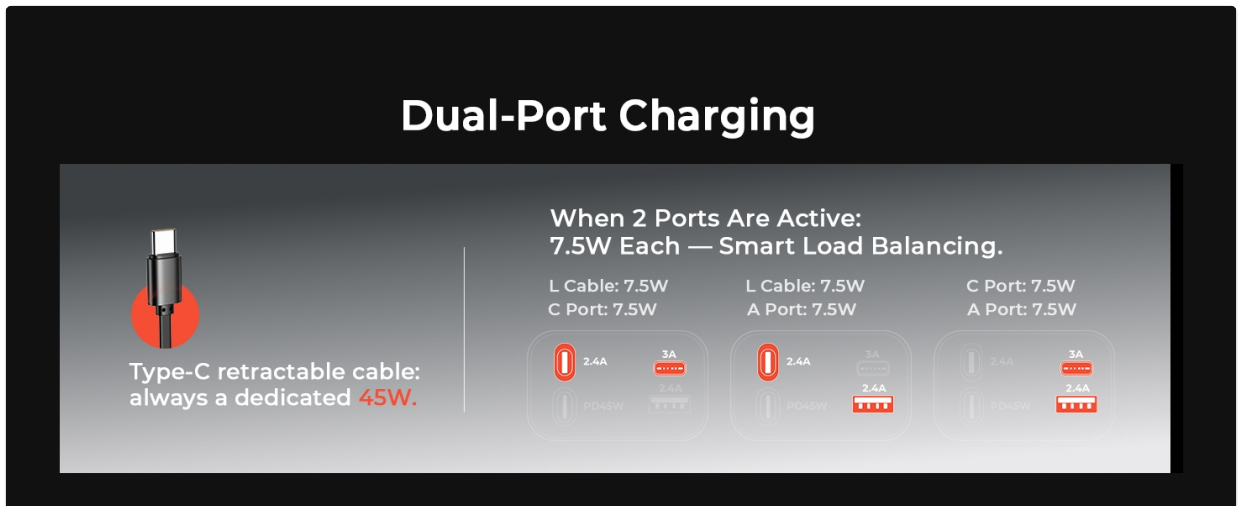

Reducing the amount of excess  
space occupied

The 180-degree rotatable design allows for flexible positioning in your vehicle.

## Setup

1. **Locate the 12V Cigarette Lighter Socket:** Identify the 12V cigarette lighter socket in your vehicle. This charger is designed exclusively for this type of power outlet.
2. **Insert the Charger:** Firmly insert the LISEN Car Charger into the 12V socket. Ensure it is securely seated.
3. **Adjust Position (Optional):** If needed, rotate the charger head up to 180 degrees to achieve the desired angle. Ensure approximately 3 inches of clearance around the port for smooth rotation and

cable retraction.

