### 3. PRODUCT OVERVIEW

#### 3.1 Soundbar

The soundbar features 3 main channels for clear dialogue and integrates with the surround speakers to create a virtual surround sound field. It supports various input options including Optical, AUX, USB, and Bluetooth 5.3. The soundbar also has touch controls on its top panel for power, input selection, Bluetooth pairing, and volume adjustment.

#### 3.2 Subwoofer

The 4-inch wired subwoofer utilizes Ultima BassMX technology to enrich low-frequency output, providing deeper and more

resonant bass. It connects directly to the soundbar via a dedicated port.

The soundbar is positioned in front of the TV, the subwoofer to the side, and the two surround speakers are placed behind the sofa, creating a virtual surround sound field. The recommended room size is indicated as  $\leq 215$  sq ft.

## 4.2 Connections

The soundbar offers multiple connection options. Choose the one that best suits your TV and devices.

#### 4.2.1 Optical Connection (Preferred)

1. Insert one end of the Digital Optical Cable into your TV's Optical Out port.
2. Insert the other end into the OPTICAL port on the soundbar.
3. Press the 'OPT' button on the remote control to select the Optical input.

#### MIDRANGE

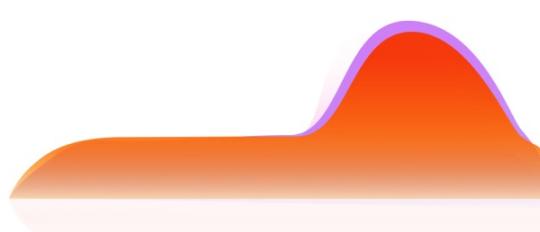

Experience clarities and details like never before, enhancing vocals and instruments.

### 4.3 Surround Speaker Pairing

The right rear speaker is pre-paired with the soundbar by the factory. If there is no sound from the surround speakers, you may need to re-pair them manually.

1. Connect the two surround speakers using the provided 6m surround cable.

2. Power the right surround speaker using its dedicated power adapter.
3. Ensure the soundbar and both surround speakers are within 1.5 ft of each other during manual pairing.
4. On the remote, press and hold the **SURROUND** button for 5 seconds until "SUR" blinks on the soundbar display.
5. On the right surround speaker, press and hold the **PAIR** button for 5 seconds until its indicator light flashes.
6. Once successfully paired, the indicator light on the right surround speaker will remain steady. The speakers can then be moved to their desired positions.

## 6. MAINTENANCE

To ensure the longevity and optimal performance of your ULTIMEA soundbar system, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the surfaces of the soundbar, subwoofer, and surround speakers. Avoid using liquid cleaners or abrasive materials, as they may damage the finish.
- **Ventilation:** Ensure adequate ventilation around all components to prevent overheating. Do not block any ventilation openings.
- **Power:** Disconnect the power adapters from the wall outlet if the system will not be used for an extended period.
- **Environment:** Keep the system away from direct sunlight, heat sources, excessive dust, moisture, and strong magnetic fields. The product is not waterproof.

## 7. TROUBLESHOOTING

If you encounter issues with your soundbar system, refer to the following common problems and solutions:

### 7.1 No Sound from Soundbar

If there is no sound from the soundbar while connected to your TV, please try to set the audio output format for both the TV and the video software to PCM.

#### 7.1.1 TV Audio Output Setting

Navigate to your TV's sound settings and ensure the digital audio output format is set to PCM. (Specific steps may vary by TV model; refer to your TV's manual.)

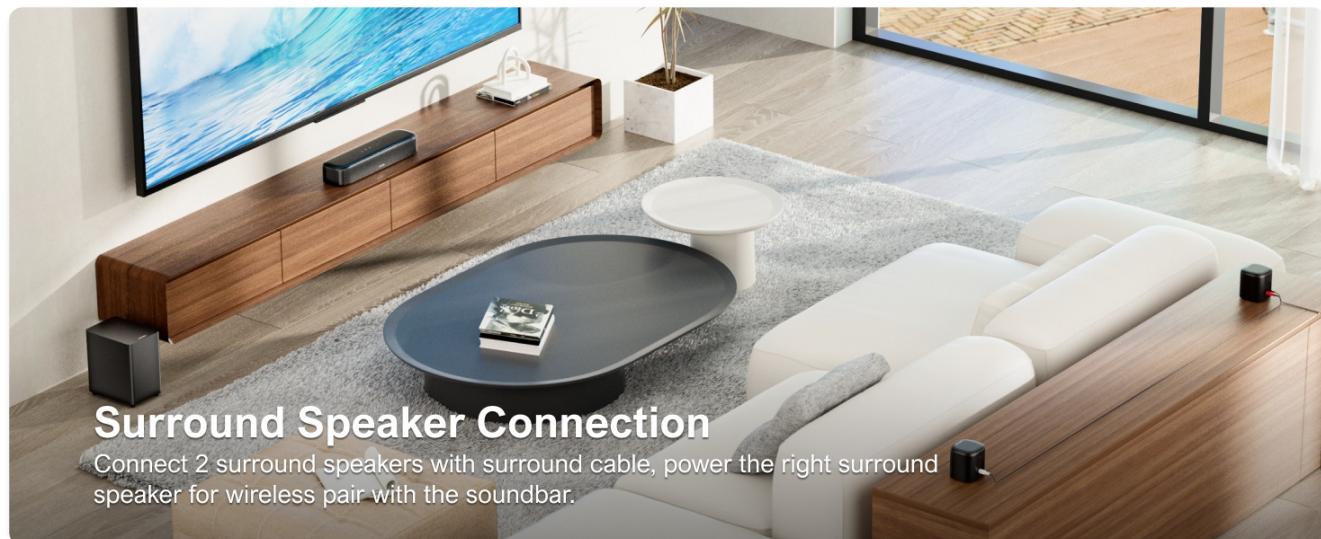

Image: A TV screen displaying the 'Expert Settings' menu, with 'Digital Output Audio Format' highlighted and set to 'PCM'. This illustrates how to configure the TV's audio output for compatibility with the soundbar.

#### 7.1.2 Video Software Audio Output Setting

For streaming services or media players, check the audio settings within the application (e.g., Netflix) and select an audio track that is compatible with PCM or stereo output. If your soundbar supports Dolby Atmos, setting your video software to Dolby Atmos will provide a better sound experience.

Video: Explanatory guide on TV and Netflix audio output formats. This video demonstrates how to adjust audio settings within video software like Netflix to ensure proper sound output to the soundbar.

### 7.2 Surround Speaker Pairing Failure

If the surround speakers fail to pair or lose connection, follow the manual re-pairing steps outlined in section 4.3. Ensure the speakers and soundbar are close during the pairing process.

Video: Methods for re-pairing when there is no sound from surround speakers. This video provides a visual guide on how to manually re-pair the surround speakers with the soundbar if the connection is lost or fails.
