7. TROUBLESHOOTING

If you encounter any issues with your bed frame, please refer to the following common solutions:

- **Noise/Squeaking:**

Ensure all bolts and screws are securely tightened. Check that the wooden slats are properly seated and the center support is stable. The bed frame is designed with silent pads to minimize noise.

Verify that the power adapter is correctly plugged into both the headboard and a functional wall outlet. Check for any loose connections. If issues persist, refer to the LED light specific instructions or contact customer support.

Confirm the bed frame's main power cord is plugged in. Test the outlets and ports with different devices and

cables to rule out device-specific issues. Ensure the wall outlet is active.

• **Drawers Not Sliding Smoothly:**

Check for any obstructions under the bed or in the drawer tracks. Ensure the drawer wheels are clean and free of debris. Verify that the drawers are assembled correctly and the lock system is not jammed.
