iBstone Nova

iBstone Nova Hearing Aids User Manual

Model: Nova

INTRODUCTION

This manual provides detailed instructions for the safe and effective use of your iBstone Nova Hearing Aids. Please read this manual thoroughly before using the device to ensure proper operation and to maximize your hearing experience. The iBstone Nova Hearing Aids are designed to provide clear sound with smart noise cancelling technology, offering comfort and ease of use for adults and seniors.

PACKAGE CONTENTS

Verify that all items listed below are included in your package:

What Included

Full Package • Real-human Support • Operation Video

Charging Case

Hearing Aids

Anti-lost Strap

Cleaning Brush

Wax Guard Filters

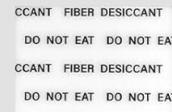

USB Cable

User Manual

Silicone Ear Domes

Image: The package contents include the charging case, two hearing aids, an anti-lost strap, a cleaning brush, wax guard filters, a USB cable, a user manual, silicone ear domes, and dry tablets.

- iBstone Nova Hearing Aids (Left and Right)
- Portable Charging Case
- USB Charging Cable
- Silicone Ear Domes (various sizes)
- Wax Guard Filters
- Cleaning Brush
- Anti-Lost Lanyard
- Dry Tablets (for dehumidifying capsule)
- User Manual (this document)

SETUP

1. Initial Charging

Before first use, fully charge the hearing aids and the charging case.

1. Connect the USB charging cable to the charging case and a power source.

2. Place the hearing aids into their respective slots in the charging case (L for left, R for right).
3. The indicator lights on the case will illuminate to show charging status. A full charge typically takes about 1.5 hours for the hearing aids. The charging case provides approximately 3 full recharges for the hearing aids.

Image: The hearing aids are shown charging in their case, connected via a USB cable. Indicator lights on the case display the battery level. One light indicates 25% remaining power in the case.

2. Selecting Ear Domes

Choose the ear dome size that provides the most comfortable and secure fit, and minimizes sound leakage or whistling.

- Experiment with the different sizes and styles of silicone ear domes provided.
- A proper fit is crucial for optimal sound quality and to prevent feedback.

Image: A four-step guide illustrates how to fit the hearing aids: 1. Choose the right size of ear domes. 2. Place the device into the ear canal correctly, noting L/R markings. 3. Adjust for comfort and security. 4. Press the button to adjust volume/mode.

3. Inserting the Hearing Aids

Identify the left (L) and right (R) hearing aids. Gently insert each aid into the corresponding ear canal until it feels secure and comfortable.

OPERATING INSTRUCTIONS

1. Power On/Off

- **Automatic On/Off:** The hearing aids automatically turn on when removed from the charging case and turn off when placed back into the case.

2. Adjusting Volume and Modes

The iBstone Nova features a single multi-function button for easy control.

One Button, All Functions

Auto On/Off · 9 Volume Levels · 3 Listening Modes · Memory Function

The image shows a black open hearing aid charging case with two slots for hearing aids. A hand is pointing to a small orange button on a hearing aid that is removed from the case and held in the air. The button is labeled 'Function button' with a callout. The background is a light blue with a subtle dotted pattern.

Quick press to adjust volume

- 9 volume levels for different hearing loss

2-second press to adjust modes

- Quiet / Noisy / Outdoor modes for different scenes

Auto turn ON/OFF

- When take out/put into the case

Auto memory function to keep the setting

- No need to adjust next time

Image: A close-up of the iBstone Nova hearing aid highlights its single function button. Text describes its functions: quick press for volume, 2-second press for modes, auto on/off, and auto memory function.

- **Volume Adjustment:**

- A **quick press** of the function button will cycle through 9 volume levels.
- Adjust to a comfortable listening level.

- **Mode Selection:**

- A **2-second press** of the function button will cycle through 3 listening modes:

- **Quiet Mode:** For calm environments.
- **Noisy Mode:** Enhances speech in environments with background noise.
- **Outdoor Mode:** Optimized for open-air settings.

- The device has an auto-memory function, retaining your last setting when turned off and on.

MAINTENANCE

1. Daily Cleaning

- Use the provided cleaning brush to gently remove any earwax or debris from the ear domes and the hearing aid body.
- Wipe the hearing aids with a soft, dry cloth. Do not use water or cleaning solutions directly on the devices.

2. Dehumidifying

The charging case includes a built-in dehumidifying capsule to protect your hearing aids from moisture.

- Place the dry tablets into the designated compartment within the charging case.
- Store your hearing aids in the charging case with the dry tablets when not in use to extend their lifespan.

Extra Design Features

Anti-Lost Strap

Never worry about losing

Built-in Dehumidifying Capsule

Extend the lifetime of your devices

Portable Charging Case

Small case, big power

Abundant Ear domes

get your best fitting

Image: This image displays several features, including the anti-lost strap, the built-in dehumidifying capsule in the charging case, the portable charging case, and various ear domes for optimal fitting.

3. Replacing Wax Guard Filters

Regularly check the wax guard filters and replace them if they appear clogged with earwax. Refer to the detailed instructions in the full user manual for replacement procedures.

TROUBLESHOOTING

If you experience any issues with your iBstone Nova Hearing Aids, please refer to the following common solutions:

Problem	Possible Cause	Solution
No Sound or Weak Sound	Low battery, clogged ear dome/wax guard, incorrect volume setting.	Charge the hearing aids. Clean or replace the ear dome/wax guard. Increase volume.
Whistling or Feedback	Improper fit, ear dome too small, earwax blockage.	Re-insert the hearing aid. Try a larger ear dome. Clean ear canal or hearing aid.
Intermittent Sound	Low battery, loose connection in charging case, moisture.	Ensure full charge. Check placement in charging case. Use dehumidifying capsule.
Hearing Aid Not Charging	Improper placement in case, faulty cable/adapter, dirty charging contacts.	Ensure proper alignment in case. Try a different cable/adapter. Clean charging contacts.

If the problem persists, please contact customer support.

SPECIFICATIONS
