### 3. INSTALLATION GUIDE

Follow these steps to safely replace the battery in your V7 cordless vacuum cleaner.

1. **Power Off and Unplug:** Ensure your vacuum cleaner is completely turned off and disconnected from any charging source.
2. **Locate Battery:** Identify the existing battery pack on your V7 vacuum. It is typically located at the base of the handle or main body.
3. **Remove Screws:** Using an appropriate screwdriver (usually a Phillips head), carefully remove the screws securing the old battery pack to the vacuum cleaner. Keep these screws in a safe place.
4. **Detach Old Battery:** Gently pull the old battery pack away from the vacuum cleaner. It may require a slight wiggle to disengage from the connectors.
5. **Install New Battery:** Align the Fiety V7 replacement battery with the connectors on the vacuum cleaner. Push it firmly into place until it clicks or sits flush.
6. **Secure New Battery:** Reinsert and tighten the screws to secure the new battery pack. Do not overtighten.

Once installed, the Fiety V7 replacement battery operates identically to the original battery.

- **Charging:** Connect your vacuum cleaner to its charging dock or power adapter. The charging indicator on your vacuum will show the charging status.
- **Usage:** Operate your vacuum cleaner as usual. The battery provides power for the motor and accessories.
- **Battery Level:** Monitor the battery level indicator on your vacuum cleaner to determine remaining runtime.

- **Avoid Extreme Temperatures:** Do not expose the battery to extreme heat or cold. Optimal operating temperature is between 0°C and 40°C (32°F and 104°F).
- **Long-Term Storage:** If storing the battery for an extended period (more than a month), charge it to approximately 50-60% and store it in a cool, dry place. Recharge every 3-6 months to prevent deep discharge.
- **Cleaning:** Keep the battery contacts clean and free of dust or debris. Use a dry cloth to wipe them if necessary.
