5. TROUBLESHOOTING

If you encounter any issues with your PawHut Cat Tree, refer to the following common problems and solutions:

- **Issue: The cat tree feels unstable.**

Solution: Ensure all connections are tightly secured. Re-tighten any loose screws. Verify that the anti-tipping kit is properly installed and anchored to a sturdy wall. Place the tree on a flat, even surface.

- **Issue: My cat is not using the scratching posts.**

Solution: Rub catnip on the sisal posts to attract your cat. Gently guide your cat's paws to the posts to demonstrate their use. Ensure the posts are tall enough for your cat to stretch fully while scratching.

- **Issue: My cat is not using the condo or beds.**

Solution: Place a favorite blanket or toy inside the condo or bed to make it more inviting. Some cats prefer higher vantage points; ensure the tree is placed in a quiet area where your cat feels secure.

- **Issue: Damaged or missing parts.**

Solution: Contact PawHut customer support with your model number and details of the issue for assistance with replacement parts.
