KEY FEATURES

The Saaf Baby Monitor L-127 is equipped with several features designed to provide peace of mind:

- **5-inch LCD Monitor:** Large display for clear viewing.
- **Pan-Tilt-Zoom (PTZ) Camera:** Remotely control camera movement with 355° horizontal and 120° vertical rotation, plus digital zoom.
- **Two-Way Talk Function:** Communicate with your baby from another room.
- **VOX Mode (Voice Activation/Cry Detection):** Monitor activates automatically upon detecting sound.
- **Infrared Night Vision:** Clear black and white video in low-light conditions.
- **Built-in Lullabies:** Soothe your baby with pre-programmed melodies.
- **Adjustable Brightness:** Customize monitor screen brightness.
- **Temperature Monitoring:** Keep track of the room temperature.
- **Secure & Private Connection:** Utilizes 2.4 GHz FHSS technology for reliable and interference-free

communication.

- **Timer, Alarm & Clock:** Convenient time management features.
- **Flexible Mounting Stand:** For versatile camera placement.

SETUP GUIDE

Camera Placement

Place the camera in a location that provides a clear view of your baby's crib or play area. Ensure it is out of reach of children. The included flexible stand can be used for versatile mounting options, such as attaching it to a crib or shelf.

Power Connection

Connect the camera and monitor to their respective power adapters and plug them into a power outlet. The monitor

has a built-in rechargeable battery for portable use, but the camera requires continuous power.

Initial Pairing

The camera and monitor are typically pre-paired at the factory. If pairing is required, refer to the on-screen menu for instructions. Ensure both units are powered on and within range during the pairing process.

OPERATING YOUR MONITOR

Monitor Overview

Familiarize yourself with the buttons and display on the 5-inch monitor unit. The user guide provides a detailed diagram of the monitor's interface.

Camera Control (Pan, Tilt, Zoom)

Use the navigation buttons on the monitor to remotely pan the camera horizontally by 355° and tilt it vertically by 120°. The zoom function allows for closer inspection of your baby.

Two-Way Talk Function

Press and hold the talk button on the monitor to speak to your baby through the camera's speaker. Release the button to hear your baby. This feature allows you to soothe your baby with your voice from another room.

VOX Mode (Voice Activation)

In VOX mode, the monitor's screen will automatically activate when sound is detected from the baby's room, such as crying. This conserves battery life. You can adjust the microphone sensitivity to suit your environment.

Aanpasbare helderheid voor dag- of nachtzicht

Dagzicht groothoekweergave

Nachtzicht 4x zoom

Image illustrating the VOX mode and sleep mode. The top shows a baby sleeping with the camera in sleep mode (video only). The bottom shows a crying baby with the monitor displaying a cry alert in VOX mode.

Night Vision

The camera automatically switches to infrared night vision in low-light conditions, providing a clear black and white image of your baby without disturbing their sleep.

Praatfunctie

Laat je baby weten dat je er altijd bent

Hi, vriend

Mama

Built-in Lullabies

Select from a variety of soothing lullabies to play through the camera unit to help your baby relax and fall asleep. The lullabies can be controlled directly from the monitor.

Adjustable Brightness

Adjust the brightness of the monitor screen to your preference for comfortable viewing in various lighting conditions, both day and night.

Stable Connection

The monitor uses 2.4 GHz FHSS technology for a consistent and reliable connection with reduced interference, ensuring you always have a clear view and sound from your baby's room.

CARE AND MAINTENANCE

Cleaning

Wipe the camera and monitor surfaces with a soft, dry cloth. Do not use abrasive cleaners, solvents, or chemical cleaning agents, as these can damage the components.

Battery Care

To prolong the monitor's built-in battery life, avoid fully discharging it frequently. Charge it regularly, especially if it will not be used for an extended period. Store the monitor in a cool, dry place.

TROUBLESHOOTING

No Signal / Poor Connection

- Ensure both the camera and monitor are powered on and within range.
- Reduce obstacles between the camera and monitor, such as thick walls or other electronic devices that may cause interference.
- Recharge the monitor battery if it is low.
- Try re-pairing the camera and monitor if the connection is lost completely.

No Sound / Poor Sound Quality

- Check the volume settings on the monitor and increase if necessary.
- Ensure the microphone on the camera is not obstructed.
- Move the monitor closer to the camera to improve signal strength.

Image Not Clear

- Clean the camera lens with a soft, dry cloth.
- Adjust the camera's position to ensure optimal lighting.
- Ensure night vision is active in dark conditions; the image will be black and white.
