## SETUP AND PAIRING

Follow these steps to set up and pair your QCOQ Smart Traceur Tag with your Apple device:

1. **Enable Bluetooth and Find My:** Ensure that Bluetooth is enabled on your iOS device and that the "Find My" application is accessible.
2. **Open the Find My App:** Launch the "Find My" application on your iPhone or iPad.
3. **Add New Item:** Navigate to the "Items" tab within the Find My app. Tap on "Add New Item" and then select "Other Supported Item". *Note: This is not for "Add AirTag".*
4. **Activate the Tag:** Hold the button on the QCOQ Smart Traceur Tag for approximately 2 seconds until you hear a "Di" sound, indicating it is powered on and ready for connection.
5. **Connect:** Place the tag close to your iPhone. The app will search for and display "Diamond tag". Click "Connect" and follow the on-screen prompts until the pairing process is complete.

# Lost Mode Activated

When activated, the finder can securely access your contact information via the Find My network, with all device data encrypted and accessible only to authorized users.

## OPERATING INSTRUCTIONS

### Locating Items Nearby (Proximity Tracking)

When your QCOQ Smart Traceur Tag is within Bluetooth range, you can use the Find My app to locate it. The tag features a built-in speaker that can emit a sound up to 100 dB.

- Open the "Find My" app.
- Select the QCOQ Smart Traceur Tag from your list of items.
- Tap "Play Sound" to trigger an audible alert from the tag.
- For precise tracking, select "Directions" to get navigation assistance to your item's last known location.

# Precise Proximity Find Nearby

Click "Play Sound" to locate via audio | Select "Directions" for precise tracking

**MAX. 100dB**

The tracker will make a Di~Di~sound.  
Loud enough to find your item

## Multi-Region Tracking (Out of Range)

The QCOQ Smart Traceur Tag leverages the Apple Find My network, which uses aggregated location data from millions of Apple devices worldwide. If your item is out of Bluetooth range, its position updates based on nearby Apple devices. This encrypted cloud tracking ensures regular positioning while maintaining Apple's privacy standards.

### Left-Behind Reminder (Anti-Forget Alert)

To prevent leaving your items behind, activate the "Notify When Left Behind" feature in the Find My app. If your item moves out of your device's Bluetooth range, you will receive a notification with its last known location. You can also define a custom radius for this alert.

# Left-Behind Remind

## Lost Mode Activation

If an item with a QCOQ Smart Traceur Tag is lost, you can activate "Lost Mode" in the Find My app. This allows you to pre-register your contact information (e.g., phone number or email address). If someone finds your item and scans the tag with an NFC-enabled device, they will see a "Lost Mode" message with your contact details, facilitating its return.

- When Lost Mode is active, the "Notify When Found" feature is automatically enabled.
- While in Lost Mode, your item locator is locked and cannot be paired with a new device.

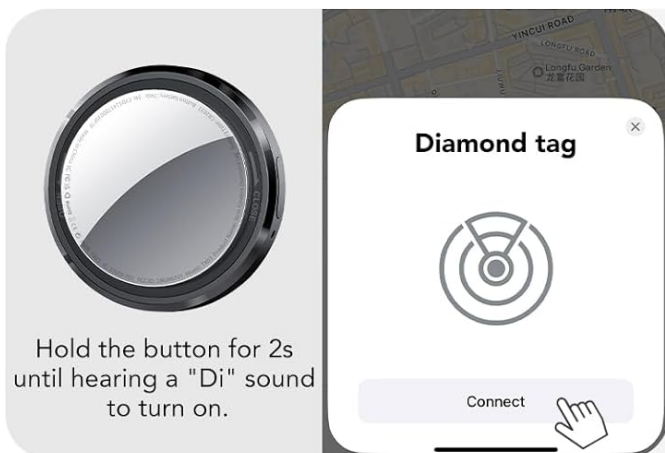

Open The "Find My" APP and Bluetooth

Press "Add New Item" and then "Other supported item"

*Note: This is not for "add AirTag"*

Hold the button for 2s until hearing a "Di" sound to turn on.

Close to iPhone. Search and Connect "Diamond tag"

Click "Continue" until "Finish"

## Item Sharing

You can share the location of your QCOQ Smart Tracur Tag with up to 5 other users via the "Find My" application. All shared users can track the item's location in real-time. This feature requires iOS 17, iPadOS 17, macOS 14, or later versions.

