MAINTENANCE AND CARE

Regular maintenance ensures the longevity and safety of your Heybly Cat Tree:

- **Cleaning:** Use a lint roller or a soft brush to remove loose fur and debris from the plush surfaces. For minor stains, gently spot clean with a damp cloth and mild detergent, then air dry. The removable cushion on the top platform can be cleaned separately.
- **Sisal Posts:** Periodically inspect the sisal scratching posts for wear and tear. While durable, heavily used posts may eventually need replacement.
- **Stability Check:** Regularly check all screws and connections to ensure they remain tight. Re-tighten if necessary to maintain the tree's stability.
- **Environment:** As specified, keep the cat tree in a dry indoor location to prevent damage to materials.

TROUBLESHOOTING

If you encounter any issues with your Heybly Cat Tree, consider the following:

- **Instability:** If the tree wobbles, ensure all screws are fully tightened. Verify that the anti-tip device is

correctly installed and secured to a wall stud.

- **Cat Not Using Tree:** Cats may need time to adjust. Try placing familiar blankets or toys on the platforms. Using catnip can also encourage exploration and use of the scratching posts.
- **Loose Parts:** If any parts become loose, immediately re-tighten them. If a part is damaged, contact customer support for assistance.
