# Bellemave Twin Over Futon Bunk Bed

MODEL: FST00186-T-CB1

### Important Safety Information

Please read and understand all instructions before assembling and using this product. Failure to follow these instructions may result in serious injury.

- **Assembly:** Always assemble according to the provided instructions to ensure stability. Two adults are recommended for assembly.
- **Weight Limits:** Do not exceed the weight limit of **250 lb** on the top bunk bed. The futon (lower bed) has a weight limit of **350 lb**.
- **Guardrails:** The top bunk is equipped with a full-length guardrail. Ensure it is properly installed and secured before use.
- **Ladder:** Use the integrated ladder for access to the top bunk. Ensure the ladder is stable before climbing.
- **Child Safety:** This product includes a childproof mechanism. Supervise children around the bunk bed.
- **Pinch Points:** Be cautious around the metal frame during assembly and operation to avoid injury from sharp edges or pinch points.
- **Mattress Compatibility:** Use only mattresses compatible with Twin (upper) and Full (lower futon) sizes.

Keep these instructions for future reference.

## Setup and Assembly Instructions

Assembly is required for this product. It is recommended that two adults perform the assembly to ensure safety and ease of construction. Please follow the step-by-step diagrams provided in your physical

instruction manual for detailed guidance.

## General Assembly Steps:

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (e.g., carpet or blanket) to prevent scratches. Compare all parts with the parts list in your manual.
2. **Assemble Base Frame:** Begin by connecting the main support beams for the lower futon and the vertical posts. Do not fully tighten bolts until instructed.
3. **Install Futon Mechanism:** Attach the futon frame and its convertible mechanism to the lower section of the bunk bed. Ensure smooth operation.
4. **Assemble Upper Bunk:** Construct the frame for the upper twin bunk.
5. **Attach Upper Bunk to Posts:** Carefully lift and secure the upper bunk frame to the vertical posts. This step requires two people.
6. **Install Guardrails:** Securely attach the full-length guardrails to the upper bunk.
7. **Attach Ladder:** Mount the integrated ladder to the designated attachment points.
8. **Install Slats:** Place and secure the slats for both the upper bunk and the futon.
9. **Final Tightening:** Once all components are in place and aligned, systematically tighten all bolts and screws. Do not overtighten.

*Note: Specific tools (e.g., Allen wrench) are typically included in the hardware pack. Additional tools like a Phillips head screwdriver may be required.*

## Operating Instructions

### Using the Futon (Lower Bunk)

The lower futon can be easily converted between a sofa and a full-sized bed.

1. **To Convert from Sofa to Bed:** Gently lift the front edge of the futon seat until the backrest releases from its upright position. Lower the backrest until it lies flat, forming a bed surface. Ensure the mechanism locks into place.
2. **To Convert from Bed to Sofa:** Lift the futon frame from the center of the bed position. The backrest will begin to rise. Continue lifting until the backrest locks into the upright sofa position. Ensure the mechanism is fully engaged.

## Using the Ladder

The integrated ladder provides access to the top bunk.

- Always face the ladder when climbing up or down.
- Ensure hands and feet are clean and dry to prevent slipping.
- Do not use the ladder as a play device.

## Maintenance

Regular maintenance will help prolong the life and safety of your bunk bed.

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Hardware Check:** Periodically check all bolts, screws, and connections to ensure they are tight. Retighten if necessary, but do not overtighten.
- **Futon Mechanism:** Ensure the futon conversion mechanism operates smoothly. If it becomes stiff, a small amount of silicone-based lubricant can be applied to moving parts (avoiding contact with fabric).

- **Slats:** Inspect bed slats for any signs of damage or bending. Replace any damaged slats immediately to maintain mattress support.

---

## Troubleshooting

Problem	Possible Cause	Solution
Bed feels wobbly or unstable	Loose hardware	Check and tighten all bolts and screws.
Squeaking noises	Loose connections or friction between metal parts	Tighten all hardware. Apply a small amount of silicone lubricant to connection points if squeaking persists.
Futon mechanism is stiff or difficult to operate	Lack of lubrication or misalignment	Ensure no obstructions. Apply silicone lubricant to moving parts of the mechanism.
Ladder feels loose	Ladder attachment bolts are loose	Tighten the bolts securing the ladder to the bunk bed frame.
