## Driauto 4G+64G Android Stereo

# Driauto 4G+64G Android Stereo User Manual

FOR HONDA ACCORD (2008-2013)

## 1. Introduction

This manual provides detailed instructions for the installation, operation, maintenance, and troubleshooting of your Driauto 4G+64G Android Stereo head unit. This device is designed specifically for Honda Accord models manufactured between 2008 and 2013, offering a comprehensive upgrade to your vehicle's infotainment system. The system features a 10.1-inch IPS touch screen, Android operating system, wireless Carplay and Android Auto, GPS navigation, Bluetooth, Wi-Fi, DSP audio processing, and includes a backup camera for enhanced safety.

## 2. Package Contents

Please verify that all items listed below are included in your package. If any items are missing or damaged, contact customer support.

- Driauto 10.1-inch Android Stereo Head Unit
- Power Cable
- Small Screen Extension Cable
- RCA Cable Set
- AUX Adapter
- Rear Camera (AHD imaging sensor)
- Installation Tool
- Mounting Bracket
- GPS Antenna
- Rear Camera Input Cable
- USB Cables (2)

- Users Manual
- External Microphone
- Additional Accessories (as supplied)

### 3. Setup and Installation

Installation of the Driauto Android Stereo involves electrical connections and removal/reinstallation of vehicle trim. It is recommended that installation be performed by a qualified professional to ensure proper function and avoid damage to your vehicle or the product.

#### 3.1 Pre-Installation Checks

- Ensure the vehicle's ignition is off and the battery is disconnected before starting installation.
- Confirm compatibility with your Honda Accord (2008-2013 models).
- Verify all package contents are present.

## 3.2 General Installation Steps

1. Carefully remove the original car radio and trim panels. Refer to your vehicle's service manual for specific instructions.
2. Connect the dedicated adapter cable provided with the Driauto unit to your vehicle's wiring harness. Ensure all connections are secure.
3. Connect the GPS antenna and route it to a location with a clear view of the sky (e.g., dashboard, A-pillar).
4. Install the external microphone in a suitable location for clear voice pickup.
5. Connect the backup camera. The red cable connects to the positive of the car's reverse light power supply, and the black cable connects to the negative. Route the video signal cable to the head unit.
6. Connect any additional accessories such as USB cables, AUX adapter, or external amplifier/sub-woofer outputs.
7. Mount the Driauto head unit using the provided mounting bracket and secure it in the dashboard opening.
8. Reconnect the vehicle battery and test the unit's functionality before reassembling all trim panels.

## 4. Operating Instructions

### 4.1 System Overview and Display

The unit operates on an Android system, providing a familiar and customizable interface. The 10.1-inch 1280x720 resolution HD IPS touch screen supports split-screen functionality, allowing you to run two applications simultaneously. You can customize your home page and choose from various user interfaces.

- **Touch Screen:** Navigate the system by tapping, swiping, and pinching on the screen.
- **Split Screen:** Long-press an app icon or use the multi-tasking button to activate split-screen mode.
- **User Interfaces:** Access settings to select from 59 available user interfaces to personalize your display.

Image 4.1: HD screen features including split-screen and customizable homepage.

## 4.2 Smartphone Integration (Wireless Carplay & Android Auto, Mirror Link)

Connect your iOS or Android smartphone wirelessly to access features like navigation, music, calls, and messages directly on the head unit's display.

- **Wireless Carplay/Android Auto:** Pair your phone via Bluetooth and then connect via Wi-Fi. Follow the on-screen prompts to enable Carplay or Android Auto.
- **Mirror Link:** Connect your smartphone via Bluetooth and Wi-Fi to mirror your phone's screen onto the head unit. This allows you to view and interact with your phone's content directly on the larger display.

## Wireless Carplay / Android Auto / Mirror Link

Image 4.2: Wireless Carplay, Android Auto, and Mirror Link capabilities.

### 4.3 Navigation and Connectivity (GPS & Wi-Fi)

The unit features a built-in GPS module for accurate navigation and Wi-Fi for internet access.

