Jeeber 2K/3MP Baby Monitor Camera VB805Pro User Manual

Model: VB805Pro

INTRODUCTION

Thank you for choosing the Jeeber 2K/3MP Baby Monitor Camera VB805Pro. This device is designed to provide reliable and comprehensive monitoring of your child, ensuring peace of mind. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to help you maximize your product's functionality.

WHAT'S IN THE Box

Please check the package contents upon unboxing:

- Monitor x 1
- Data Cable x 1
- Mounting Bracket x 1
- Camera x 1
- Instruction Manual x 1

PRODUCT OVERVIEW

The Jeeber VB805Pro Baby Monitor offers advanced features for comprehensive baby surveillance.

Key Features

- **2K/3MP High-Resolution Camera:** Provides clear and detailed video.
- **5-inch IPS Display:** Offers wide viewing angles and vibrant colors.
- **Dual Control (App & Monitor):** Monitor your baby via the dedicated app or the portable monitor.
- **360-degree Pan/Tilt/Zoom (PTZ):** Remotely adjust the camera view to cover the entire room.
- **VOX (Voice Operated Exchange) Mode:** Activates the screen and alerts only when sound is detected, conserving energy.
- **HDR Night Vision with Invisible Infrared:** Provides clear night vision without visible red light, ensuring undisturbed sleep for your baby.
- **Cry Detection & Temperature Monitoring:** Alerts you to baby's cries and monitors room temperature with high accuracy.
- **Virtual Barrier Function:** Set customizable alert zones to be notified if your baby crosses a defined area.

- **Long Battery Life:** Up to 12 hours of operation with a 3000 mAh battery.
- **Physical On/Off Switch:** Ensures complete privacy and control.
- **Multi-User Sharing:** Share access to the camera feed with up to 8 devices.
- **500m Transmission Range:** Provides stable connection throughout your home.
- **Soothing Lullabies:** Built-in lullabies to help soothe your baby to sleep.

Components

Familiarize yourself with the main components of your baby monitor system.

Image: The Jeeber Baby Monitor system, showing the camera unit, the 5-inch IPS display monitor, and a smartphone displaying the app interface. The camera features 135° vertical and 330° horizontal rotation capabilities.

- **Camera Unit:** The primary surveillance device, equipped with a lens, infrared LEDs for night vision, and a physical on/off switch.
- **Monitor Unit:** Features a 5-inch IPS screen, control buttons (OK, navigation, menu, talk, zoom), and a built-in speaker.
- **Power Adapters:** For powering both the camera and monitor.
- **Mounting Bracket:** For optional wall or crib attachment.

SETUP

1. Powering On

1. Connect the camera to a power outlet using the provided power adapter. Ensure the camera's physical switch is in the "On" position.

2. Connect the monitor to a power outlet using its dedicated power adapter. The monitor will automatically power on.
3. The camera and monitor are pre-paired at the factory. The video feed should appear on the monitor automatically.

2. Camera Placement

Place the camera in a location that provides a clear, unobstructed view of your baby. Ensure it is out of reach of children and pets. The included mounting bracket can be used for wall or crib attachment.

3. App Connection (Optional)

For remote monitoring via smartphone, download the "FeelBaby" app (or similar, based on product documentation) from your device's app store. Follow the in-app instructions to connect your camera to your Wi-Fi network (2.4GHz only) and pair it with your smartphone.

Image: Illustrates the dual monitoring capability of the Jeeber baby monitor, showing the parent unit displaying the baby's room while a user simultaneously views the feed on a smartphone app, emphasizing flexibility for monitoring from anywhere.

OPERATING INSTRUCTIONS

Monitor Controls

- **Navigation Buttons:** Use the directional buttons to move the camera lens (Pan/Tilt) or navigate menus.
- **OK Button:** Confirm selections or activate functions.
- **Talk Button:** Press and hold to speak to your baby through the camera's speaker.
- **Zoom Button:** Magnify the image on the screen.
- **Menu Button:** Access settings, lullabies, VOX mode, and other features.

