NN BEN NEVIS B1103S-SilverWhite

NN BEN NEVIS Women's Quartz Watch Instruction Manual

Model: B1103S-SilverWhite

1. INTRODUCTION

Thank you for choosing the NN BEN NEVIS Women's Quartz Watch. This timepiece is designed with a unique aesthetic, featuring a dial reminiscent of an artist's palette, combined with precision craftsmanship. This manual provides essential information to help you set up, operate, maintain, and troubleshoot your watch, ensuring its longevity and optimal performance.

2. PRODUCT OVERVIEW

The NN BEN NEVIS Women's Quartz Watch combines elegant design with reliable functionality. Key features include:

- **Unique Design:** Features an artist's palette-inspired dial with a perfectly curved bezel and slim profile.
- **Precision Movement:** Powered by a Japanese quartz movement for accurate timekeeping.
- **Durable Construction:** Mineral crystal glass protects against scratches, and the stainless steel case and bracelet ensure lasting durability.
- **Comfortable Wear:** Adjustable stainless steel bracelet with a discreet jewelry clasp.
- **Water Resistance:** Designed to withstand daily moisture exposure.

Figure 2.2: Detailed view of the watch dial, highlighting the colorful paint splatches that serve as hour markers.

3. SETUP

3.1 Setting the Time

1. Gently pull the crown (the small knob on the side of the watch case) outwards until you hear a slight click.
2. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its original position. The second hand will begin to move, indicating the watch is running.

3.2 Adjusting the Bracelet

The watch comes with an adjustable stainless steel bracelet and a complimentary sizing tool to ensure a comfortable fit. If the bracelet is too loose, you can remove links using the provided tool.

1. Identify the pins on the side of the bracelet links that can be pushed out. These are usually indicated by small arrows on the inside of the link.
2. Place the bracelet into the sizing tool with the pin aligned with the tool's pusher.
3. Slowly turn the screw on the sizing tool to push the pin out.
4. Remove the desired number of links. Ensure an even number of links are removed from each side of the clasp for balance.
5. Reassemble the bracelet by aligning the remaining links and inserting the pin back into place. Use a firm, gentle pressure to push the pin fully in.

Figure 3.2: Rear view of the watch, illustrating the stainless steel case back and the bracelet's clasp mechanism.

4. OPERATING INSTRUCTIONS

4.1 Timekeeping

Your NN BEN NEVIS watch is a quartz timepiece, known for its accuracy and reliability. Once the time is set, the watch will continuously display the current time.

4.2 Water Resistance

This watch is designed to withstand daily moisture exposure. It is suitable for:

- Handwashing
- Rain exposure

Important Note: This watch is **not** suitable for swimming, bathing, showering, or any water sports. Avoid pressing the crown or operating the watch functions while it is wet, as this can compromise its water resistance.

5. MAINTENANCE

5.1 Cleaning Your Watch

To maintain the appearance of your watch:

- Wipe the watch case and bracelet regularly with a soft, dry cloth to remove dust and fingerprints.
- For more stubborn dirt, slightly dampen the cloth with water and gently wipe. Ensure no water enters the watch case.
- Avoid using chemical cleaners, solvents, or abrasive materials, as these can damage the watch's finish.

5.2 Battery Replacement

Your quartz watch is powered by a battery. When the watch stops or the second hand begins to skip, it is an

indication that the battery needs to be replaced. It is highly recommended to have the battery replaced by a qualified watchmaker or service center to ensure the watch's water resistance is maintained and to prevent damage to the internal components.

5.3 Storage

When not wearing your watch, store it in a cool, dry place away from direct sunlight, extreme temperatures, and strong magnetic fields. The original packaging or a watch box is ideal for storage.

6. TROUBLESHOOTING

If you encounter any issues with your watch, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Watch is not running	Battery depleted; Crown not pushed in; Internal malfunction.	Check if crown is fully pushed in. If not, push it in. If still not running, battery may need replacement (see Section 5.2). If problem persists, contact support.
Time is inaccurate	Time not set correctly; Battery low; Exposure to strong magnetic fields.	Reset the time (see Section 3.1). If problem persists, battery may be low. Keep watch away from strong magnets.
Bracelet is too loose/tight	Incorrect number of links.	Adjust the bracelet by adding or removing links using the provided tool (see Section 3.2).
Condensation under crystal	Exposure to extreme temperature changes or moisture ingress.	Avoid extreme temperature changes. If condensation persists, contact support immediately to prevent damage.

7. SPECIFICATIONS
