MAINTENANCE

- **Cleaning:** Wipe the bed frame with a dry cloth. For the upholstered headboard, spot clean with a mild fabric cleaner if necessary.
- **Hydraulic Mechanism:** Periodically check the hydraulic pistons for any signs of wear or damage. Ensure they operate smoothly. Do not apply oil or lubricants unless specified by the manufacturer.

- **Fasteners:** Regularly check all screws and bolts to ensure they remain tight. Re-tighten if loose to maintain stability and safety.
- **Headboard Creases:** To smooth out creases from the headboard, use a steamer iron or pat gently and wait 48 hours for them to naturally relax.
