HOMYEDAMIC ZX-ET6001-1

HOMYEDAMIC Oversized Manual Recliner Chair User Manual

Model: ZX-ET6001-1 (BLUE-6002)

1. INTRODUCTION

Thank you for choosing the HOMYEDAMIC Oversized Manual Recliner Chair. This manual provides essential information for the safe and efficient use, assembly, and maintenance of your new recliner. Designed for comfort and durability, this extra-wide recliner supports up to 350 lbs and features a zero-gravity recline experience, a lumbar support pillow, and soft flannel fabric. Please read this manual thoroughly before use and retain it for future reference.

2. KEY FEATURES

- **Zero Gravity Recliner:** This manual recliner chair opens to a zero gravity experience when the footrest is opened using the side handle. The angle of the backrest adjusts based on user weight, with a maximum angle of 150°. Note: The angle is not lockable and will return to 90° after leaving the recliner.
- **Wider Design:** Upgraded to a larger and wider size with a 28-inch seat width for adults. Overall dimensions: 49"W x 35"D x 43"H.
- **Durable Construction:** Features an all-metal body certified by BIFMA, tested for 25,000 openings and closings, ensuring long-term durability. Maximum capacity: 350 lbs.
- **Comfort Enhancements:** Includes a lumbar cushion for extra lower back support. The cushion is spring-loaded to maintain flexibility and prevent collapse. Wide armrests are padded for comfortable support.
- **Soft Fabric:** Made with soft and skin-friendly flannel fabric for ultimate comfort.
- **Convenient Storage:** Equipped with side pockets for magazines and remotes, and two hidden cup holders.

3. SETUP AND ASSEMBLY

Your HOMOYEDAMIC Oversized Recliner Chair is designed for quick and easy assembly, typically taking about 15 minutes without the need for additional tools. The chair ships in two separate boxes, which may arrive at different times. Please ensure you have received both boxes before beginning assembly.

3.1. Unpacking

1. Carefully open both shipping boxes.
2. Remove all components and packaging materials. Verify all parts are present according to the packing list (not provided in this manual, refer to product packaging).
3. Place components on a soft, clean surface to prevent damage during assembly.

3.2. Assembly Steps

While specific detailed steps are usually provided with the product, general assembly involves:

- Attaching the backrest to the seat base. Ensure the brackets align correctly.
- Connecting any necessary wiring (if applicable for power models, though this is a manual model, some internal connections might exist).
- Securing the armrests (if separate).
- Placing the lumbar support pillow.

Product Dimension

///

Figure 3.1: Product Dimensions. This diagram illustrates the overall dimensions of the recliner, including height, width, and depth, as well as the seat width and depth. It also indicates the maximum weight capacity of 350 lbs and that the product ships in two boxes.

OVERSIZED RECLINER

Suitable For Height 5'1"-5'9"

