5. ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and can typically be completed by two people in under an hour. Follow these steps carefully:

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (e.g., carpet or blanket) to prevent scratching. Refer to the included parts list in your package to identify each piece.
2. **Assemble Bed Frame Sides:** Connect the side rails to the headboard and footboard using the provided bolts and tools. Ensure all connections are snug but do not overtighten until the frame is fully assembled.
3. **Attach Headboard:** Secure the slatted headboard to the main frame. The headboard features a sophisticated design with rounded edges and a hollow structure.

4. **Install Center Support and Slats:** Place the center support beam(s) and attach them to the frame. Then, lay the wooden slats across the frame and secure them according to the instructions. The robust lath system provides strong support without a box spring.
5. **Mount Gas Lift Mechanism:** Carefully attach the gas lift pistons and associated hardware to the bed frame and the mattress platform. Follow the specific diagrams in your package for correct orientation and attachment points.

6. **Final Tightening:** Once all components are in place, go back and securely tighten all bolts and screws. Do not overtighten, as this can strip threads or damage wood.

6. OPERATING THE LIFT-UP STORAGE

The LUMISOL bed features an effortless gas lift system for easy access to under-bed storage. To operate:

1. **To Lift:** Stand at the foot or side of the bed. Grasp the edge of the mattress platform (or a designated handle if present) and gently lift upwards. The gas pistons will assist in raising the platform smoothly and holding it in the open position.
2. **To Lower:** Gently pull the mattress platform downwards. The gas pistons will provide resistance, allowing for a controlled and slow descent. Ensure no objects or body parts are in the way before fully lowering.

The under-bed area is ideal for storing luggage, storage bins, seasonal clothing, or other items, helping to keep your room clutter-free.

7. MAINTENANCE AND CARE

Proper care will ensure the longevity and appearance of your LUMISOL bed frame.

- **Cleaning:** Wipe the wood surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the finish.
- **Fasteners:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Retighten if necessary to prevent wobbling or noise.
- **Gas Lift System:** The gas lift pistons are designed for long-term use and typically require no maintenance. Do not attempt to lubricate or disassemble them. If the lift mechanism becomes stiff or noisy, contact customer support.
- **Sunlight and Heat:** Avoid placing the bed in direct sunlight or near heat sources, as this can cause the wood to

fade or warp over time.

8. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the following common problems and solutions:

- **Bed Frame is Wobbly:**
 - Ensure all assembly bolts and screws are securely tightened.
 - Verify the bed is on a flat, level surface. Use furniture pads if necessary to stabilize.
- **Lift Mechanism is Stiff or Not Holding:**
 - Ensure the mattress is correctly positioned and not obstructing the mechanism.
 - Check that the gas lift pistons are correctly installed according to the assembly instructions.
 - If the issue persists, the gas pistons may need replacement. Contact customer support.
- **Squeaking Noises:**
 - Re-tighten all bolts and screws.
 - Ensure slats are properly seated and not rubbing against the frame.
 - Consider placing felt pads between contact points if a specific area is identified as the source of noise.

For issues not covered here, or if troubleshooting steps do not resolve the problem, please contact LUMISOL customer support.
