SETUP AND ASSEMBLY

Assembly is designed to be straightforward with pre-drilled holes and labeled parts. An included toolkit and visual instructions will assist in the process, typically completed within one hour.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches. Identify each component using the parts list.
2. **Attach Side Rails to Headboard and Footboard:** Connect the upholstered side rails to the headboard and footboard using the provided bolts and Allen wrench. Ensure all connections are finger-tight before fully tightening.
3. **Install Support Legs:** Securely attach the central support legs to the bed frame. These legs are crucial for stability and weight distribution.
4. **Place Wood Slats:** Position the wooden slats across the bed frame. The slats are designed with anti-slip grooves and are secured with steel screws to prevent movement and eliminate squeaks. Ensure each slat is properly seated and fastened.
5. **Final Tightening:** Once all components are in place, go back and fully tighten all bolts and screws. Do not overtighten.