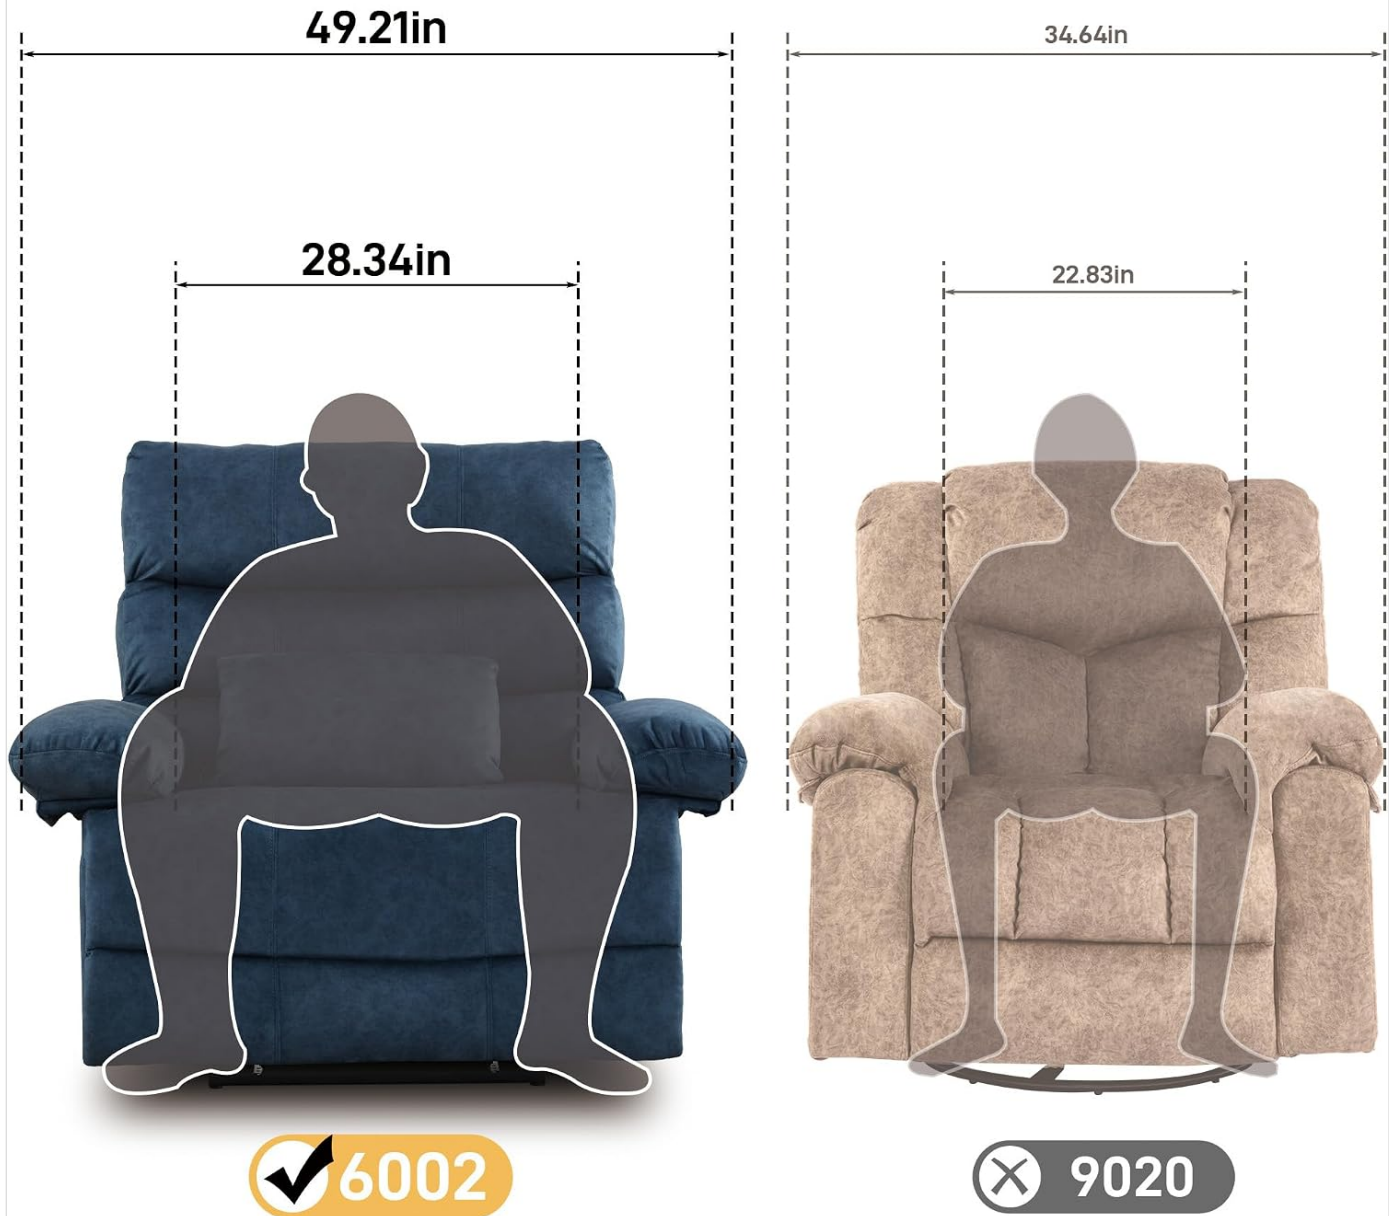

Figure 3.2: Oversized Recliner Comparison. This image visually compares the larger dimensions of the HOMYEDAMIC recliner (Model 6002) to a standard recliner (Model 9020), highlighting its extra width and suitability for larger individuals.