# Comment activer le mode Perdu ?

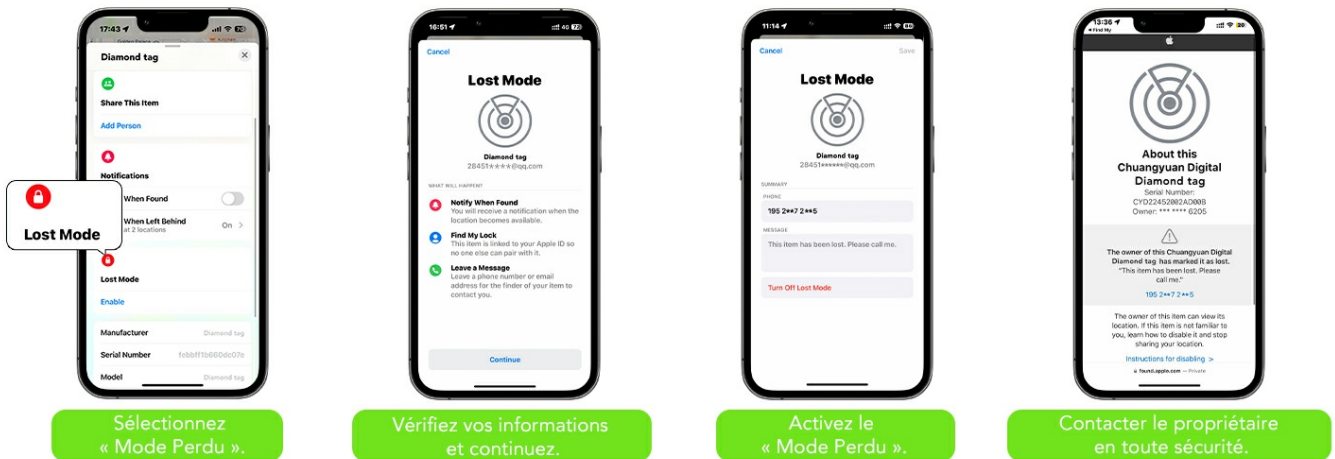

Image: Depicts the item sharing functionality within the Find My app, allowing multiple users to track a single tag.

## Siri Integration

The QCOQ Smart Tracur Tag supports Siri integration. If your item is nearby, you can simply ask Siri to help you find it. For example, say "Hey Siri, where are my keys?" and if a QCOQ tag is attached to your keys, it will emit a sound.

## BATTERY REPLACEMENT

The QCOQ Smart Tracur Tag uses a replaceable CR2032 battery, offering up to 365 days of battery life. To replace the battery:

1. **Open the Cover:** Gently twist the stainless steel cover counter-clockwise to remove it.
2. **Remove Old Battery:** Take out the old CR2032 battery.
3. **Insert New Battery:** Insert a new CR2032 battery with the positive (+) pole facing upwards.
4. **Align and Close:** Align the cover and gently press it down.

5. **Secure Cover:** Twist the cover clockwise to secure it in place.

## TROUBLESHOOTING

If you encounter issues with your QCOQ Smart Traceur Tag, refer to the following common solutions:

Issue	Solution
<b>Device does not power on.</b>	Ensure the CR2032 battery is correctly inserted with the positive (+) side up and is not depleted. Replace the battery if necessary.
<b>Cannot pair with iPhone.</b>	<ul style="list-style-type: none"> <li>• Ensure Bluetooth is enabled on your iPhone.</li> <li>• Make sure the tag is powered on (hold button for 2 seconds until "Di" sound).</li> <li>• Place the tag close to your iPhone during pairing.</li> <li>• Try resetting the tag (see "Reset Device" below).</li> </ul>
<b>Sound alert is too low or not working.</b>	<ul style="list-style-type: none"> <li>• Ensure the tag is within Bluetooth range of your iPhone.</li> <li>• Check the battery level; a low battery can affect sound output.</li> <li>• Verify that the "Play Sound" function is activated in the Find My app.</li> </ul>
<b>Location updates are inaccurate or infrequent.</b>	<ul style="list-style-type: none"> <li>• Location accuracy depends on the density of Apple devices in the vicinity. In areas with fewer Apple devices, updates may be less frequent.</li> <li>• Ensure your iPhone's location services are enabled for the Find My app.</li> </ul>
<b>Reset Device.</b>	Press and hold the button continuously until you hear "beep, beep, beep, beep, beep" (approximately 5 seconds). Continue holding the button for another 5 seconds until you hear a long "beep". The total hold time is approximately 15 seconds. This will restore default settings. You may need to remove the item from the Find My app and re-pair it.
