Dargahou 4K Trail Camera

Dargahou 4K 48MP WiFi Trail Camera User Manual

Model: 4K Trail Camera

INTRODUCTION

This manual provides detailed instructions for setting up, operating, and maintaining your Dargahou 4K 48MP WiFi Trail Camera. Designed for outdoor wildlife monitoring and security, this camera captures high-resolution images and videos with advanced features like low-glow night vision and app control. Please read this manual thoroughly before use to ensure optimal performance and longevity of your device.

KEY FEATURES

- **Wi-Fi and App Control:** Connect to the camera via the free 'Trail Cam Go' mobile app within a 33-foot range to preview images and videos in real-time and adjust settings. Note: This Wi-Fi is for app connection only and does not support home Wi-Fi networks.
- **Ultra-Sharp Resolution:** Records HD 4K audio video and captures 48-megapixel still images, providing clear and detailed wildlife footage.
- **Low Glow Night Vision:** Equipped with upgraded infrared LEDs for super clear night vision, allowing the camera to capture moments in complete darkness without disturbing wildlife.
- **130-Degree Wide Angle Lens:** Offers a broad field of view to monitor a wide range of fauna and cover larger areas.

- **Fast Trigger Speed:** Features a rapid 0.05-second trigger speed to ensure no movement is missed.
- **Easy Operation:** Includes a built-in 2-inch color display for convenient menu navigation, camera setup, and image viewing without needing to download files.
- **Durable and Waterproof:** IP66 rated for water resistance, designed to withstand various outdoor weather conditions.

PACKAGE CONTENTS

The Dargahou 4K 48MP WiFi Trail Camera package includes the following items:

- Dargahou 4K 48MP WiFi Trail Camera
- Mounting Strap
- USB Cable
- Instruction Manual
- 32GB SD Card (may vary by package)

SETUP GUIDE

1. **Insert Memory Card:** Open the camera's battery case and insert a formatted SD card (up to 32GB recommended). Ensure the card is correctly oriented.
2. **Install Batteries:** Insert four or eight 1.5V AA alkaline batteries into the designated slots. Ensure correct polarity.
3. **Power On and Test:** Move the power slider from 'OFF' to 'TEST'. The camera's screen will activate.
4. **Format SD Card:** If using the SD card for the first time, navigate through the menu to format the SD card. This ensures compatibility and optimal performance.

- 5. Set Parameters:** Use the built-in 2-inch color display and navigation buttons (MENU, MODE, UP, DOWN, OK, SHOT) to set desired parameters such as photo/video mode, resolution, trigger interval, and time/date.
- 6. Activate Camera:** Move the power slider from 'TEST' to 'ON'. The screen will turn off after approximately 5 seconds, and the camera will begin recording based on your settings.

OPERATING INSTRUCTIONS

App Control and Wi-Fi Connectivity

The Dargahou Trail Camera features built-in Wi-Fi and Bluetooth for convenient control via your smartphone. Download the free 'Trail Cam Go' app from your device's app store. Once installed, enable Bluetooth on your phone and open the app to connect to the camera. This allows you to:

- Preview images and videos in real-time.
- Download captured media directly to your phone.
- Adjust camera settings remotely.

The Wi-Fi connection is active within a 33-foot range. Please note that this Wi-Fi is for direct camera-to-phone connection and does not support connection to a home Wi-Fi network.

the app remote control and Bluetooth connection feature.

Capturing Images and Videos

The camera automatically captures 4K video and 48MP photos when motion is detected. The 0.05-second trigger speed ensures quick response to movement. The 130-degree wide-angle lens provides extensive coverage of the monitored area.

4K Video & 48MP Photos

Providing a more clear image resolution

Image: An illustration demonstrating the camera's 4K video and 48MP photo capabilities, showing clear images of a kingfisher in motion and two kingfishers perched on a branch.

Night Vision Operation

The camera's low-glow infrared LEDs activate automatically in low-light conditions, providing clear black-and-white night vision footage up to 98 feet (30 meters). These LEDs are designed to be discreet, minimizing disturbance to wildlife.

