- **Mirror Care:** Clean the mirror surface with a glass cleaner and a lint-free cloth. Spray cleaner onto the cloth, not directly onto the mirror, to prevent liquid from seeping into the edges.
- **Dusting:** Regularly dust all surfaces with a dry, soft cloth to prevent buildup.
- **Spills:** Immediately wipe up any spills to prevent staining or damage to the wood finish.
- **Heat and Moisture:** Avoid placing hot items directly on the surface. Protect the desk from direct sunlight and excessive humidity.
- **Electrical Components:** Ensure all electrical components (outlets, USB/Type-C ports) remain dry. Do not attempt to clean them with liquids.

5. TROUBLESHOOTING

If you encounter any issues with your vanity desk, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Mirror lights not turning on.	No power to the unit; loose connection; faulty LED.	Ensure the vanity is properly plugged into a working power outlet. Check all electrical connections. If the issue persists, contact customer support.
Lights are dim or flickering.	Low power; brightness setting.	Verify the power source is stable. Adjust the brightness setting by pressing and holding the touch sensor.
Charging ports (AC/USB/Type-C) not working.	No power; overloaded circuit; device incompatibility.	Confirm the vanity is powered on. Avoid overloading the outlets. Test with different devices and cables.
Drawers or cabinet doors are stiff or misaligned.	Improper assembly; loose hardware.	Check the assembly instructions to ensure drawers and hinges are installed correctly. Tighten any loose screws on the slides or hinges.
Vanity feels wobbly.	Loose fasteners; uneven floor.	Ensure all assembly fasteners are securely tightened. If the floor is uneven, consider using furniture pads or shims to stabilize the desk.

If these steps do not resolve the issue, please contact YITAHOME customer support for further assistance.