- **GPS Navigation:** Supports both online and offline maps. Download offline maps for areas without internet access. Enjoy voice guidance and real-time traffic information (requires internet connection).
- **Wi-Fi:** Connect to the internet via a Wi-Fi hotspot from your smartphone or a dedicated car Wi-Fi device. This enables online content streaming, app downloads, and real-time services.

Image 4.3: Wi-Fi functionality, GPS navigation, and system specifications.

#### 4.4 Audio Features (Bluetooth, FM/RDS Radio, DSP)

Enhance your audio experience with integrated Bluetooth, FM/RDS radio, and Digital Signal Processing (DSP).

- **Bluetooth:** Pair your phone or other Bluetooth-enabled devices to stream music, make hands-free calls, and transfer files wirelessly.
- **FM/RDS Radio:** Receive radio signals with clear sound quality. RDS (Radio Data System) provides additional information like station names and song titles.
- **DSP 32-band Equalizer:** Customize your sound with the built-in 32-band equalizer. Adjust frequencies to match your preferences and optimize audio output, reducing noise and distortion.

# Bluetooth

Image 4.4: Bluetooth, FM/RDS Radio, and DSP 32-band equalizer features.

## 4.5 USB Ports and External Devices

The unit includes two USB ports for various functions.

- **Media Playback:** Connect USB flash drives or hard disks to play music, videos, and view photos.
- **Charging:** Use the USB ports to charge your mobile devices.
- **Dash CAM/DAB+/OBD:** The unit supports input for Dash CAM, DAB+ radio, and OBD (On-Board Diagnostics) devices (additional accessories may be required).

## 4.6 Steering Wheel Control (SWC)

The unit supports your car's original steering wheel controls, allowing you to manage audio and other functions without taking your hands off the wheel. Configuration may be required in the system settings.

## 4.7 Rear Camera Function

The included AHD imaging sensor backup camera automatically displays the rear view on the screen when the vehicle is shifted into reverse gear, aiding in parking and maneuvering.

# Rear Camera & Steering Wheel Control

Image 4.5: Rear camera display, steering wheel control, and dual USB ports.

## 5. Maintenance

- **Screen Cleaning:** Use a soft, lint-free cloth to gently wipe the touch screen. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaner. Avoid harsh chemicals or abrasive materials.
- **General Cleaning:** Keep the unit free from dust and debris. Use a soft brush or compressed air to clean vents and ports.
- **Software Updates:** Periodically check for system software updates to ensure optimal performance and access to new features. Updates can typically be found in the system settings or on the manufacturer's website.
- **Avoid Extreme Temperatures:** Do not expose the unit to extreme heat or cold for prolonged periods, as this can affect its performance and lifespan.

## 6. Troubleshooting

If you encounter issues with your Driauto Android Stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse, incorrect wiring.	Check all power cables and connections. Verify vehicle fuses. Ensure correct wiring according to the installation guide.
No sound output	Volume too low, incorrect audio source, loose speaker wires, DSP settings.	Increase volume. Select correct audio source. Check speaker wire connections. Adjust DSP equalizer settings.
GPS signal lost or inaccurate	GPS antenna obstruction, loose connection, outdated maps.	Ensure GPS antenna has a clear view of the sky. Check antenna connection. Update maps if necessary.
Bluetooth not connecting	Bluetooth off on unit or phone, pairing mode not active, interference.	Ensure Bluetooth is enabled on both devices. Put unit in pairing mode. Delete previous pairings and try again. Move closer to the unit.
Backup camera not displaying	Incorrect wiring, camera malfunction, reverse signal not detected.	Verify camera power and video signal connections. Ensure the reverse trigger wire is correctly connected to the vehicle's reverse light circuit.
Cables do not match car harness	Incorrect adapter cable, vehicle specific wiring variations.	Double-check the compatibility of the provided adapter cable with your specific Honda Accord model year. Contact customer support for assistance or consult a professional installer.

If the problem persists after attempting these solutions, please contact Driauto customer support for further assistance.

## 7. Specifications

Feature	Detail
Model	4G+64G Android Stereo
Operating System	Android (Version 15 indicated in images)
Memory (RAM)	4GB
Storage (ROM)	64GB
Screen Size	10.1 inches

Feature	Detail