No Glow Infrared LEDs

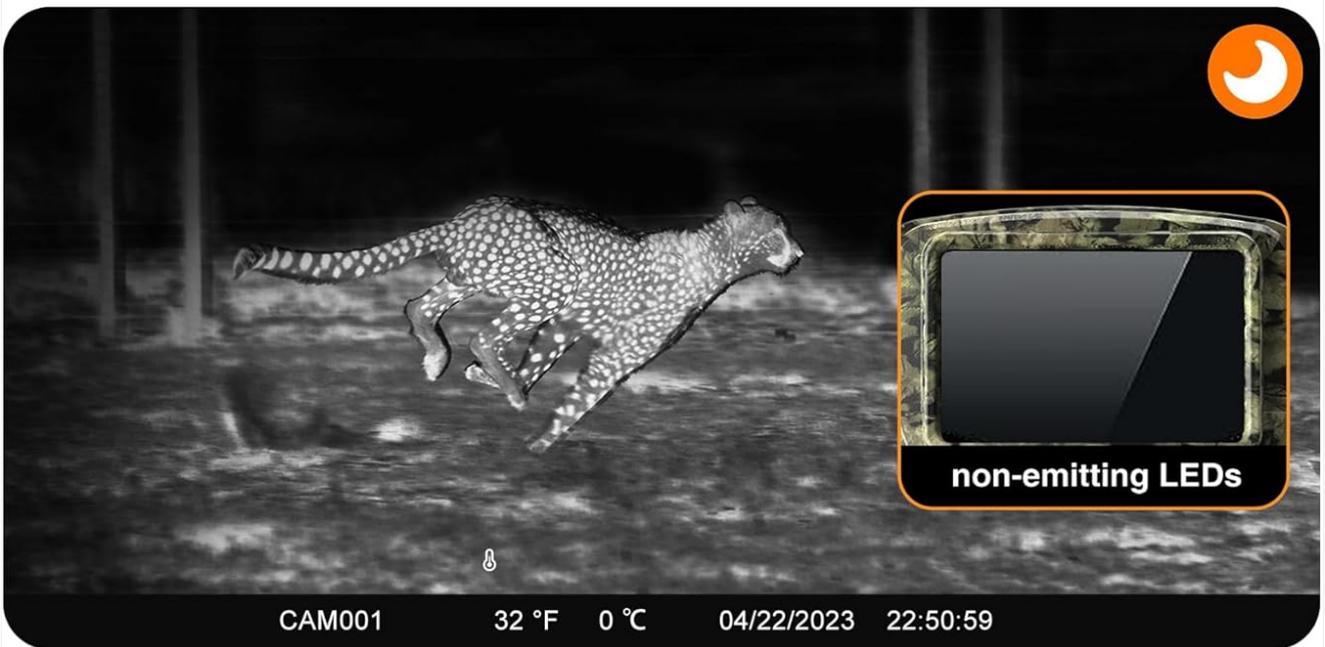

Image: A comparison showing a cheetah running in daylight and the same cheetah captured at night using the camera's no-glow infrared LEDs, demonstrating clear night vision without visible light emission.

Viewing Files on Computer

You can connect the camera to a computer using the provided USB cable to transfer and view files. Alternatively, remove the SD card and insert it into a card reader connected to your computer.

The camera can be connected to a computer using a **USB** cable to transfer files

MAINTENANCE

- **Cleaning:** Gently wipe the camera lens and motion sensors with a soft, dry cloth. Avoid abrasive materials or harsh chemicals.
- **Battery Replacement:** Replace all batteries simultaneously with new 1.5V AA alkaline batteries when the battery indicator shows low power. Do not mix old and new batteries or different battery types.
- **SD Card Management:** Regularly format the SD card to maintain optimal performance and prevent data corruption. Back up important files before formatting.
- **Storage:** When not in use for extended periods, remove batteries and store the camera in a cool, dry place away from direct sunlight.

TROUBLESHOOTING

- **Camera Not Powering On:** Ensure batteries are inserted correctly with proper polarity and are fully charged. Check if the power slider is in the 'ON' or 'TEST' position.
- **Poor Image/Video Quality:** Check the lens for dirt or condensation. Ensure the camera is securely mounted and not subject to excessive movement. Verify resolution settings in the menu.
- **Motion Sensor Not Triggering:** Adjust the sensitivity settings of the motion sensor. Ensure there are no obstructions directly in front of the sensor.
- **Wi-Fi/App Connection Issues:** Ensure your smartphone is within 33 feet of the camera. Restart both the camera and the app. Confirm Bluetooth is enabled on your phone.
- **SD Card Errors:** Format the SD card using the camera's menu. If the issue persists, try a different compatible SD card.

SPECIFICATIONS

Feature	Specification
Indoor/Outdoor Usage	Outdoor
Video Capture Resolution	4K

Image Resolution	48 Megapixels
Trigger Speed	0.05 seconds
Night Vision Range	98 Feet (30 meters)