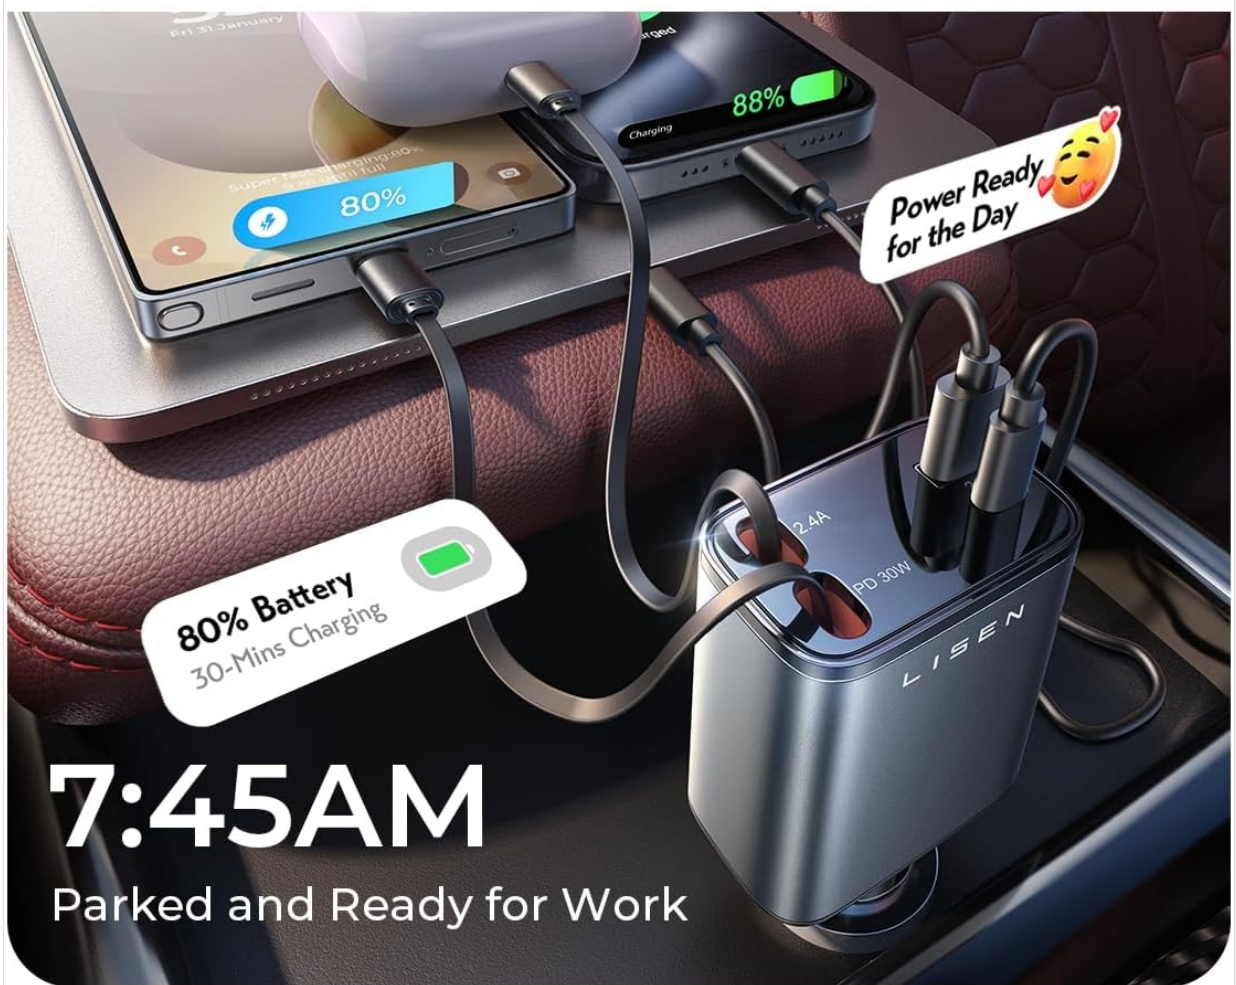

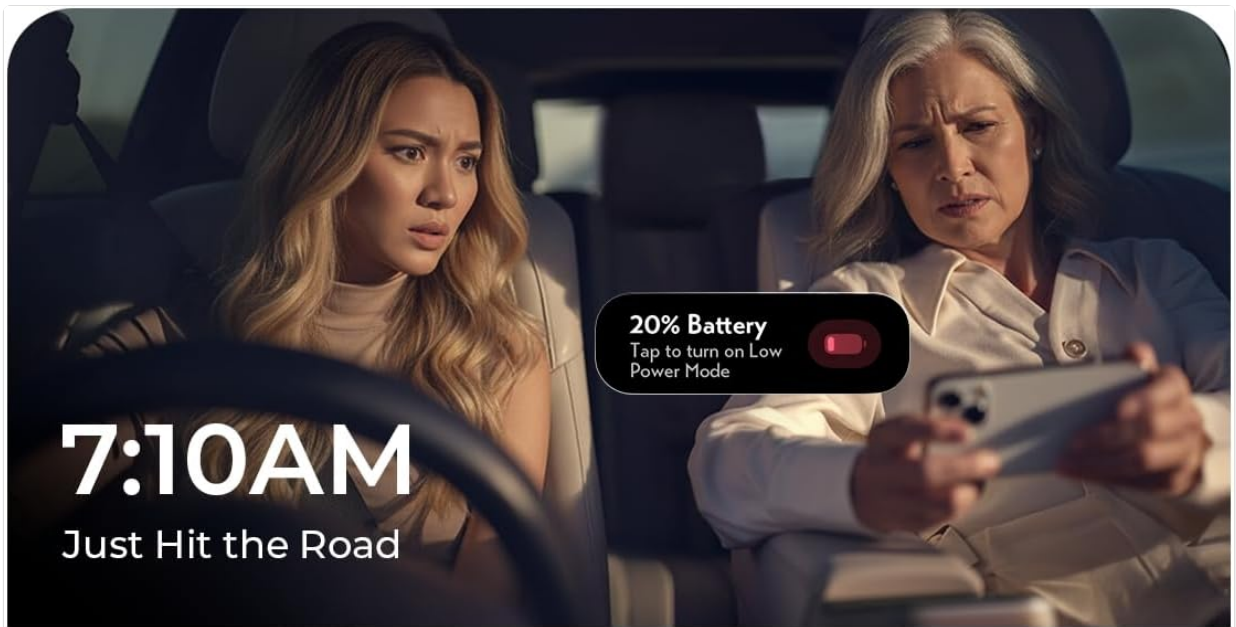

Ensure your vehicle has a standard 12V cigarette lighter socket and sufficient clearance for the charger.

Video demonstrating the insertion of the LISEN 4-in-1 Retractable Car Charger into a cigarette lighter socket.

## Operating Instructions

- Extend Cables:** Gently pull the desired retractable cable (USB-C or Lightning) to extend it. To lock it at a specific length, pull it out slightly further (about 1 cm) and then release.
- Retract Cables:** To retract a cable, gently pull it out slightly again, and it will automatically retract back into the charger.
- Connect Devices:** Plug your compatible device into the extended cable or one of the additional USB-A or USB-C ports.
- Simultaneous Charging:** The charger supports charging up to four devices concurrently. Note that power distribution may vary depending on the number of devices connected.

The charger can power multiple devices, such as phones and tablets, at the same time.

## Maintenance

To ensure the longevity and optimal performance of your LISEN Car Charger, follow these maintenance guidelines:

- **Cleaning:** Use a clean, soft cloth to gently wipe the car charger and its cords. Avoid using chemical cleaners or excessive moisture, as these can damage the product.

- **Storage:** When not in use, ensure all retractable cables are fully retracted to prevent tangling and damage. Store the charger in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handle with Care:** Avoid forcefully pulling or bending the retractable cables. Always follow the recommended retraction method to prevent internal mechanism damage.

