

RichBird B0FCYH6PBH

RichBird Solar Bird Bath with Fountain and Battery Backup User Manual

Model: B0FCYH6PBH | Brand: RichBird

1. INTRODUCTION

Thank you for choosing the RichBird Solar Bird Bath with Fountain and Battery Backup. This innovative 3-in-1 bird bath is designed to create a thriving backyard habitat by providing a consistent water source for birds, bees, and butterflies. Featuring a powerful solar panel and a built-in battery backup, it ensures a steady fountain spray even on overcast days or in the evening. Its versatile design allows for hanging, tabletop, or freestanding installation, making it suitable for various outdoor spaces.

This manual provides essential information for the safe and efficient setup, operation, and maintenance of your RichBird Solar Bird Bath. Please read it thoroughly before use and retain it for future reference.

2. WHAT'S IN THE BOX

Upon unboxing, please ensure all components listed below are present and undamaged:

- 1x Bird Bath Unit (10.8" diameter)
- 1x Hanging Chain Set
- 3x Unique Fountain Nozzles
- 1x Screw (for pole mounting)
- 3x Replacement Filter Sponges
- 1x Quick Guide/Instruction Manual

Product Specifications

3. SETUP

The RichBird Solar Bird Bath offers three versatile installation options:

3.1. Hanging Installation

1. Attach the provided hanging chains to the designated hooks on the bird bath unit.
2. Securely hang the bird bath from a sturdy branch, shepherd's hook, or other suitable outdoor fixture. Ensure it is placed in an area that receives ample direct sunlight for optimal solar charging.

Attract More Birds

Create Your Garden Oasis

3.2. Freestanding / Tabletop Installation

1. Place the bird bath directly on a flat, stable surface such as a patio table, deck, or a level spot in your garden.
2. Ensure the location receives sufficient direct sunlight.

Smart Solar with Battery Backup

- ☀ Works on Cloudy Days
- 🌙 Auto-Off at Night
- ♻ Moving water keeps it clean & fresh
- 🌿 Low-Water Protection

Image: The bird bath used in a freestanding tabletop configuration.

3.3. Pole Mounting Installation

1. Locate the screw hole on the underside of the bird bath base.
2. Using the provided screw, attach the bird bath securely to a compatible garden pole or stake.
3. Position the pole in an area with direct sunlight.

3 Versatile & Secure Ways to Use

Image: Visual representation of the three versatile ways to use the bird bath.

3.4. Initial Charging

Before first use, or if the fountain does not activate immediately, place the bird bath in direct sunlight for 2-3 hours to allow the internal battery to charge. The solar panel will begin charging the battery as soon as it is exposed to sunlight.

4. OPERATING INSTRUCTIONS

4.1. Filling with Water

Ensure the bird bath is placed on a stable surface. Carefully fill the basin with clean water, making sure the water level covers the pump completely but does not exceed the 'Max' fill line indicated inside the basin. The fountain will activate once the pump is submerged and the solar panel receives sufficient light or the battery has a charge.

4.2. Nozzle Selection

The bird bath comes with three unique nozzles to customize the water spray pattern:

- **Gentle Shower:** Ideal for small birds and a tranquil water effect.
- **Bubbler:** Creates a lovely gurgling sound and a gentle water movement.
- **Multi-Stream Sprinkler:** Provides a lively display to attract more attention.

To change a nozzle, gently pull off the currently installed nozzle from the pump's spout and push the desired nozzle firmly into place. Ensure it is seated correctly to prevent leaks and ensure proper water flow.

3 Fountains in 1 Customize Your Style

Gentle Shower
Perfect for small birds
& tranquil scenes.

Bubbler
Creates a lovely
gurgling sound.

Multi-Stream Sprinkler
A lively display to attract
more attention.

Easy Twist-On Nozzles, Change in Seconds!

4.3. Solar Power and Battery Backup

The integrated solar panel charges the internal battery during daylight hours. This battery stores excess energy to ensure a steady and continuous fountain operation, even during periods of cloud cover or after sunset. The system is designed for reliable, worry-free operation.

What You Get

Bird Bath x1

Quick Guide x1

Nozzles x3

Screw x1

Filter Sponges x3

Chain x1

4.4. Low-Water Auto Shut-Off

The pump is equipped with a smart low-water auto shut-off feature. If the water level in the basin drops too low, the pump will automatically stop operating to prevent dry running and extend its lifespan. Refill the bird bath with water to resume fountain operation.

5. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your bird bath.

5.1. Cleaning the Bird Bath

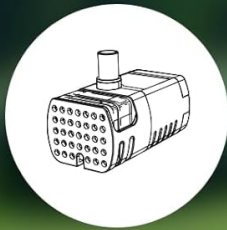

Periodically clean the bird bath basin to prevent algae buildup and keep the water fresh for wildlife. Use a soft brush or cloth and mild soap, then rinse thoroughly with clean water. Avoid harsh chemicals that could harm birds.

5.2. Filter Replacement

The pump includes a filtration system to block dirt, leaves, and debris. It is recommended to replace the filter sponges every 3 months, or more frequently if the water appears dirty or the fountain flow is reduced.

1. Carefully lift the top section of the bird bath to access the pump.
2. Locate the filter housing on the pump.
3. Remove the old filter sponge and discard it.
4. Insert a new filter sponge into the housing.
5. Reassemble the bird bath, ensuring the top section is securely in place.

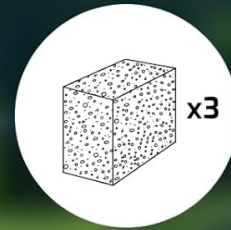

Effortless Maintenance for Lasting Performance

Advanced Built-in Filtration System

Effectively Blocks Dirt, Leaves, and Debris

Includes 3 Free Filter Sponges

Lift the Pump

Open & Remove Filter

Replace with New One

Regular cleaning extends pump life and keeps water sparkling clean!

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Fountain not working	Insufficient sunlight or battery charge.	Place in direct sunlight for 2-3 hours to charge the battery.
Fountain stops on cloudy days	While the battery backup ensures a steady flow, prolonged periods of heavy cloud cover may deplete the battery.	Ensure the bird bath receives adequate direct sunlight daily. The battery is designed to provide consistent flow, but not indefinite operation without solar input.

Problem	Possible Cause	Solution
Weak or inconsistent water flow	Low water level, clogged filter, or debris in pump.	Check water level and refill if necessary. Clean or replace the filter sponge. Inspect the pump for any obstructions.
Water not circulating	Pump is not fully submerged or is clogged.	Ensure water level is above the pump. Clean the pump and filter.

7. SPECIFICATIONS

- **Brand:** RichBird
- **Model:** B0FCYH6PBH
- **Color:** Forest Green
- **Material:** Durable, UV-resistant ABS Plastic
- **Power Source:** Solar Powered with Battery Backup
- **Special Feature:** Weather Resistant, Low-Water Auto Shut-Off
- **Water Capacity:** Approximately 2L / 67.63 oz
- **Waterproof Rating:** IPX6
