TROUBLESHOOTING

If you encounter any issues with your lingerie, consider the following common solutions:

Problem	Possible Cause	Solution
Bra feels too tight or uncomfortable.	Incorrect size or band adjustment.	Check the sizing chart. Ensure the band is not too tight and straps are adjusted correctly. Consider a larger size if measurements are borderline.
Cups do not provide adequate coverage or support.	Incorrect cup size or bra positioning.	Ensure breasts are fully scooped into the cups. Verify cup size against the sizing chart.
Straps dig into shoulders.	Straps are too tight or band is not providing enough support.	Loosen shoulder straps. Ensure the bra band is snug and level across your back, as the band provides most of the support.
