Safe Handling:

- Always handle the tool with care.
- Ensure tools are fully extended before use to prevent accidental closure.
- Keep fingers clear of moving parts when opening or closing tools.
- Store the tool in a safe place, out of reach of children.

OPERATING INSTRUCTIONS

To access any tool, gently pull it from its closed position until it fully extends. To close, push the tool back into the handle.

Using the Scissors:

Extend the scissors. Use them for precise cutting of paper, thread, small cords, and other light materials. Ensure the blades are clean for optimal performance.

Using the Package Opener:

Extend the package opener. This tool is designed to safely cut through tape, cardboard, and plastic packaging without damaging contents. Position the cutting edge against the material and apply gentle pressure while pulling.

Using the Screwdrivers (3 mm and 7 mm):

Extend the desired screwdriver. Align the tip with the screw head and turn clockwise to tighten or counter-clockwise to loosen. The 7 mm screwdriver is integrated with the bottle opener.

Using the Bottle Opener and Wire Stripper:

Extend the tool. Use the hooked end to open bottle caps. The notch near the base of the bottle opener functions as a wire stripper. Insert the wire into the appropriate notch and rotate the tool to strip insulation.

Cleaning:

- After use, especially if exposed to dirt or moisture, clean the tool with warm water and a mild soap.

- Open and close each tool several times to distribute the oil.

Storage:

- Store your multi-tool in a dry environment to prevent corrosion.