4. OPERATING INSTRUCTIONS

4.1. Reclining Function (Manual)

This is a manual recliner. The reclining mechanism is activated by a side handle and your body weight.

- To Recline:** Locate the pull ring/handle at the side of the cushion (typically on the right side when seated). Pull the handle to release the footrest. Lean back gently, placing your elbows on the armrests, and the chair will recline freely as you lean back. The backrest angle adjusts based on your weight, up to 150°.
- To Return Upright:** Lean forward and push the footrest down with your legs until it locks into place. The backrest will return to its upright (90°) position. Note: The recline angle is not lockable and will return to 90° when you get up from the chair.

RECLINE FUNCTION

The angle of the backrest is adjustable but not lockable

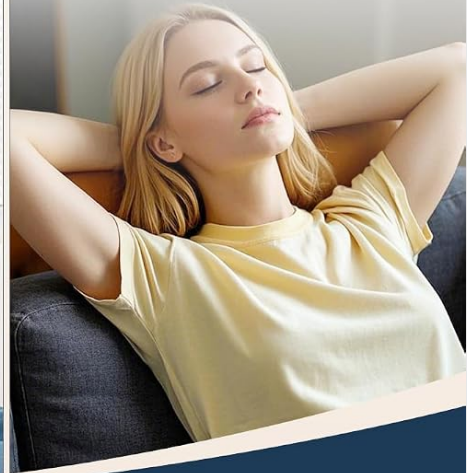

Reading

Watching TV

Napping

Exterior snap handles open the recliner to recline

Figure 4.1: Recline Function. This image illustrates the different recline angles (90° for reading, 120° for watching TV, and 150° for napping) and shows the exterior snap handle used to open the recliner.

Requires Manual Foot Pedal Closure

not suitable for the elderly/pregnant women/disabled/legged people

Figure 4.2: Manual Foot Pedal Closure. This diagram demonstrates that closing the footrest requires force on the legs. It also advises standing up only after the pedals are fully closed. This manual recliner is not suitable for the elderly, pregnant women, disabled, or leg-impaired individuals due to the force required to close the footrest.

4.2. Using Cup Holders and Storage Pockets

- **Hidden Cup Holders:** The recliner features two hidden cup holders, one on each side. To access, gently push the armrest panel outwards. Place your beverage securely in the holder. Push the panel back to conceal the holder when not in use.
- **Side Pockets:** Use the side pockets located on the exterior of the armrests to store magazines, remote controls, or other small items.

Figure 4.3: Rear View of Recliner. This image shows the back of the recliner, illustrating its solid construction and how the backrest integrates with the main frame.

5. CARE AND MAINTENANCE

Proper care will extend the life and appearance of your recliner.

- **Cleaning:** Wipe clean with a damp cloth. For spills, blot immediately with a clean, dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **General Care:** Regularly vacuum the fabric to remove dust and debris.
- **Mechanism:** The all-metal body is designed for durability. Avoid forcing the reclining mechanism. If it feels stiff, check for obstructions. Do not lubricate unless specified by the manufacturer.
- **Lumbar Pillow:** The lumbar cushion is removable for cleaning or adjustment.

6. TROUBLESHOOTING

If you encounter issues with your recliner, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Footrest is difficult to close.	Requires significant leg force to retract.	This is a characteristic of the manual mechanism. Ensure you apply firm, consistent pressure with your legs to push the footrest back into place. Stand up only after the footrest is fully closed. This model is not recommended for individuals with limited leg strength.
Chair feels unstable or tips forward.	Improper weight distribution; not designed for certain movements while reclined.	Avoid sudden movements or shifting weight excessively while reclined, especially if a child or pet attempts to climb onto your lap. Ensure the chair is on a flat, stable surface.
Backrest does not stay reclined.	Manual recline mechanism is not lockable.	This is normal operation. The backrest angle is not lockable and will return to 90° when you get up from the chair. It relies on your body weight to maintain the reclined position.
Fabric bunches up or feels uncomfortable.	Fabric friction with clothing; cushion settling.	Adjust your position to smooth out the fabric. The spring-loaded cushion is designed to resist collapse, but some settling is normal over time.

7. PRODUCT SPECIFICATIONS

Attribute	Detail
Brand	HOMYEDAMIC
Model Name	ZX-ET6001-1
Color	Blue-6002
Product Dimensions	35"D x 50"W x 43"H