## Troubleshooting

- **No Charging:** Ensure the charger is firmly inserted into the 12V cigarette lighter socket. Check that your vehicle's power outlet is functional. Verify that your device's charging cable (if using external ports) is properly connected and undamaged.
- **Slow Charging:** Confirm that your device and the charger are both compatible with fast charging protocols. If multiple devices are connected, the total power output is shared, which may reduce individual charging speeds.
- **Overheating:** It is normal for the car charger to experience slight heating during use. If it becomes excessively hot or shows unusual heat, immediately stop using it and check all connections. Ensure adequate ventilation around the charger.
- **Cable Retraction Issues:** If a cable does not retract smoothly, gently pull it out slightly further (about 1 cm) and then release it. Ensure no obstructions are preventing retraction.
- **Compatibility with CarPlay/Bluetooth/Data Transfer:** This car charger is designed ONLY for 12V cigarette lighter sockets and functions strictly as a charging power supply device. It does NOT support CarPlay, Bluetooth, or data transfer.

## Specifications

<b>Brand</b>	LISEN
<b>Model Number</b>	2E7130
<b>Connector Type</b>	Type L (Lightning), USB Type C, USB-A
<b>Special Feature</b>	Retractable Plug, 180° Rotatable Head
<b>Cable Length</b>	47.24 inches (approx. 120 cm)
<b>Input Voltage</b>	12 Volts
<b>Output Current</b>	15 Amps (Total)
<b>Output Voltage</b>	12 Volts
<b>Material</b>	Plastic
<b>Color</b>	Grey
