ONAVOT SV18

ONAVOT SV18 Cordless Car Vacuum Cleaner User Manual

Model: SV18 | Brand: ONAVOT

INTRODUCTION

Thank you for choosing the ONAVOT SV18 Cordless Car Vacuum Cleaner. This powerful handheld vacuum is designed for efficient cleaning of vehicle interiors, homes, offices, and more. Featuring 35000PA suction, a 130W brushless motor, and dual detachable batteries for extended runtime, it provides a versatile cleaning solution. Please read this manual thoroughly before use to ensure proper operation and maintenance.

WHAT'S IN THE BOX?

The ONAVOT SV18 Cordless Car Vacuum Cleaner package includes the following components:

Image: Visual representation of all items included in the product box.

1. Main Unit

2. Bevel Mouth (Crevice Tool)
3. Wide Mouth (Flat Nozzle)
4. Flat Mouth (Another Flat Nozzle, possibly for different angles)
5. Small Brush
6. Big Brush
7. Static Brush (Pet Hair Nozzle)
8. Filter cleaning brush
9. 2 Filters (one pre-installed, one spare)
10. ETL-15W Charger
11. User Manual (this document)
12. Battery x2

SETUP

1. Charging the Batteries

Before first use, fully charge both detachable batteries. Connect the ETL-15W charger to a power outlet and then to the battery. The battery indicator lights will show the charging status. A full charge typically takes several hours.

2. Attaching the Battery

Slide a charged battery into the base of the vacuum cleaner handle until it clicks securely into place. Ensure it is firmly seated to prevent accidental detachment during operation.

3. Assembling the Dust Cup and Nozzle

Attach the transparent dust cup to the main unit. It is crucial to not only push the dust cup in but also to **twist it clockwise until you hear a "CLICK!"**. This ensures the internal latches engage and the dust cup is fully locked, preventing it from detaching during use.

MUST SEE! Solve Dust Cup Dropping Off Instantly

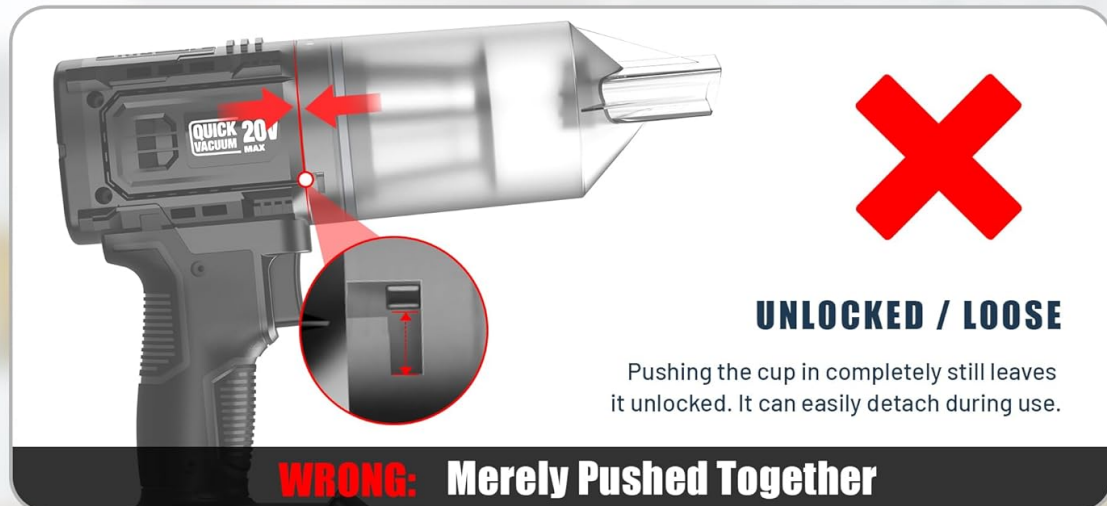

Image: Illustration showing the correct method to securely lock the dust cup by pushing and twisting until it clicks.

Select the appropriate nozzle or brush attachment for your cleaning task and firmly attach it to the front of the dust cup.

OPERATING INSTRUCTIONS

1. Powering On/Off

Press the power button located on the handle to turn the vacuum cleaner on. Press it again to turn the unit off.

2. Using Attachments

- **Bevel Mouth (Crevice Tool):** Ideal for reaching deep gaps, tight corners, and between car seats.
- **Wide Mouth / Flat Mouth:** Suitable for broader surfaces and general debris collection.
- **Small Brush / Big Brush:** Use for delicate surfaces, dashboards, vents, and upholstery.
- **Static Brush (Pet Hair Nozzle):** Designed to effectively pick up pet hair from carpets, upholstery, and fabric surfaces.

Essential Tools for Every Need!

MAINTENANCE

1. Emptying the Dust Cup

To maintain optimal suction, empty the 350ML dust cup regularly. Twist the dust cup counter-clockwise to detach it from the main unit, then empty its contents into a waste bin.

Image: Shows the process of emptying the dust cup and cleaning the HEPA filter under running water.

2. Cleaning the Filters

Regular filter cleaning is essential for maintaining suction power and extending the life of your vacuum. The vacuum features a high-density washable HEPA filter and a steel pre-filter.

1. **Step 1:** Turn off the vacuum cleaner for safety.
2. **Step 2:** Hold the dust cup firmly and rotate it counter-clockwise to unlock it, then pull it out from the main unit.
3. **Step 3:** Hook your fingers under the base and gently lift it to remove the HEPA filter assembly.
4. **Step 4:** Rotate the HEPA filter base counter-clockwise to separate the inner filter from the outer housing.
5. **Step 5:** Use the provided filter cleaning brush to remove loose debris from both filters.
6. **Step 6:** Rinse both the HEPA filter and the steel pre-filter under running water until clean.
7. **Step 7:** Allow all filter components to air dry completely before reassembling. Do not reassemble or use the filters while damp, as this may reduce efficiency or cause mold.

Tips: Clean filters every 1-3 months (or more frequently for heavy use). Replace the HEPA filter annually or if damaged.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Vacuum does not turn on.	Battery is not charged or not properly installed.	Ensure battery is fully charged and securely clicked into place.
Reduced suction power.	Dust cup is full, filters are clogged, or nozzle is blocked.	Empty dust cup, clean filters thoroughly, and check nozzle for obstructions.
Dust cup detaches during use.	Dust cup not securely locked.	Ensure dust cup is pushed in and twisted clockwise until it clicks.
Battery not charging.	Charger not connected properly or faulty.	Check charger connection to both outlet and battery. Try a different outlet.

SPECIFICATIONS

Brand: ONAVOT

Model Name: SV18

Suction Power: 35000PA

Motor: 130W Brushless Motor, 150,000 RPM

Dust Cup Capacity: 350 Milliliters

Batteries: 2 x Detachable 20000mAh Lithium-ion Batteries

Runtime: Up to 60 minutes (with both batteries)

Filter Type: HEPA Filter (Washable) and Steel Pre-filter

Item Weight: 1.76 lbs (main unit) / 4 Pounds (total package)

Power Source: Battery Powered

Special Features: Cordless, Detachable Battery, HEPA Filtration, Rechargeable, Washable Filter

Recommended Uses: Car, Home, Office, Pet Hair
