Greesum UltraSmart AutoClean Litter Box

Model: GS-SCLB24-0769-2GY-0702

Instruction Manual

INTRODUCTION

The Greesum UltraSmart Automatic Litter Box is designed for pet owners with multiple cats. This smart litter box aims to simplify cat waste management by providing automated cleaning and odor control. It features advanced safety mechanisms, app connectivity for remote monitoring and control, and a large capacity waste bin.

PRODUCT FEATURES

- **Comprehensive Safety Assurance:** Integrated infrared sensors and microwave radar detect a cat's presence. The cleaning cycle automatically pauses when a cat approaches or enters the litter box, ensuring safety.
- **Odor Protection:** An odor-blocking lid and fragrance cartridge work together to contain and neutralize odors, contributing to a fresh environment.
- **Quiet Operation:** Designed for ultra-quiet operation to minimize disturbance.
- **Smart App Connectivity:** Supports 2.4G WiFi for pairing with a dedicated app. This allows remote control of cleaning cycles, monitoring of cat usage frequency and duration, and adjustment of settings such as cleaning delay time and litter type selection.
- **Spacious Design:** 90-liter capacity accommodates various cat sizes. The 8.6-liter waste bin reduces the frequency of emptying.
- **Easy Maintenance:** The removable waste bin is designed for quick and easy cleaning.
- **Complete Package:** Includes the automatic litter box, power adapter, fragrance cartridge, litter bags, stain-proof mat, and user manual.

SETUP

Before initial use, ensure all components are present as listed in the "Complete Package" feature. Place the litter box on a flat, stable surface. Connect the power adapter to a suitable electrical outlet. Fill the internal drum with an appropriate amount of clumping cat litter (Bentonite, Tofu sand, or Mineral sand are compatible). Ensure the waste

bin is correctly inserted with a litter bag.

Optimized for cats weighing 2.2–24.2 Lbs

1x Smart Litter Box
1x Step

1x tSand Control Pad
1x Cat Litter Scoop

1x Garbage Bag

Image: Product dimensions and included accessories. The litter box measures 22 inches long, 20 inches wide, and 23 inches high, with a 90L large space capacity. The waste bin is 8.6 inches high and 11 inches deep. Included items are the smart litter box, sand control pad, garbage bag, and step.

Suitable for clumping cat litter

Easy to add cat litter

Poop-Only Mode

Saves clean litter, reduces waste

Full Litter Change

Fresh start in just one cycle

Mineral

Bentonitet

Image: Demonstrates compatibility with various clumping cat litter types, including Mineral, Bentonite, and Tofu sand. It also shows how to add litter and the "Poop-Only Mode" and "Full Litter Change" options for waste management.

OPERATING INSTRUCTIONS

Initial Use

After plugging in, the litter box will perform an initial calibration. Allow it to complete this cycle before use. The system is designed to automatically detect when a cat uses the box and initiate a cleaning cycle after a set delay.

App Control and Monitoring

Download the dedicated app and connect the litter box via 2.4G WiFi. The app allows for remote control of cleaning cycles, monitoring of cat usage frequency and duration, and adjustment of settings such as cleaning delay time and litter type selection. This feature helps in tracking your cat's health and habits.

Image: A user interacting with the mobile application to monitor and control the Greesum UltraSmart AutoClean Litter Box. The app displays status (e.g., "Cleaning"), cat weight, excretion times, delay clean time, and litter type selection. It highlights 2.4GHz Wi-Fi connectivity.

Your browser does not support the video tag.

Video: This video demonstrates the Greesum Self Cleaning Litter Box in operation. It shows a cat entering and exiting the litter box, the infrared sensor detecting the cat, the self-scooping system efficiently separating waste, the odor-proof cover sealing smells, and the quiet operation. It also highlights the 10L large waste capacity and remote real-time monitoring via the app, including a 10-day self-cleaning cycle.

Safety Features (SafeGuard Tech)

The SafeGuard technology utilizes infrared sensors and microwave radar to detect your cat's presence. If a cat is detected approaching or inside the litter box during a cleaning cycle, the cycle will automatically pause to prevent any harm or disturbance to the pet. The cleaning will resume once the cat has left the area.

