Motor Care

The desk's motor is designed for durability and quiet operation. No specific user maintenance is required for

the motor. If you experience unusual noises or performance issues, refer to the troubleshooting section or contact customer support.

TROUBLESHOOTING

- **Desk Not Adjusting Height:** Check if the power cord is securely plugged into both the desk and a working wall outlet. Ensure the on-off switch on the power strip is in the 'on' position. If the issue persists, try resetting the control panel (refer to your assembly guide for specific reset instructions, often involving holding the 'RST' button).

- **Unusual Noise During Adjustment:** A slight hum is normal during operation. If you hear grinding or loud clicking, stop operation immediately and inspect the legs for any obstructions or loose connections.
