

Allpax AX1210

Allpax Flexible Packing Hook (No. 1) - Model AX1210 User Manual

1. INTRODUCTION

The Allpax Flexible Packing Hook (Model AX1210) is a specialized tool designed for the efficient removal of packing material from various applications. Its unique construction allows for access into confined and hard-to-reach spaces, making maintenance tasks simpler and safer. This manual provides instructions for the proper use, care, and maintenance of your Allpax packing hook.

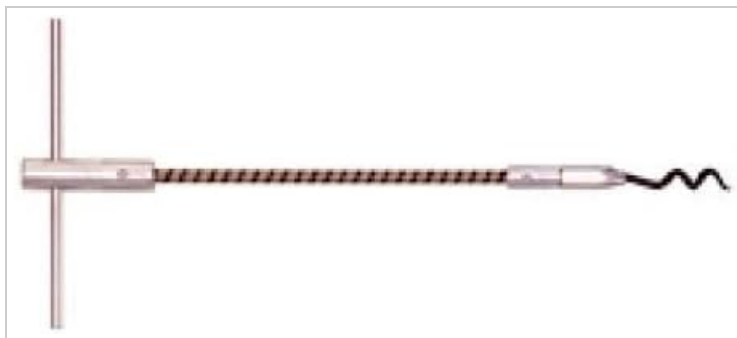

Figure 1: Allpax Flexible Packing Hook (Model AX1210). This image displays the Allpax Flexible Packing Hook (Model AX1210). The tool features a silver-colored T-handle on the left, connected to a flexible, wound-wire shaft. At the end of the shaft, a black, tempered steel corkscrew-style tip is visible, designed for gripping and extracting packing material.

2. PRODUCT COMPONENTS

- **Comfort T-Handle:** Provides a secure and ergonomic grip for precise control during operation.
- **Flexible Wound-Wire Shaft:** Allows the tool to navigate around obstructions and reach into tight spaces.
- **Steel Corkscrew-Style Tip:** A tempered steel tip designed to securely engage and extract packing material.
- **Overall Length:** Approximately 7.5 inches (19 cm).

3. SETUP AND PREPARATION

Before using the Allpax Flexible Packing Hook, ensure the work area is clear and well-lit. Always wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, to prevent injury from dislodged material or sharp edges.

1. **Inspect the Tool:** Verify that the corkscrew tip is securely attached and that the flexible shaft is free from damage or

excessive wear.

- 2. **Identify Packing Material:** Determine the type and condition of the packing material to be removed.
- 3. **Access Point:** Ensure there is adequate access to the packing gland or area where the material is located.

4. OPERATING INSTRUCTIONS

The Allpax Flexible Packing Hook is designed for the safe and effective removal of various packing materials. Follow these steps for optimal performance:

- 1. **Insert the Tip:** Carefully insert the corkscrew-style tip into the packing material. Utilize the flexible shaft to maneuver around any obstructions.
- 2. **Engage the Packing:** Gently rotate the T-handle to allow the corkscrew tip to embed itself into the packing material. Apply slight pressure to ensure a firm grip.
- 3. **Extract the Material:** Once the tip is securely engaged, pull the handle steadily to extract the packing material. For stubborn material, a slight twisting motion may assist in removal.
- 4. **Repeat as Necessary:** Continue this process until all desired packing material has been removed.
- 5. **Clear Debris:** After removal, ensure the area is clear of any remaining packing fragments before installing new material.

Note: Avoid excessive force, as this may damage the packing hook or the surrounding equipment.

5. MAINTENANCE AND CARE

Proper maintenance ensures the longevity and performance of your Allpax Flexible Packing Hook.

- **Cleaning:** After each use, clean the corkscrew tip and shaft to remove any residue or debris. A wire brush or cloth can be used.
- **Drying:** Ensure the tool is thoroughly dry before storage to prevent corrosion, especially the steel components.
- **Lubrication:** Apply a light coat of oil to the steel corkscrew tip and shaft periodically to protect against rust and maintain smooth operation.
- **Storage:** Store the packing hook in a dry environment, away from corrosive chemicals or extreme temperatures.

6. TROUBLESHOOTING

If you encounter issues with your Allpax Flexible Packing Hook, consider the following:

- **Tip Not Engaging Packing:** Ensure the corkscrew tip is fully inserted into the packing material before attempting to twist and pull. The material may be too hard or too soft for effective engagement; adjust technique as needed.
- **Difficulty Extracting:** If the packing material is particularly dense or stuck, try engaging the tip in a different spot or using multiple insertions to break up the material. Avoid excessive force that could damage the tool.
- **Missing Corkscrew Tip:** Upon receiving the product, verify all components are present. If the corkscrew tip is missing or detached, contact customer support for assistance.

7. SPECIFICATIONS

Feature	Detail
Model Number	AX1210
Brand	Allpax
Overall Length	7.5 inches (19 cm)

Feature	Detail
Material	Steel (T-handle, shaft, corkscrew tip)
Finish Type	Steel
Item Weight	0.32 ounces (approx. 9 grams)
Product Dimensions (L x W x H)	7.3 x 3.1 x 0.6 inches (approx. 18.5 x 7.9 x 1.5 cm)
Recommended Uses	Indoor, Utility, Maintenance, Packing Removal