Love means never having to worry

1x Microwave Radar

2x Infrared Sensor

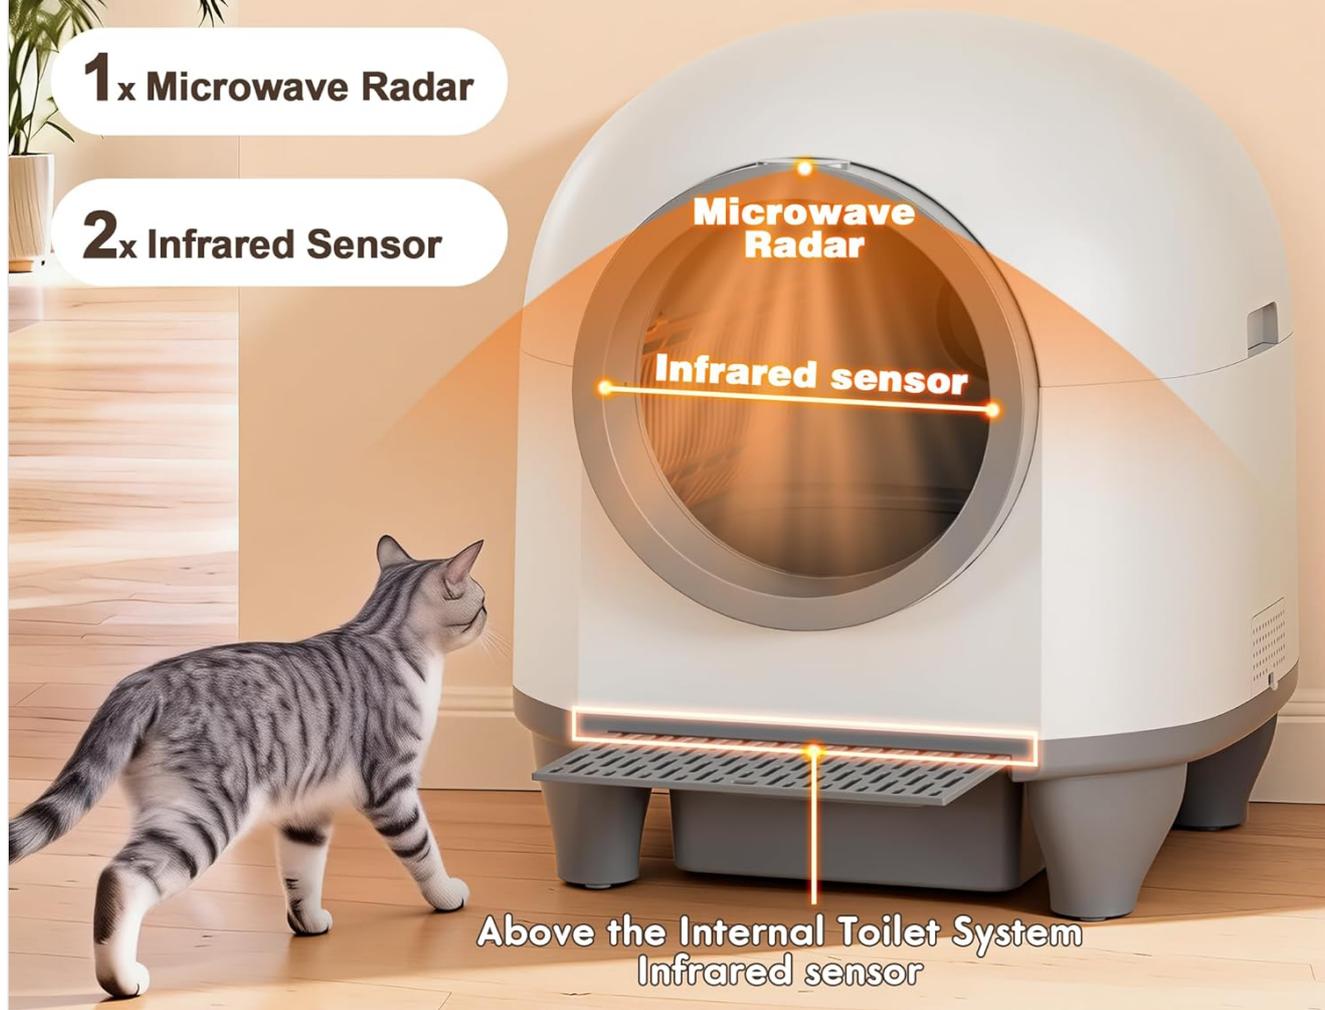

Image: Illustrates the SafeGuard technology with a microwave radar and two infrared sensors positioned to detect a cat's presence, ensuring the cleaning cycle pauses when the cat is near or inside the litter box.

MAINTENANCE

Emptying the Waste Bin

The 8.6-liter waste bin collects waste, extending the time between manual emptying. When the waste bin is full, the app will notify you, or you can visually check the bin. To empty, slide out the waste bin, remove the filled litter bag, and replace it with a new one. The bin can be rinsed with water if needed and then reassembled.

8.6L Garbage Bin

By using the APP or setting a scheduled cleaning function, you can complete the remote cleaning process.

Make travel and business trips no longer subject to restrictions.

Image: Shows the 8.6L garbage bin, highlighting its 10-12 days storage capacity. A user is shown petting a cat next to the litter box, implying convenience for travel.

Cleaning the Unit

Periodically, the internal drum and other accessible parts may require cleaning. Disconnect the power before cleaning. Use a mild detergent and water to wipe down surfaces. Ensure all parts are dry before reassembling and reconnecting power.

TROUBLESHOOTING

- **Litter Box Not Cleaning:** Check if the power is connected and the unit is turned on. Ensure no cat is currently inside or near the entrance, as safety sensors will pause operation. Verify litter levels are within the recommended range.
- **App Connectivity Issues:** Confirm your home WiFi network is 2.4Ghz. Restart both your router and the litter box. Ensure the app is updated to the latest version.
- **Odor Persistence:** Ensure the odor-blocking lid is properly closed and the fragrance cartridge is not expired or empty. Replace the litter bag regularly.

- **Cat Not Using the Litter Box:** Cats may need time to adjust to a new litter box. Place the new litter box next to the old one initially. Gradually transition by removing the old litter box after your cat consistently uses the new one. Ensure the litter type is familiar and preferred by your cat.

SPECIFICATIONS

Brand	Greesum
Model Name	GS-SCLB24-0769-2GY-0702
ASIN	B0FGCFCWK6
Item Weight	24.25 Pounds (11 kg)
Product Dimensions (LxWxH)	22 x 20 x 23 inches (55.88 x 50.8 x 58.42 cm)
Material	Plastic
Color	Gray
Litter Box Capacity	90 Liters
Waste Bin Capacity	8.6 Liters
Connectivity	2.4G WiFi
Target Audience	Cats (optimized for 2.2-24.2 lbs)
