6. MAINTENANCE

Proper care will extend the life and appearance of your cabinet.

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. For stubborn marks, a mild soap solution can be used, followed by wiping with a clean, dry cloth.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, ammonia-based products, or solvents, as these can damage the painted finish.
- **Moisture:** Although designed for bathroom environments, excessive moisture can still cause damage. Ensure the bathroom is well-ventilated, and promptly wipe away any water splashes on the cabinet.
- **Hardware Check:** Periodically check all screws and fittings to ensure they remain tight. Tighten if necessary to maintain structural integrity.

7. TROUBLESHOOTING

If you encounter any issues with your cabinet, refer to the following common solutions:

- **Wobbly Cabinet:** Ensure all screws are tightened. Verify that the cabinet is placed on a level surface. If the floor is uneven, use shims under the feet for stability. Confirm the anti-tip device is correctly installed and secured to the wall.
- **Doors Not Closing Properly:** Check the alignment of the hinges. Adjust them if necessary. Ensure the magnetic catches are properly aligned and functioning.
