## domi outdoor living LGCF1694-8x8

# Domi 8'x8' Lean-to Gazebo Instruction Manual

Model: LGCF1694-8x8

## INTRODUCTION

---

Thank you for choosing the Domi 8'x8' Lean-to Gazebo. This manual provides essential information for the safe and proper assembly, operation, and maintenance of your new gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

## SAFETY INFORMATION

---

Always prioritize safety during assembly and use. Failure to follow these instructions may result in injury or damage to the product.

- Ensure all parts are present and undamaged before assembly. Do not proceed with assembly if any parts are missing or damaged.
- Assembly requires at least two adults.
- Wear appropriate safety gear, including gloves and eye protection.
- Choose a level and stable surface for installation.
- Securely anchor the gazebo to the wall and ground as instructed to prevent tipping or movement in strong winds.
- Do not hang heavy objects from the gazebo frame.
- Regularly inspect the gazebo for loose connections or damage.

# PARTS LIST

Refer to the packaging and included diagrams for a complete list of parts and hardware. Verify all components are present before starting assembly.

## Example Parts (Refer to actual manual for full list)

| Part Name          | Quantity | Description                                            |
|--------------------|----------|--------------------------------------------------------|
| Main Support Posts | 4        | Vertical metal posts forming the primary structure.    |
| Roof Panels        | Varies   | Galvanized steel panels for the roof.                  |
| Wall Buckles       | Included | Brackets for attaching the gazebo to an existing wall. |
| Anchoring Hardware | Included | Bolts and anchors for securing to the ground.          |

# SETUP AND ASSEMBLY

Follow these steps carefully for proper assembly. Refer to the detailed diagrams in your physical manual for part identification and specific connection points.

## 1. Site Preparation

1. Select a flat, level surface for installation. Ensure adequate clearance around the gazebo.
2. Identify the wall or structure to which the gazebo will be attached. Ensure the wall is structurally sound and capable of supporting the gazebo.
3. Clear the area of any debris or obstacles.

## 2. Frame Assembly

Assemble the main support posts and crossbeams according to the numbered parts in your manual. Ensure all connections are finger-tight before final tightening.

# Triangular Steel Frame

The Domi lean - to gazebo, crafted from top - grade steel, features excellent corrosion resistance.

Image: Detail of the triangular steel frame, highlighting the robust and corrosion-resistant construction that provides excellent support.

## 3. Wall Mounting

The gazebo is designed for wall-mounted installation. Use the provided wall buckles to secure the gazebo to your chosen structure.

1. Position the gazebo frame against the wall.
2. Mark the drilling points for the wall buckles on the wall.
3. Drill pilot holes and secure the wall buckles using appropriate fasteners for your wall material (fasteners for wall may not be included and should be purchased separately based on wall type).
4. Attach the gazebo frame to the secured wall buckles.

