## 5. MAINTENANCE

---

### 5.1. Cleaning

- Use a soft, lint-free cloth slightly dampened with water or a screen cleaner to clean the display.
- For the keyboard and chassis, use a soft cloth or compressed air to remove dust and debris.

### 5.2. Battery Care

To maximize battery life, avoid extreme temperatures and fully discharging the battery frequently. The average battery life is approximately 6 hours, depending on usage.

### 5.3. Software Updates

Regularly check for and install Windows updates to ensure your system has the latest security patches and performance improvements.

## 6. TROUBLESHOOTING

---

### 6.1. Common Issues

- **No Power:** Ensure the charger is securely connected to both the laptop and a working power outlet.
- **Display Issues:** If the screen is blank, try connecting an external monitor to check if the issue is with the laptop's display.
- **Connectivity Problems:** For Wi-Fi or Ethernet issues, restart your router and the laptop. Check network settings in

Windows.

## 6.2. Restarting Your Laptop

A simple restart can often resolve minor software glitches. To restart, click the Start button, then Power, and select Restart.
