AutoSky Wireless CarPlay Adapter User Manual

Model: B0FCNYVL7Y

1. Product Overview

The AutoSky Wireless CarPlay Adapter transforms your vehicle's existing wired CarPlay system into a wireless experience. This device eliminates the need to physically connect your iPhone via a USB cable every time you drive, offering enhanced convenience and a seamless connection.

Image 1.1: The AutoSky Wireless CarPlay Adapter, shown with its included USB-A and USB-C extension cables. The adapter is compact and black, designed for discreet integration into your vehicle.

2. Compatibility

This adapter is designed for vehicles that come with **factory-installed wired CarPlay**. It does not add CarPlay functionality to vehicles that do not already possess it. It converts an existing wired CarPlay connection to a wireless one.

- **Requirement:** Your vehicle must have wired CarPlay or Android Auto already.
- **Verification:** If your car has a USB port and displays the Apple CarPlay screen when you plug in your iPhone, it is compatible.
- **Vehicle Models:** Compatible with over 600 vehicle models. Refer to the compatibility list provided in product images

or on the product page for specific model and year verification.

3. Setup Instructions

1. **Connect the Adapter:** Plug the AutoSky Wireless CarPlay Adapter into your vehicle's USB port that supports wired CarPlay. Use the appropriate USB-A or USB-C extension cable if needed.
2. **Vehicle System Initialization:** Wait for your vehicle's infotainment system to recognize the adapter. This may take a few moments.
3. **Bluetooth Pairing:** On your iPhone, go to Settings > Bluetooth and search for available devices. Select the

AutoSky adapter from the list to pair. Ensure your iPhone's Wi-Fi is also turned on (it does not need to be connected to a Wi-Fi network, but the Wi-Fi radio must be active for CarPlay to function wirelessly).

4. **Confirm Connection:** Once paired, your iPhone should automatically connect to the wireless CarPlay system. The CarPlay interface should appear on your vehicle's screen.

4. Operating Instructions

Once successfully set up, the adapter will automatically connect to your paired iPhone each time you start your vehicle, provided Bluetooth and Wi-Fi are enabled on your phone.

- **Automatic Connection:** After initial pairing, the adapter will connect automatically when you enter your vehicle.
- **Accessing Functions:** Utilize all standard CarPlay functions wirelessly, including:
  - Siri voice commands
  - Navigation (Maps)
  - Music playback and volume control
  - Making and receiving calls
  - Accessing messages
- **Performance:** The adapter utilizes a 5Ghz module for optimal connection speed and stability.

5. Maintenance

The AutoSky Wireless CarPlay Adapter requires minimal maintenance. Keep the device clean and free from dust and moisture.

- **Cleaning:** Wipe the adapter with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Storage:** If storing the device for an extended period, keep it in a cool, dry place away from direct sunlight.
- **Software Updates:** For the latest performance enhancements and bug fixes, regularly check for online software updates. Scan the QR code provided in the physical manual or on the product packaging after connecting the adapter to your iPhone to access the update portal.

6. Troubleshooting

If you encounter issues with your AutoSky Wireless CarPlay Adapter, try the following troubleshooting steps:

- **No Connection:**
  - Ensure your vehicle has factory-wired CarPlay. This adapter does not add CarPlay functionality.
  - Verify the adapter is securely plugged into the correct USB port in your vehicle.
  - On your iPhone, ensure Bluetooth is enabled and paired with the adapter. Also, ensure Wi-Fi is turned on (even if not connected to a network).
  - Restart your iPhone and/or your vehicle's infotainment system.
  - Forget the device in your iPhone's Bluetooth settings and re-pair.
- **Intermittent Connection/Lag:**
  - Ensure there are no other strong Wi-Fi or Bluetooth interference sources nearby.
  - Check for and install any available software updates for the adapter.
  - Try a different USB port in your vehicle if available.
- **Audio Issues:**

- Check the volume levels on both your iPhone and your vehicle's infotainment system.
- Ensure no other audio outputs are selected on your iPhone (e.g., headphones).