Key Functions

Pan, Tilt, and Zoom (PTZ)

Use the navigation buttons on the monitor or the controls within the smartphone app to remotely adjust the camera's viewing angle. The camera supports 330° horizontal pan and 135° vertical tilt.

Image: A visual representation of the camera's 360-degree panoramic and tilt capabilities, showing how the camera can cover a wide area, with the monitor displaying the live feed.

VOX Mode (Sound Detection)

Activate VOX mode through the monitor's menu. In this mode, the monitor's screen will remain off to save power and will only activate when a sound above a set threshold is detected from the baby's room. This feature helps reduce monitoring fatigue.

Détection de son VOX

S'active uniquement lorsqu'un son est détecté, ce qui permet d'économiser de l'énergie et de rester toujours en ligne.

Image: Depicts the VOX sound detection feature, showing the monitor screen activating with a bell icon when the baby makes a sound, while parents are engaged in another activity, highlighting energy saving and continuous monitoring.

Night Vision

The camera automatically switches to HDR night vision in low-light conditions. It uses 940nm invisible infrared light, which does not emit a visible red glow, ensuring your baby's sleep is not disturbed.

Aucune lumière infrarouge visible

Pas de lumière rouge, totalement sans danger pour les yeux de votre bébé.

Image: Compares the Jeeber baby monitor's invisible infrared night vision (left, no red light) with a conventional baby monitor (right, visible red light), demonstrating how the Jeeber system avoids disturbing the baby's sleep.

Temperature Monitoring

The monitor displays the ambient temperature of the baby's room, detected by a sensitive external sensor on the camera. This provides more accurate readings (accuracy of 0.5°C) compared to internal sensors.

Capteur externe sensible

Par rapport au capteur de température intégré,
la détection de température est plus précise,
bébé dort plus paisiblement !

Plage de détection : $\pm 50^{\circ}\text{C}$

Plage d'erreur : $\pm 0,5^{\circ}\text{C}$

Image: Highlights the external sensitive temperature sensor of the Jeeber baby monitor camera, showing a precise temperature reading of 25.1°C , indicating its accuracy for monitoring the baby's environment.

Virtual Barrier / Customizable Alert Zones

Through the app, you can define specific virtual boundaries or alert zones within the camera's view. If your baby moves outside these zones, you will receive an instant notification.

Clôture de sécurité virtuelle

Restez informé en temps réel de la sécurité de votre bébé.

Image: Demonstrates the virtual fence security feature, showing a baby within a playpen with a green virtual boundary box around it, and a notification indicating an alert if the boundary is crossed.

Lullabies

Access the lullaby function through the monitor's menu to play soothing melodies to help your baby fall asleep.

Berceuses apaisantes

De douces berceuses apaisent votre adorable bébé et favorisent un repos sain.

Image: Shows a baby sleeping peacefully in a crib with musical notes floating, illustrating the soothing lullaby feature of the Jeeber baby monitor.

MAINTENANCE

- Cleaning:** Use a soft, dry cloth to clean the camera lens and monitor screen. Do not use liquid cleaners or aerosols.
- Storage:** When not in use for extended periods, store the device in a cool, dry place, away from direct sunlight and extreme temperatures.
- Battery Care:** For optimal battery life, avoid fully discharging the monitor's battery frequently. Charge it regularly.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No image on monitor.	Camera or monitor not powered on; out of range; battery low.	Ensure both units are plugged in and powered on. Move units closer. Charge monitor battery.
Poor image quality.	Lens dirty; insufficient lighting; camera too far.	Clean the camera lens. Ensure adequate lighting or rely on night vision. Move camera closer.
No sound or poor sound quality.	Volume too low; microphone/speaker obstructed; out of range.	Increase monitor volume. Check for obstructions. Move units closer.
App connection issues.	Incorrect Wi-Fi password; 5GHz Wi-Fi network; poor Wi-Fi signal.	Ensure correct 2.4GHz Wi-Fi. Check Wi-Fi signal strength. Restart router and camera.
VOX mode not activating.	VOX sensitivity set too low.	Adjust VOX sensitivity settings in the monitor menu to a higher level.
