

## SoundLogic XT B0FFDG4NDN

# SoundLogic XT 4-in-1 Light-Up Gaming Combo Kit User Manual

Model: B0FFDG4NDN

## INTRODUCTION

Thank you for purchasing the SoundLogic XT 4-in-1 Light-Up Gaming Combo Kit. This comprehensive kit is designed to enhance your gaming experience across multiple platforms, including Xbox Series X/S, PlayStation 5, and PC. It includes a full-size LED backlit gaming keyboard, comfortable gaming headphones with an adjustable microphone, a high-precision gaming mouse, and a durable non-slip gaming mouse pad. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to ensure optimal performance of your new gaming accessories.

## PACKAGE CONTENTS

Please verify that all items listed below are present in your package:

- LED Backlit Gaming Keyboard:** A full-size keyboard with 104 keys and three distinct light modes for customizable aesthetics.
- Gaming Headphones with Adjustable Microphone:** Over-ear headphones designed for comfort during extended gaming sessions, featuring an integrated, adjustable microphone for clear communication.
- High-Precision Gaming Mouse:** An ergonomic mouse with adjustable DPI settings for precise control.
- Durable Non-Slip Gaming Mouse Pad:** A surface optimized for mouse tracking and stability.

## SETUP INSTRUCTIONS

The SoundLogic XT Gaming Combo Kit features a plug-and-play design, requiring no additional drivers for most systems. Follow these steps to set up your new gaming peripherals:

- 1. Connect the Keyboard:** Locate an available USB port on your PC, Xbox Series X/S, or PS5. Insert the USB connector of the gaming keyboard firmly into the port. The keyboard's LED backlighting should illuminate upon successful connection.
- 2. Connect the Mouse:** Locate another available USB port. Insert the USB connector of the gaming mouse firmly into the port. The mouse's lights should activate.
- 3. Connect the Headset:** The headset typically uses a 3.5mm audio jack for audio and microphone.
  - For PC:** If your PC has separate audio-out (headphone) and audio-in (microphone) jacks, you may need a Y-splitter (not included) to connect both functions. Otherwise, connect the 3.5mm jack to the combined audio port.
  - For Consoles (Xbox/PS5):** Connect the 3.5mm jack directly into the controller's headset port. Ensure your console's audio settings are configured to output audio and input microphone from the connected headset.
- 4. Position the Mouse Pad:** Place the non-slip gaming mouse pad on a flat, stable surface where you intend to use your mouse. Ensure it provides ample space for comfortable mouse movement.
- 5. System Recognition:** Your operating system or console should automatically detect and configure the devices. No manual driver installation is typically required.

## OPERATING INSTRUCTIONS

### Keyboard Operation

- **Standard Typing:** Use as a standard 104-key keyboard for all typing and command inputs.
- **LED Backlight Modes:** The keyboard features 3 light modes. Typically, a dedicated key (often labeled "FN" + a function key like "Scroll Lock" or "Pause Break") allows you to cycle through these modes or turn the backlighting on/off. Refer to the keyboard's specific key legends for exact controls.
- **Multimedia Keys:** Many gaming keyboards include dedicated multimedia keys (e.g., volume control, play/pause) or function key combinations (Fn + F1-F12) for quick access to media functions.

### Mouse Operation

- **Basic Functions:** Left-click, right-click, and scroll wheel functions operate as standard.
- **DPI Adjustment:** The mouse is equipped with 4 DPI settings. There is usually a dedicated DPI button (often located behind the scroll wheel) that allows you to cycle through these sensitivity levels. Higher DPI settings result in faster cursor movement, ideal for quick reactions in games, while lower DPI settings offer more precise control for tasks like aiming.
- **Ergonomic Design:** The mouse is designed for comfortable use during extended gaming sessions.

### Headset Operation

- **Audio Output:** Once connected, audio from your game or system will be routed through the headset. Adjust volume

using your system's or console's audio settings.

- **Microphone Usage:** Position the adjustable microphone near your mouth for clear voice capture. Ensure the microphone is enabled in your system's or game's audio settings. Some headsets may have an inline mute switch for the microphone.
- **Comfort:** The headset is designed with comfortable earcups for prolonged wear. Adjust the headband for a secure and comfortable fit.

## MAINTENANCE

Proper care and maintenance will extend the lifespan of your SoundLogic XT Gaming Combo Kit:

- **Cleaning:**
  - **Keyboard & Mouse:** Use a soft, dry cloth to wipe down surfaces. For stubborn dirt, a slightly damp cloth with mild soap can be used, ensuring no liquid enters the device. Use compressed air to clear debris from between keyboard keys.
  - **Headset:** Wipe earcups and headband with a soft, dry cloth. Avoid using harsh chemicals or abrasive cleaners.
  - **Mouse Pad:** Can be gently wiped with a damp cloth and air-dried.
- **Storage:** Store the kit in a cool, dry place away from direct sunlight and extreme temperatures when not in use.
- **Cable Management:** Avoid sharp bends or kinks in the cables to prevent internal damage.
- **Avoid Liquids:** Keep all components away from liquids to prevent electrical damage.

## TROUBLESHOOTING

If you encounter issues with your SoundLogic XT Gaming Combo Kit, please refer to the following common solutions:

Problem	Possible Cause	Solution
Keyboard/Mouse not responding	Loose USB connection, faulty USB port, system driver issue.	<ul style="list-style-type: none"><li>• Ensure USB cables are fully inserted.</li><li>• Try a different USB port on your device.</li><li>• Restart your PC/console.</li><li>• For PC, check Device Manager for driver issues (though typically plug-and-play).</li></ul>
Keyboard backlighting not working	Backlight turned off, power issue.	<ul style="list-style-type: none"><li>• Press the backlight control key (e.g., FN + Scroll Lock) to cycle modes or turn on.</li><li>• Ensure the keyboard is properly connected and receiving power.</li></ul>

Problem	Possible Cause	Solution
No audio from headset / Microphone not working	Incorrect audio settings, loose connection, faulty port.	<ul style="list-style-type: none"> <li>• Ensure the 3.5mm jack is fully inserted into the correct port.</li> <li>• Check your PC/console's audio settings to ensure the headset is selected as the default output/input device.</li> <li>• Increase volume levels on both the system and any inline volume controls on the headset.</li> <li>• Ensure the microphone is not muted (if applicable).</li> <li>• Try the headset on another device to rule out a faulty headset.</li> </ul>
Mouse cursor erratic or unresponsive	Dirty sensor, unsuitable surface, DPI setting too high/low.	<ul style="list-style-type: none"> <li>• Clean the mouse sensor with a soft cloth.</li> <li>• Ensure you are using the mouse on the provided mouse pad or another suitable, non-reflective surface.</li> <li>• Adjust the DPI setting using the mouse's DPI button.</li> </ul>