# PRODUCT DETAILS

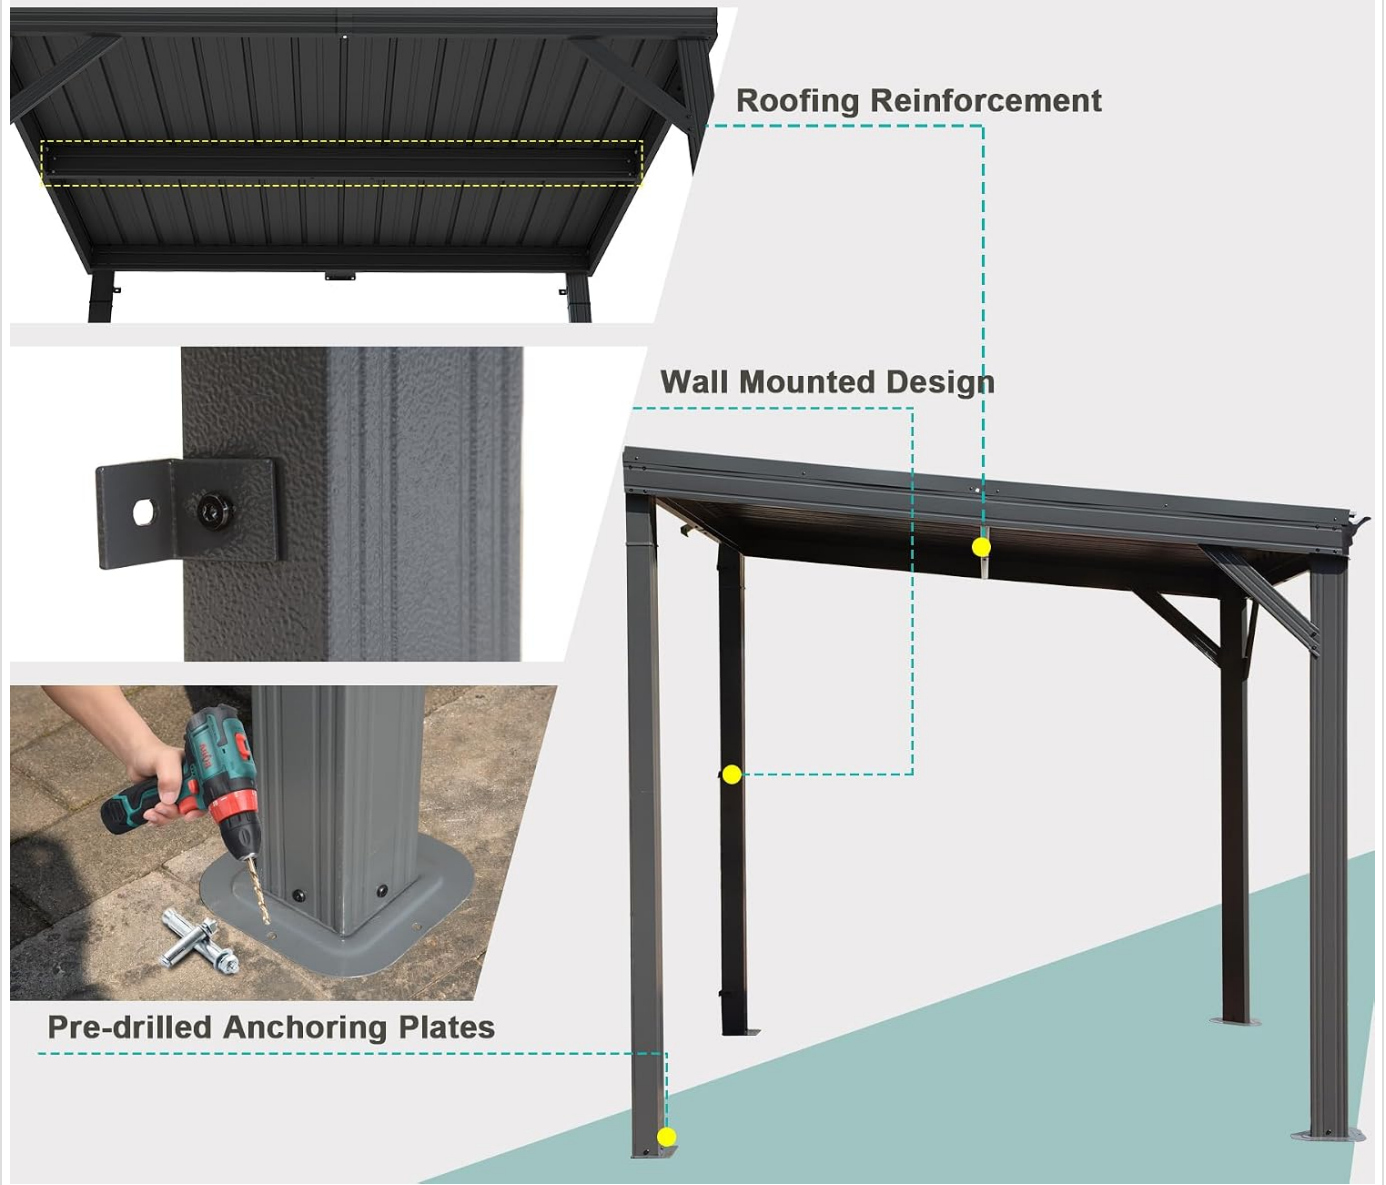

Image: A detailed diagram illustrating key structural features including roofing reinforcement, the wall-mounted design with attachment points, and pre-drilled anchoring plates at the base of the posts.

## 4. Roof Panel Installation

Install the galvanized steel roof panels. Ensure they are correctly aligned to facilitate proper water drainage.

**Sturdy and Stable**

**Drainage System  
Design**

## **Sloping Galvanized Steel Roof**

The sloping roof expedites rainwater to flow off smoothly, efficiently solving drainage issues.

Image: A close-up view of the sloping galvanized steel roof, demonstrating its efficient water runoff and integrated drainage system.

### **5. Anchoring**

Secure the gazebo to the ground using the provided anchoring hardware. This step is crucial for stability and safety, especially in windy conditions.

