Baseus Picogo 10000mAh 45W Portable Charger User Manual

Model: Picogo 10000mAh

INTRODUCTION

The Baseus Picogo 10000mAh 45W Portable Charger is a compact and powerful solution for on-the-go charging. Featuring a 10000mAh capacity, 45W ultra-fast charging capabilities, and a convenient built-in USB-C cable, it is designed to efficiently power a wide range of devices. This manual provides essential information on setting up, operating, maintaining, and troubleshooting your portable charger.

SETUP

1. Initial Charging of the Power Bank

Before first use, it is recommended to fully charge your Baseus Picogo power bank. This ensures optimal performance and battery longevity.

- Connect the built-in USB-C cable to a compatible USB-C power adapter (not included) or a USB-A power adapter

using the USB-A port.

- The LED digital display will show the charging progress and current battery percentage.
- The power bank is fully charged when the display shows 100%.

2. Connecting Devices for Charging

The Baseus Picogo offers multiple output options for charging your devices.

- **Using the Built-in USB-C Cable:** Extend the built-in braided USB-C cable and plug it directly into your USB-C compatible device. This cable supports up to 45W output.
- **Using the USB-C Port:** For devices requiring a separate USB-C to USB-C cable, connect one end to the power bank's USB-C port and the other to your device. This port also supports up to 45W output.
- **Using the USB-A Port:** For devices requiring a USB-A to USB-C/Lightning/Micro-USB cable, connect the USB-A end to the power bank's USB-A port and the other end to your device. This port supports up to 22.5W output.

OPERATING INSTRUCTIONS

1. Charging Your Devices

Once your device is connected, the power bank will automatically begin charging. The LED display will show the remaining battery percentage of the power bank and the charging power.

- **Fast Charging:** The power bank supports PD 45W and 22.5W fast charging. For optimal fast charging, ensure your device and cable also support these protocols.
- **Simultaneous Charging:** The power bank can charge up to three devices simultaneously using the built-in USB-C

cable, the USB-C port, and the USB-A port. Note that total output power will be distributed among connected devices.

2. Understanding the LED Display

The integrated LED digital display provides real-time information about the power bank's status:

- **Battery Percentage:** Shows the remaining battery level of the power bank (e.g., "100%").
- **Charging Power:** Indicates the current charging wattage (e.g., "45W" or "22.5W").
- **Charging Status:** The display will illuminate when charging or being charged.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your Baseus Picogo power bank.

- **Storage:** Store the power bank in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.
- **Cleaning:** Use a soft, dry cloth to clean the exterior of the power bank. Do not use liquid cleaners or abrasive materials.
- **Battery Care:** To prolong battery life, avoid fully discharging the power bank frequently. Recharge it when the

battery level is low. If storing for extended periods, charge it to about 50-70% every 3-6 months.

- **Cable Care:** The built-in braided cable is designed for durability. Avoid excessive bending or pulling at the connection points to prevent damage.

Durable Braided Cable for Long-lasting Use

Problem	Possible Cause	Solution
Power bank not charging devices.	Low battery on power bank; Loose cable connection; Incompatible device/cable.	Recharge the power bank; Ensure cables are securely connected; Use original or certified cables.
Power bank not recharging.	Faulty charging adapter/cable; Power bank internal issue.	Try a different charging adapter and cable; Contact customer support if issue persists.
Slow charging.	Cable not supporting fast charging; Device not supporting fast charging; Multiple devices charging simultaneously.	Use a fast-charging compatible cable; Ensure your device supports fast charging; Charge one device at a time for maximum speed.
LED display not working.	Power bank is off; Malfunction.	Ensure power bank is turned on or connected to a device/charger; Contact customer support.

SPECIFICATIONS

Feature	Detail
Model Name	Baseus Picogo 10000mAh
Battery Capacity	10000mAh
Built-in Cable Output	USB-C, up to 45W Max
USB-C Port Output	Up to 45W Max
USB-A Port Output	Up to 22.5W Max
Input (USB-C)	Max. 18W (for recharging power bank)
Dimensions	Approximately 3.47 × 2.35 × 1.06 inches
Display	Smart LED Digital Display

Market's Smallest 10,000mAh