1. Use the pre-drilled holes in the base plates of the support posts.
2. Drill into the ground surface (concrete, wood deck, etc.) and insert the appropriate anchors.
3. Tighten all bolts and screws securely.

## **OPERATING AND USAGE GUIDELINES**

The Domi Lean-to Gazebo is designed to provide a permanent outdoor shelter. While it is a static structure, proper usage ensures its longevity and your safety.

- **Weather Resistance:** The gazebo features a heavy-duty metal frame and a galvanized steel roof designed to

withstand various weather conditions, including heavy snow and strong winds, when properly anchored.

- **UV Protection:** The roof provides 99% UV-proof protection with a UPF 50+ rating, offering a safe shaded area.
- **Drainage System:** The sloped roof and upgraded gutter system efficiently manage rainwater and snowmelt, preventing buildup.
- **Load Capacity:** Avoid hanging excessively heavy items from the frame. While robust, exceeding its design limits can cause damage.

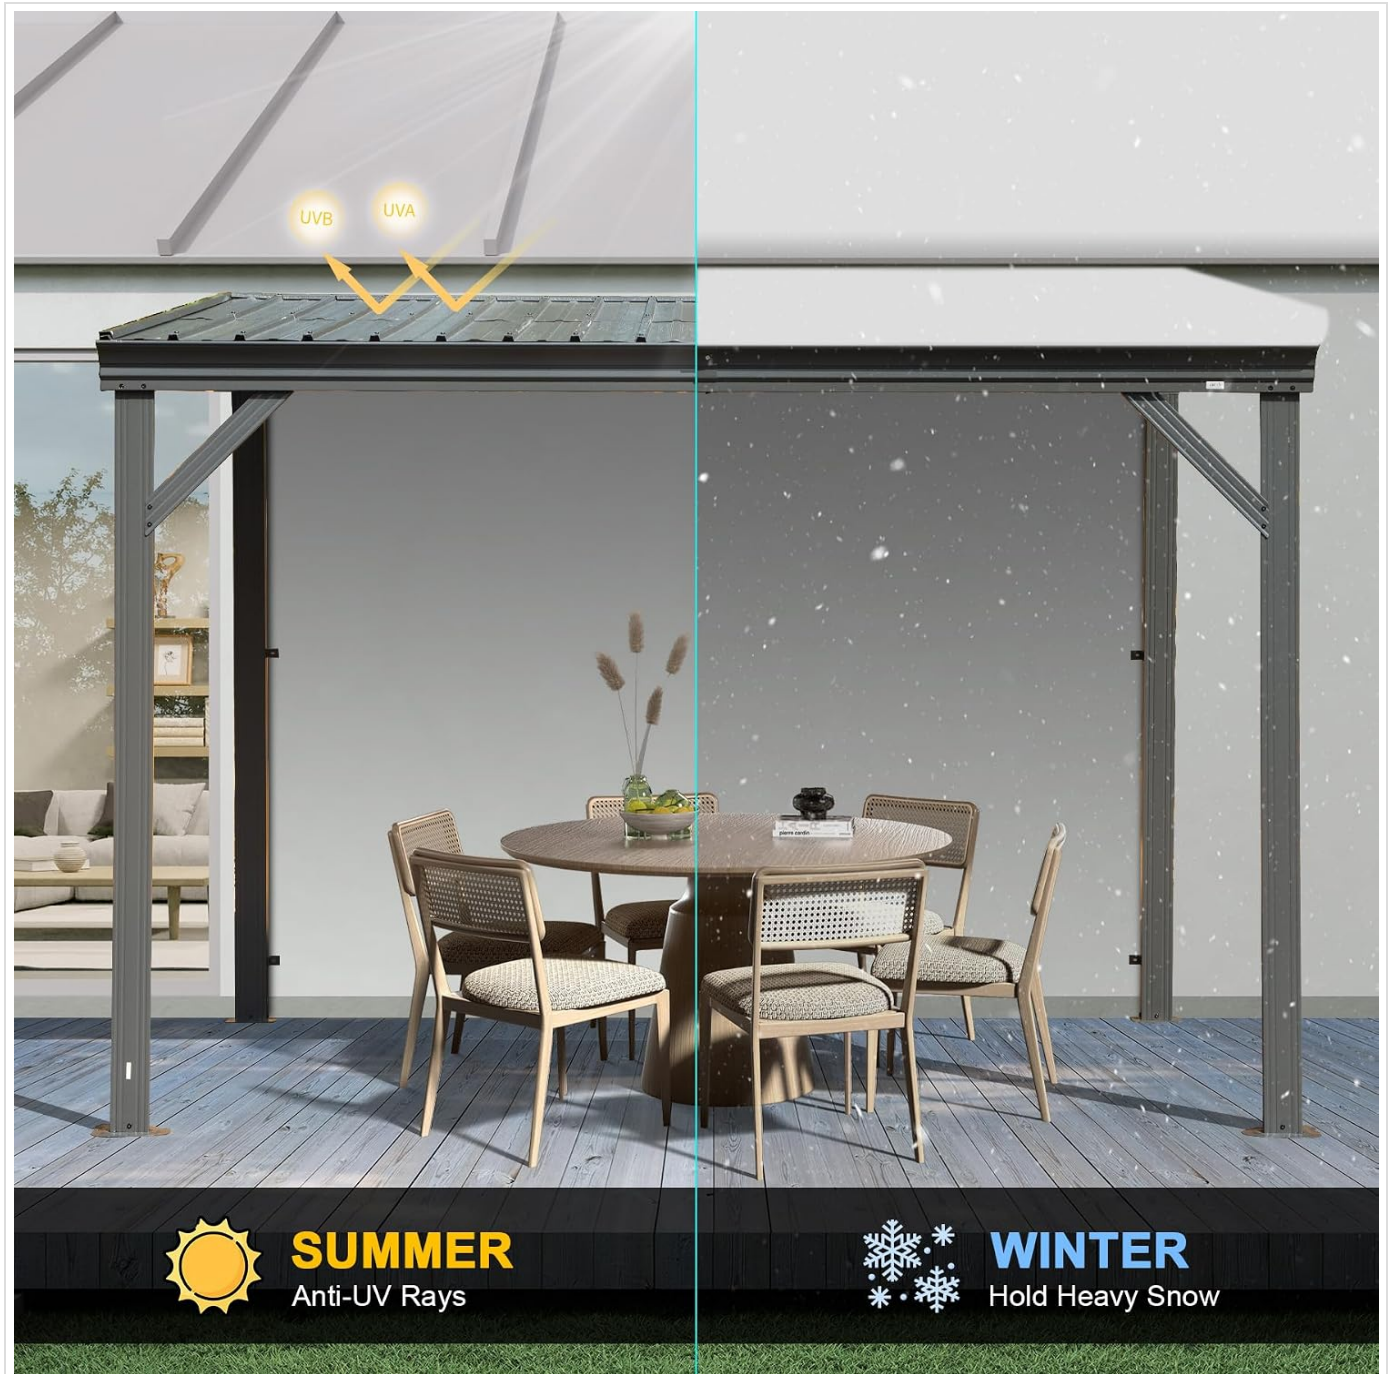

Image: A visual comparison demonstrating the gazebo's performance in different seasons, highlighting its anti-UV ray protection in summer and its ability to hold heavy snow in winter.

## MAINTENANCE

Regular maintenance will extend the life and appearance of your gazebo.

- **Cleaning:** Clean the frame and roof panels periodically with mild soap and water. Rinse thoroughly with clean water. Avoid abrasive cleaners or harsh chemicals.

- **Drainage System:** Regularly check and clear the gutters and drainage channels of leaves, debris, or any blockages to ensure efficient water runoff.
- **Fastener Check:** Periodically inspect all bolts, screws, and anchoring points. Tighten any loose fasteners to maintain structural integrity.
- **Rust Prevention:** While the frame is rust-resistant, inspect for any scratches or chips in the paint that could lead to rust. Touch up with appropriate outdoor metal paint if necessary.
- **Winter Care:** Although designed for snow load, it is advisable to clear excessive snow accumulation from the roof to minimize stress on the structure.

## TROUBLESHOOTING

This section addresses common issues you might encounter.

| Problem                          | Possible Cause                                                         | Solution                                                                                                                                                                  |
|----------------------------------|------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Gazebo feels unstable or wobbly. | Loose fasteners; improper anchoring; uneven ground.                    | Check and tighten all bolts and screws. Ensure the gazebo is securely anchored to both the wall and the ground. Verify the ground surface is level.                       |
| Water pooling on the roof.       | Debris in gutters; incorrect roof panel alignment.                     | Clear any leaves or debris from the drainage system. Re-check roof panel installation to ensure proper slope and alignment.                                               |
| Difficulty during assembly.      | Incorrect part orientation; missing hardware; insufficient assistance. | Double-check the step-by-step manual and part numbers. Ensure all hardware is present. Assembly requires at least two adults. Contact customer support if issues persist. |
